Psychopathology James E Maddux, Barbara A Winstead, 2024-09-02 Psychopathology: Foundations for a Contemporary Understanding is a comprehensive textbook about the etiology and treatment of the most important psychological disorders. The chapters are written by leading experts in the field of psychopathology who provide up-to-date information on theory, research, and clinical practice. The book is unique in its strong emphasis on critical thinking about psychopathology as represented by chapters on topics such as culture, race, gender, class, clinical judgment, decision-making, and alternatives to traditional categorical approaches to understanding psychopathology. The contributors have incorporated information from the latest DSM-5-TR update, as well as information from the World Health Organization's International Classification of Diseases. This sixth edition has been updated throughout and includes the most up-to-date research on each topic. Tasman's Psychiatry Allan Tasman, Michelle B. Riba, Renato D. Alarcón, César A. Alfonso, Shigenobu Kanba, Dusica Lecic-Tosevski, David M. Ndeti, Chee H. Ng, Thomas G. Schulze, 2024-09-04 Authored by over 500 internationally acclaimed expert editors and chapter authors from around the world. Completely updated and expanded with almost 40 new chapters. Significantly increased attention to the role of culture in all aspects of evaluation and care. New sections on Digital Mental Health Services and Technologies, Treatment Issues in Specific Populations and Settings, and on Prevention, Systems of Care, and Psychosocial Aspects of Treatment address key advances. This edition is the first comprehensive reference work to cover the entire field of psychiatry in an updateable format, ensuring access to state of the art information. Earlier editions were called "the best current textbook of psychiatry" by the New England Journal of Medicine, and "the gold standard" by the American Journal of Psychiatry. Tasman's Psychiatry, 5th Edition, builds on the initial vision in prior editions of approaching psychiatric evaluation and care from an integrative bio-psycho-social-cultural perspective. It is designed to be an essential and accessible reference for readers at any level of experience. This editorial approach encompasses the importance of the first encounter between patient and clinician, followed by the complex task of beginning to develop a therapeutic relationship and to develop and implement a treatment plan in collaboration with the patient. The importance of increasing attention to the role of culture and social determinants of mental health is reflected both in specific chapters and

in components of many chapters throughout the book, especially in those pertaining to clinical evaluation, the therapeutic alliance, and treatment. The global scope of this edition is reflected throughout the book, including the section on psychiatric disorders where evaluation using both ICD 11 and DSM 5-TR is discussed. Most chapters are authored by experts from at least two different countries or continents, adding a critically important dimension which often is missing in major psychiatric textbooks. Tasman's Psychiatry, 5th Edition, is an essential reference for all medical professionals and students who need a trusted reference or learning tool for psychiatry, psychology, clinical research, social work, counseling, therapy, and all others.

Anxiety Disorders Yong-Ku Kim,2020-01-30 This book reviews all important aspects of anxiety disorders with the aim of shedding new light on these disorders through combined understanding of traditional and novel paradigms. The book is divided into five sections, the first of which reinterprets anxiety from a network science perspective, examining the altered topological properties of brain networks in anxiety disorders. The second section discusses recent advances in understanding of the neurobiology of anxiety disorders, covering, for example, gene-environmental interactions and the roles of neurotransmitter systems and the oxytocin system. A wide range of diagnostic and clinical issues in anxiety disorders are then addressed, before turning attention to contemporary treatment approaches in the context of novel bio-psychosocial-behavioral models, including bio- and neurofeedback, cognitive behavioral therapy, neurostimulation, virtual reality exposure therapy, pharmacological interventions, psychodynamic therapy, and CAM options. The final section is devoted to precision psychiatry in anxiety disorders, an increasingly important area as we move toward personalized treatment. Anxiety Disorders will be of interest for all researchers and clinicians in the field.
