Networked Music Cultures Raphaël Nowak, Andrew Whelan, 2016-09-16 This collection presents a range of essays on contemporary music distribution and consumption patterns and practices. The contributors to the collection use a variety of theoretical and methodological approaches, discussing the consequences and effects of the digital distribution of music as it is manifested in specific cultural contexts. The widespread circulation of music in digital form has far-reaching consequences: not least for how we understand the practices of sourcing and consuming music, the political economy of the music industries, and the relationships between format and aesthetics. Through close empirical engagement with a variety of contexts and analytical frames, the contributors to this collection demonstrate that the changes associated with networked music are always situationally specific, sometimes contentious, and often unexpected in their implications. With chapters covering topics such as the business models of streaming audio, policy and professional discourses around the changing digital music market, the creative affordances of format and circulation, and local practices of accessing and engaging with music in a range of distinct cultural contexts, the book presents an overview of the themes, topics and approaches found in current social and cultural research on the relations between music and digital technology.

Business Model Innovation Allan Afuah, 2018-10-03 Rooted in strategic management research, *Business Model Innovation* explores the concepts, tools, and techniques that enable organizations to gain and/or maintain a competitive advantage in the face of technological innovation, globalization, and an increasingly knowledge-intensive economy. Updated with all-new cases, this second edition of the must-have for those looking to grasp the fundamentals of business model innovation, explores the novel ways in which an organization can generate, deliver, and monetize benefits to customers.

The Present and Future of Music Law Ann Harrison, Tony Rigg, 2021-07-29 The music business is a multifaceted, transnational industry that operates within complex and rapidly changing political, economic, cultural and technological contexts. The mode and manner of how music is created, obtained, consumed and exploited is evolving rapidly. It is based on relationships that can be both complimentary and at times confrontational, and around roles that interact, overlap and sometimes merge, reflecting the competing and coinciding interests of creative artists and music industry professionals. It falls to music law and legal practice to provide the underpinning framework to enable these complex relationships to flourish, to provide a means to resolve disputes, and to facilitate commerce in a challenging and dynamic business environment. The Present and Future of Music Law presents thirteen case studies written by experts in their fields, examining a range of key topics at the points where music law and the post-digital music industry intersect, offering a timely exploration of the current landscape and insights into the future shape of the interface between music business and music law.
