The Wright Brothers and the Birth of Aviation Lester W. Garber, 2005 On December 17th, 1903 two bicycle mechanics' from Dayton, Ohio achieved the first powered man-carrying flight that was sustained and controlled. The Wright brothers' accomplishments were not lucky accidents and theirs is a wonderful story about the power of individuals and the scientific method. This thirteen-chapter book is written at the same intellectual level as was used by the Wright brothers. It is structured around three fundamental questions: What is the problem of flight? In 1899, what was known? How did the Wright brothers do it?

Reconsidering a Century of Flight Janet Rose Daly Bednarek, Roger D. Launius, 2003 Contains twelve essays in which leading aerospace historians consider the role of aviation in the twentieth century, exploring topics related to innovation and the technology of flight, civil aeronautics and government policy, aerial warfare, and aviation in the American imagination.

From hobbyists to armchair investors to day-traders: in recent years we have seen a boom unlike anything before as people look to the markets, whether from home or the office. However without the right tools, training and techniques, these same people can often be a danger to themselves - and their pockets. In Master the Art of Trading trader, educator, and CEO of the wildly successful Mayfair Method, Lewis

Daniels, offers a quick, easy, and comprehensive roadmap to trading. It explores the grand theories and behavioural economics underpinning the markets, from Elliot Wave Theory to Composite Man. And it helps readers uncover their innate strengths, realise their propensity for risk, and discover what sort of trader they are - on order to optimise their behaviour to make them as effective as possible.

In Command Matthew Oyos,2018-06 2019 Theodore Roosevelt Association Book Prize Although Theodore Roosevelt was not a wartime president, he took his role as commander in chief very seriously. In Command explores Roosevelt's efforts to modernize the American military before, during, and after his presidency (1901-9). Matthew Oyos examines the evolution of Roosevelt's ideas about military force in the age of industry and explores his drive to promote new institutions of command: technological innovations, militia reform, and international military missions. Oyos places these developments into broader themes of Progressive Era reform, civil-military tensions, and Roosevelt's ideas of national cultural vitality and civic duty. In Command focuses on Roosevelt's career-long commitment to transforming the military institutions of the United States. Roosevelt's promotion of innovative military technologies, his desire to inject the officer corps with fresh vigor, and his role in building new institutions for command changed the American military landscape. His attempt to modernize the military while struggling with the changing nature of warfare during his time resonates with and provides unique insight into the challenges presented by today's rapidly changing strategic environment.
