**Keeping Time** Lisa Hooper, Donald C. Force, 2014-01-01 Music libraries often contain much more than books, scores, and recordings; they are also home to a wealth of archival music materials. Despite having archival holdings, many music librarians struggle to provide adequate storage, description, and access to these materials. Remaining cognizant of the wide variety of funding and staffing available to music libraries across North America, this basic manual provides an entry point into the archival profession for music librarians without formal archival training. At the same time the manual also serves as a ready-reference book for those already familiar with basic archival practices. This manual discusses archival theory alongside archival principles and practices, explaining key concepts and developments in acquisition, appraisal, arrangement, description, preservation, digitization, and funding. These fundamentals are demonstrated throughout the manual by numerous examples and hypothetical situations a music librarian is likely to encounter while managing archival music collections.

Physical Fitness Laboratories on a Budget Terry J. Housh, Joel T. Cramer, Joseph P. Weir, Travis W. Beck, Glen O. Johnson, 2017-06-30 This lab manual is designed to benefit those colleges and universities that offer courses with lab components in physical fitness, exercise physiology, and healthy lifestyles but do not have the facilities and/or budget to allow students to train in high-tech laboratory settings. This long-overdue book-essential for sports and exercise science departments on a budget-provides meaningful lab experiences that don't require sophisticated and expensive equipment. The labs were written and designed to be self-administered or administered to others. Readers will find the book an essential resource for any career involving physical fitness and performance testing. This book's clear and concise layout makes it an ideal tool both for learning and for practical application in professional settings. The book includes 31 labs divided into eight units: Introductory labs Aerobic fitness Fatigue thresholds Muscular strength Muscular endurance Muscular power Body composition and body build Flexibility Labs include these features: Background, Terms and Abbreviations, Equipment (and pricing), Procedures, Equations, Sample Calculations, Worksheets, Tables, Extension Activities, and References. The manual also includes a table of units and conversions, a list of equipment and vendors, a Glossary, and an Index.
