Bradley Smith

What's Eating You? Eugene H. Kaplan, 2010-03-15 Everything you ever wanted to know about parasites but were too horrified to ask In *What's Eating You?* Eugene Kaplan recounts the true and harrowing tales of his adventures with parasites, and in the process introduces readers to the intimately interwoven lives of host and parasite. Kaplan has spent his life traveling the globe exploring oceans and jungles, and incidentally acquiring parasites in his gut. Here, he leads readers on an unforgettable journey into the bizarre yet oddly beautiful world of parasites. In a narrative that is by turns frightening, disgusting, and laugh-out-loud funny, Kaplan describes how drinking contaminated water can cause a three-foot-long worm to burst from your arm; how he gave birth to a parasite the size and thickness of a pencil while working in Israel; why you should never wave a dead snake in front of your privates; and why fleas are attracted to his wife. Kaplan tells stories about leeches feasting on soldiers in Vietnam; sea cucumbers with teeth in their anuses that seem to encourage the entry of symbiotic fish; the habits of parasites that cause dysentery, river blindness, and other horrifying diseases--and much, much more. Along the way, he explains the underlying science, including parasite evolution and host-parasite physiology. Informative, frequently lurid, and hugely entertaining, this beautifully illustrated book is a must-read for health-conscious travelers, and anyone who has ever wondered if they picked up a tapeworm from that last sushi dinner.

The Dingo Debate Bradley Smith, 2015-08-03 *The Dingo Debate* explores the intriguing and relatively unknown story of Australia's most controversial animal - the dingo. Throughout its existence, the dingo has been shaped by its interactions with human societies. With this as a central theme, the book traces the story of the dingo from its beginnings as a semi-domesticated wild dog in South-east Asia, to its current status as a wild Australian native animal under threat of extinction. It describes how dingoes made their way to Australia, their subsequent relationship with Indigenous Australians, their successful adaption to the Australian landscape and their constant battle against the agricultural industry. During these events, the dingo has demonstrated an unparalleled intelligence and adaptable nature seen in few species. The book concludes with a discussion of what the future of the dingo in Australia might look like, what we can learn from our past relationship with dingoes and how this can help to allow a peaceful co-existence. *The Dingo Debate* reveals the real dingo beneath the popular stereotypes, providing an account of the dingo's behaviour, ecology, impacts and management according to scientific and scholarly evidence rather than hearsay. This book will appeal to anyone with an interest in Australian natural

history, wild canids, and the relationship between humans and carnivores.

An Australian Outback Food Chain Rebecca Hogue Wojahn, Donald Wojahn, 2009-01-01 Describes food chains in the tundra, beginning with carnivores, such as a falcon or a polar bear, and ending with decomposers.

Good to Eat Marvin Harris, 1998-07-02 Why are human food habits so diverse? Why do Americans recoil at the thought of dog meat? Jews and Moslems, pork? Hindus, beef? Why do Asians abhor milk? In *Good to Eat*, best-selling author Marvin Harris leads readers on an informative detective adventure to solve the world's major food puzzles. He explains the diversity of the world's gastronomic customs, demonstrating that what appear at first glance to be irrational food tastes turn out really to have been shaped by practical, economic, or political necessity. In addition, his smart and spirited treatment sheds wisdom on such topics as why there has been an explosion in fast food, why history indicates that it's bad to eat people but good to kill them, and why children universally reject spinach. *Good to Eat* is more than an intellectual adventure in food for thought. It is a highly readable, scientifically accurate, and fascinating work that demystifies the causes of myriad human cultural differences.

The Dingo's Got My Baby Lindy Chamberlain-Creighton, 2012-03-10 In 1980, nine-week-old Azaria Chamberlain was taken by a dingo from her family's tent near Uluru in Australia's remote Northern Territory. Her body was never found. In a terrible miscarriage of justice, her mother Lindy was wrongfully convicted of her daughter's murder and sentenced to life in prison. It was seven years before the conviction was overturned. This is the true story behind a tragedy whose echoes reverberated around the world. This is the story of a little girl who lived, and breathed, and loved, and was loved. She was part of me. She grew within my body and when she died, part of me died, and nothing will ever alter that fact. This is her story, and mine. – Lindy Chamberlain-Creighton Page after page demolishes the myth and fables that have been spun around a nation's obsession with the baby's disappearance. – The Sydney Morning Herald What first struck me on meeting Lindy was her sense of humour and surprising lack of bitterness. Here is a woman who has been under such macabre and intense public scrutiny and yet through all the tabloid hysteria they haven't managed to capture the real Lindy at all. There are so many myths about Lindy and the Chamberlain case that have still not been dispelled and to read this book is to get closer to the truth behind the story that has continued to fascinate Australia for the past 24 years. – Miranda Otto, Actress, Lord of the Rings Trilogy Previously published as *Through My Eyes* in 2004.
