Introduction to Cataloging and Classification Daniel N. Joudrey, Arlene G. Taylor, David P. Miller, 2015-09-29 A new edition of this best-selling textbook reintroduces the topic of library cataloging from a fresh, modern perspective. Not many books merit an eleventh edition, but this popular text does. Newly updated, *Introduction to Cataloging and Classification* provides an introduction to descriptive cataloging based on contemporary standards, explaining the basic tenets to readers without previous experience, as well as to those who merely want a better understanding of the process as it exists today. The text opens with the foundations of cataloging, then moves to specific details and subject matter such as Functional Requirements for Bibliographic Records (FRBR), Functional Requirements for Authority Data (FRAD), the International Cataloging Principles (ICP), and RDA. Unlike other texts, the book doesn't presume a close familiarity with the MARC bibliographic or authorities formats; ALA's Anglo-American Cataloging Rules, 2nd Edition, revised (AACR2R); or the International Standard Bibliographic Description (ISBD). Subject access to library materials is covered in sufficient depth to make the reader comfortable with the principles and practices of subject cataloging and classification. In addition, the book introduces MARC, BIBFRAME, and other approaches used to communicate and display bibliographic data. Discussions of formatting, presentation, and administrative issues complete the book; questions useful for review and study appear at the end of each chapter.

The United Nations World Water Development Report UNESCO World Water Assessment Programme, 2021-03-22 Water is a finite and non-substitutable resource. As the foundation of life, societies and economies, it carries multiple values and benefits. But unlike most other natural resources, it has proven extremely difficult to determine its true 'value'. The 2021 edition of the United Nations World Water Development Report, titled *Valuing Water* assesses the current status of and challenges to the valuation of water across different sectors and perspectives and identifies ways in which valuation can be promoted as a tool to help improve its management and achieve global sustainable development.

The Gray Rhino Michele Wucker, 2016-04-05 The #1 English-language bestseller in China--the book that is shaping

China's planning and policy for the future. A gray rhino is a highly probable, high impact yet all-too-often neglected threat: kin to both the elephant in the room and the improbable and unforeseeable black swan. Gray rhinos are not random surprises, but occur after a series of warnings and visible evidence. The bursting of the housing bubble in 2008, the devastating aftermath of Hurricane Katrina and other natural disasters, the new digital technologies that upended the media world, the fall of the Soviet Union...all were evident well in advance. Why do leaders and decision makers keep failing to address obvious dangers before they spiral out of control? Drawing on her extensive background in policy formation and crisis management, as well as in-depth interviews with leaders from around the world, Michele Wucker shows in *The Gray Rhino* how to recognize and strategically counter looming high impact threats. Filled with persuasive stories, real-world examples, and practical advice, *The Gray Rhino* is essential reading for managers, investors, planners, policy makers, and anyone who wants to understand how to profit by avoiding getting trampled.

Dark Trading Anna-Carina Salger, 2020-01-20 This timely book explores the pressing topic of dark trading. Following new EU legislation regulating financial markets (MiFID II and MiFIR), it traces the rapid development of off-market securities trading (dark trading), analyzes economic studies of this development, and positions the resulting regulatory framework of the EU over against that of the US. The study closes with proposals for reform that provide new impetus for further scientific discussion.

It includes a complete alphabetical list of all individual members in all five organizations. For each member, the CML provides an address, title, department, institution, telephone number (if available), and electronic address (if indicated), and also indicates membership in the five participating societies. In addition, the CML lists academic, institutional, and corporate members of the five participating societies providing addresses and telephone numbers of mathematical sciences departments. The CML is distributed on request to AMS members in even-numbered years. MAA members can request the CML in odd-numbered years from the MAA. Changing Society Robert L. Menz, 2009-05-16 *Changing Society: A Social and Spiritual Vision for the Year 2020 and Beyond* addresses the five traditional social institutions (marriage and family, religion, education, politics, and economics) as well as other important social institutions (health care, race, ethnicity, and technology). The editor and contributors provide keen social insights as they consider the current dynamics as well as the historical and future issues of each of these social institutions. This book is unique in that each of the writers approaches their topic from vast professional expertise and from great spiritual awareness (that is, such things as values, essence, meaning, and purpose). With the intention of focus and clarity and by projecting into the year 2020, one can appreciate how *Vision 2020* as part of the book's title captures a double entendre.
