Education Restated Elliot Regenstein, 2022-07-26 *Education Restated: Getting Policy Right on Accountability, Teacher Pay, and School Choice* offers the education policy community a roadmap for change in three hot-button policy areas. In each of these areas policy has been anchored around the wrong core values. By putting the right core values at the heart of policy, state governments can create more favorable conditions for education improvement at the local level. *Education Restated* takes a pragmatic approach to policy change, recognizing that the forces that created today's policies have not gone away—and that on complex issues there are legitimate competing interests. This book harmonizes the best ideas of opposing policy camps and identifies opportunities to strengthen connections between K-12 and early childhood. For advocates seeking common ground with historical adversaries, *Education Restated* provides some ideas on where they might find it.

Willful Defiance Mark R. Warren, 2022 The story of how Black and Brown parents, students and members of low-income communities of color organized to dismantle the school-to-prison pipeline in their local schools and built a movement that spread across the country. In *Willful Defiance*, Mark R. Warren documents how Black and Brown parents, students, and low-income communities of color organized to dismantle the school-to-prison pipeline in their local schools and built an intersectional movement that spread across the country. Examining organizing processes in Mississippi, Los Angeles, Chicago, and other localities, he shows how relatively small groups of community members built the power to win policy changes to reduce suspensions and expulsions by combining deep local organizing with resources from the national movement. As a result, over the course of twenty years, the movement to combat the school-to-prison pipeline resulted in falling suspension rates across the country and began to make gains in reducing police presence in schools, especially in places where there have been sustained organizing and advocacy efforts. In documenting the struggle organizers waged to build national alliances led by community groups and people most impacted by injustice rather than Washington-based professional advocates, Warren offers a new model for movements that operate simultaneously at local, state and national levels, while primarily oriented to support and spread local organizing. In doing so, he argues for the need to rethink national social justice movements as interconnected local struggles whose victories are lifted and spread. In the end, the book highlights lessons from the school-to-prison pipeline movement for organizers, educators, policymakers and a broader public seeking to transform deep-seated and systemic racism in public schools and the broader society.

Investigating Social Problems A. Javier Trevino, 2020-11-03 For the Third Edition of *Investigating Social Problems*, editor A. Javier Treviño, has gathered a panel of top experts to thoroughly examine all aspects of social problems, providing students with a contemporary and authoritative introduction to the field. Each chapter is written by a well-known specialist on the topic being covered. This unique, contributed format ensures that the research and examples described are the most current and relevant available. In addition, the experts use both general theoretical approaches (structural functionalism, conflict theory, symbolic interactionism) as well as specialized theories chosen to bring additional insight and analysis to their assigned topics. The text is framed around three major themes: intersectionality (the interplay of race, ethnicity, class, and gender), the global scope of many problems, and how researchers take an evidence-based approach to studying problems. This title is accompanied by a complete teaching and learning package.

Schools of Our Own Worth Kamili Hayes, 2019-12-15 Winner, 2020 American Educational Studies Association Critics' Choice Award As battles over school desegregation helped define a generation of civil rights activism in the United States, a less heralded yet equally important movement emerged in Chicago. Following World War II, an unprecedented number of African Americans looked beyond the issue of racial integration by creating their own schools. This golden age of private education gave African Americans unparalleled autonomy to avoid discriminatory public schools and to teach their children in the best ways they saw fit. In *Schools of Our Own*, Worth Kamili Hayes recounts how a diverse contingent of educators, nuns, and political activists embraced institution building as the most effective means to attain quality education. *Schools of Our Own* makes a fascinating addition to scholarly debates about education, segregation, African American history, and Chicago, still relevant in contemporary discussions about the fate of American public schooling.

