This Is Not My Hat Jon Klassen, 2022-11-15 “Combines spare text and art to deliver no small measure of laughs in another darkly comic haberdashery whodunit. . . . Hats off!” —Kirkus Reviews (starred review) When a tiny fish shoots into view wearing a round blue toppler (which happens to fit him perfectly), trouble could be following close behind. So it’s a good thing a certain enormous fish hasn’t woken up. And even if he does, it’s not like he’ll ever know what happened, right? Deadpan visual humor swims to the fore in this Caldecott Medal-winning title in the celebrated hat trilogy.

Chancy Louis L'Amour, 2004-03-02 He was an orphan from the hills of Tennessee and he hadn’t eaten in three days. With the front of his stomach making friends with the back, he was in no position to let an opportunity slip by unnoticed. And when Chancy defended his new herd of cattle with a shotgun, he didn’t miss. The dead man left a pistol on the ground. Chancy needed a spare and, after stowing it in his bedroll, forgot about it. He had a cattle drive to finish and a profit to make. But the gun had a history. Another killing had taken place and Chancy would never know the truth until it was too late. Now, locked in a jail cell with an angry, drunken mob outside and time running out, he must somehow find a way to prove his innocence.

Augmentative and Alternative Communication Intervention Janet L. Dodd, 2017-06-30 Augmentative and Alternative Communication Intervention: An Intensive, Immersive, Socially Based Delivery Model is ideal for school-based speech-language pathologists (SLPs) and an excellent resource for interventionists (special education teachers, ABA therapists) and

SLPs working in other settings who wish to develop an intensive, immersive Augmentative and Alternative Communication (AAC)-based intervention through a three-phase intervention process: assessment, intervention planning, and intervention implementation. Written by an SLP who has worked in a public school setting and saw to the application of theory to practice, the text provides detailed information regarding working with children who have complex communication needs and the background knowledge necessary for successful implementation of the intervention approach. Included are considerations for vocabulary selection for the beginning communicator, how to create a symbolically rich environment, detailed intervention approaches, and progress monitoring strategies that establish appropriate, measurable goals. AAC will no longer be an alternative means of communication but a best practice means of teaching communication in the SLP's or interventionist's repertoire. Making the leap from the theoretical to the practical, this essential book: Describes the intervention needs of children with complex communication needs and the limitations of current approaches (e.g., PECS, Milieu Training, Functional Communication Training). Operationally defines the goal of AAC intervention, discussing its complexities, including the limitations of a pull-out model. Introduces the Intensive, Immersive, Socially Based Approach to Intervention and briefly describes each phase of the intervention process. Discusses how AAC assessments differ from traditional assessments of speech and language skills, as well as provides an overview of different assessment models and their contribution to the intervention process. Examines the importance of training support staff to key components of this intervention model. Contains information on the application of language-based intervention strategies to AAC. Talks about the importance of progress monitoring and how to use functional communication measures and communication sampling, a new and innovative technique developed by the author, to monitor progress. Provides example lesson plans and example goals addressing each area of communicative competence. \*Disclaimer: Please note that ancillary content (such as documents, audio, and video, etc.) may not be included as published in the original print version of this book.
