Milton Santos: A Pioneer in Critical Geography from the Global South Lucas Melgaço, Carolyn Prouse, 2017-05-08

For decades, Milton Santos (1926-2001) has been considered one of the most influential thinkers in Brazilian and Latin American social sciences and geography. Yet his writings, most of which have not been translated into English, are largely unknown to European and North American audiences. This book introduces English-speaking scholars to Professor Santos through critical engagement with his ideas and writings. The chapters presented here reveal the breadth and originality of his critical thought, as well as its ongoing importance to contemporary debates. The book features a biography of Santos and includes an annotated translation of one of his most-cited texts, *The Return of the Territory*, offered here for the first time in English. This text demonstrates how Santos's provocative insights continue to transform core concepts of political and human geography. The book also includes a number of short chapters written by scholars from Brazil, Spain and France. Through reflections on Santos's work, the various authors demonstrate the value and possibilities of extending the geographer's theories. They explore key geographical themes across political economy, rural studies, territorial planning, environmental crisis, digital networks, indigenous peoples, transportation and public health. This collection invites geographers from around the world to engage with this rich intellectual tradition from Brazil.

Brazilian Geography Rubén C. Lois González, Marco Antonio Mitidiero Junior, 2022-11-28 This book presents the history and theoretical contributions of Brazilian geography since the late twentieth century and shows how this sphere of knowledge has been organically integrated with social and territorial issues and with social movements. The relationship between the subjects and objects of research in Brazilian geography has been centred on the understanding and transformation of realities marked by injustice and inequality. Against this backdrop, the geography of the country has developed by integrating, relating to, and forming part of those realities as it headed out into the streets. Brazilian geography continues to hold theoretical debate in high regard as a result of the influence of critical theory. This book thus covers the theoretical approaches in Brazilian geography, its different lines of research, and above all its character as manifested in

culture and society.

The Nature of Space Milton Santos,2021-07-21 In The Nature of Space, pioneering Afro-Brazilian geographer Milton Santos attends to globalization writ large and how local and global orders intersect in the construction of space. Santos offers a theory of human space based on relationships between time and ontology. He argues that when geographers consider the inseparability of time and space, they can then transcend fragmented realities and partial truths without trying to theorize their way around them. Based on these premises, Santos examines the role of space, which he defines as indissoluble systems of objects and systems of actions in social processes, while providing a geographic contribution to the production of a critical social theory.

Geographers Elizabeth Baigent,André Reyes Novaes,2018-11-15 Geographers: Biobibliographical Studies, Volume 37 explores the concept of distinction in geography. Through the lives of six geographers working in Brazil, North America, Europe and Réunion, it investigates what distinction consists of, how we identify and celebrate it and how it relates to quotidian practices in the discipline. The volume highlights the continuing importance of biography and the International Geographical Union in recording and assessing distinction. It also considers the relevance of personal networks for the circulation and translation of distinguished geographical knowledge, and how this knowledge can underpin applied projects and critical appraisal of geographical scholarship, both at a national and sub-national level. Gendered notions of distinction are also addressed, particularly through June Sheppard, who found limited recognition for her work as a result of gendered

expectations within the discipline and society at large. By reflecting on how we locate distinguished geographers and tell their histories, *Geographers: Biobibliographical Studies*, Volume 37 makes an important contribution to fostering less canonical work in historical geography.

Constructed Geographies Jean-Louis Cohen, Vanessa Grossman, 2024-11-05 The first major retrospective to emerge from the archive of Paulo Mendes da Rocha, shining important new light on his work One of the most acclaimed architects working in Brazil since the mid-twentieth century, Paulo Mendes da Rocha (1928-2021) began building in the 1950s, championing an approach often associated with Brutalism but expanding well beyond it. He is widely recognized for having transformed the urban imprint of São Paulo. His best-known buildings include the Brazilian Museum of Sculpture, remarkable for its engagement with the site and its daring structure; the renovation of the Pinacoteca do Estado, with audacious metallic inserts; and outstanding private houses, starting with his own. In 2006, he became the second Brazilian architect, after Oscar Niemeyer, to win the Pritzker Prize. This retrospective catalogue is the first major publication on Mendes da Rocha since the establishment of his archive at the Casa da Arquitetura in 2021. A team of international scholars provides a comprehensive view of the architect's trajectory and the collective dimension of his work, along with thematic essays. Mendes da Rocha's identity as a South American architect interested in the geographic relation between nature and culture is underlined. The book's contributors explore his concern with the social and anthropogenic impact of the continent's development, as well as its colonial past and postcolonial future. The volume centers around twelve of his most important buildings and reprints two important essays on Mendes da Rocha's work. This will be an essential book on this significant figure of global modernism and will point the way for future scholarship on Mendes da Rocha and the architecture of contemporary Brazil. Distributed for Casa da Arquitetura-Portuguese Centre for Architecture Exhibition Schedule: Casa da Arquitetura, Porto (May 26, 2023-February 25, 2024)

Geografia - Mudança Do Espaço Turístico Salvador - Bahia Leandro Carvalho De Almeida Gouveia, 2021-05-19 Nesse livro. O discurso é ver como o espaço da cidade do Salvador, mudou muito nos últimos séculos, principalmente nos séculos XX e XXI, com grandes edifícios, casas, casarões, ruas, avenidas, túneis, metro, barracas de praia, shoppings, entre outras estruturas. Veremos algumas fotos, para comprovar a mudança do (espaço, lugar, território), na terceira maior cidade do Brasil, de acordo com o IBGE em 2015 (população). Ao longo da história da Geografia, espaço geográfico foi concebido de diferentes maneiras, entretanto, não é nosso objetivo retomá-las. Tomamos como referência para nossas finalidades, o conceito expresso por Milton Santos (1997) no qual o espaço geográfico constitui um sistema de objetos e um sistema de ações que: “é formado por um conjunto indissociável, solidário e também contraditório, de sistemas de objetos e sistemas de ações, não considerados isoladamente, mas como um quadro único na qual a história se dá. No começo era a natureza selvagem, formada por objetos naturais, que ao longo da história vão sendo substituídos por objetos fabricados, objetos técnicos, mecanizados e, depois cibernéticos fazendo com que a natureza artificial tenda a funcionar como uma máquina”. Esse livro tem 89 fotos coloridas.