Natural Allies Soo Hong, 2020-07-22 In *Natural Allies*, Soo Hong offers a paradigm shift in how we think about family engagement with schools. Hong challenges the conventional depiction of parents and teachers as “natural enemies,” and shows how, through teachers’ initiative and commitment, they can become natural allies instead. Based on a three-year ethnographic study, the book features the experiences and motivations of five urban school teachers who have successfully created meaningful, productive relationships and partnerships with students’ families. In *Natural Allies*, the teachers’ personal narratives are juxtaposed with rich descriptions of their interactions with families and children. The book explores how the dimensions of race, class, culture, and family history shape the interactions between teachers and families, particularly in schools where teacher-parent dynamics may be fraught with distrust or misunderstanding. The book demonstrates how commitment to families and community can become a central part of educators’ development as professionals. In addition, the research provides new insight and seeks to merge the study of family engagement with the field of culturally relevant and sustaining pedagogies. Offered with optimism and urgency, *Natural Allies* addresses an area in which many educators feel ill equipped and unprepared. Readers will emerge from a reading of the book with new ideas on

family engagement that are grounded in an analysis of the deep contours of the parent-teacher relationship.

How a City Learned to Improve Its Schools Anthony S. Bryk, Sharon Greenberg, Albert Bertani, Penny Sebring, Steven E. Tozer, Timothy Knowles, 2023-04-18 A comprehensive analysis of the astonishing changes that elevated the Chicago public school system from one of the worst in the nation to one of the most improved. *How a City Learned to Improve Its Schools* tells the story of the extraordinary thirty-year school reform effort that changed the landscape of public education in Chicago. Acclaimed educational researcher Anthony S. Bryk joins five coauthors directly involved in Chicago's education reform efforts, Sharon Greenberg, Albert Bertani, Penny Sebring, Steven E. Tozer, and Timothy Knowles, to illuminate the many factors that led to this transformation of the Chicago Public Schools. Beginning in 1987, Bryk and colleagues lay out the civic context for reform, outlining the systemic challenges such as segregation, institutional racism, and income and resource disparities that reformers grappled with as well as the social conflicts they faced. Next, they describe how fundamental changes occurred at every level of schooling: enhancing classroom instruction; organizing more engaged and effective local school communities; strengthening the preparation, recruitment, and support of teachers and school leaders; and sustaining an ambitious evidence-based campaign to keep the public informed on the progress of key reform initiatives and the challenges still ahead. The power of this capacity building is validated by unprecedented increases in benchmarks such as graduation rates and college matriculation. This riveting account introduces key actors within the schools, city government, and business community, and the partnerships they forged. It also reveals the surprising yet essential role of Chicago's innovative information infrastructure in aligning disparate initiatives. In making clear how elements such as advocacy, civic capacity, improvement research, and strong democracy contributed to large-scale progress in the system's 600-plus schools, the book highlights the greater lessons that the Chicago story offers for system improvement overall.

Original Sins Eve L. Ewing, 2025-02-11 NEW YORK TIMES BESTSELLER • "A fascinating and eye-opening look at how American schools have helped build and reinforce an infrastructure of racial inequality . . . a must-read for every American parent and educator."—Esquire (Most Anticipated Books of 2025) "Though the argument of this book is bleak, it illuminates a path for a more just future that is nothing short of dazzling."—Oprah Daily (Most Anticipated Books of 2025) "This book will transform the way you see this country."—Michelle Alexander, author of *The New Jim Crow* If all children could just get an education, the logic goes, they would have the same opportunities later in life. But this historical tour de force makes it clear that the opposite is true: The U.S. school system has played an instrumental role in creating and upholding racial hierarchies, preparing children to expect unequal treatment throughout their lives. In *Original Sins*, Ewing demonstrates that our schools were designed to propagate the idea of white intellectual superiority, to "civilize" Native students and to prepare Black students for menial labor. Education was not an afterthought for the Founding Fathers; it was envisioned by Thomas Jefferson as an institution that would fortify the country's racial hierarchy. Ewing argues that these dynamics persist in a

curriculum that continues to minimize the horrors of American history. The most insidious aspects of this system fall below the radar in the forms of standardized testing, academic tracking, disciplinary policies, and uneven access to resources. By demonstrating that it's in the DNA of American schools to serve as an effective and underacknowledged mechanism maintaining inequality in this country today, Ewing makes the case that we need a profound reevaluation of what schools are supposed to do, and for whom. This book will change the way people understand the place we send our children for eight hours a day.
