Sea Salt's Hidden Powers Jacques De Langre, 1993-08-01 We never outgrow our craving - or our biological need - for salt. What compels us to consume the mineral treasure of the ocean? This book not only probes why sea salt relentlessly attracts us, it also shows us how this indispensable food, given half a chance, can maintain our mental & physical powers. From the very start, the author makes the pivotal distinction that separates true salt that supports our stamina & its modern debased, refined counterpart that endangers the human genus. Recent discoveries, confirmed by medical research & other biologists, point to the ravages caused by refining & the chemicals added to white table salt. Luckily, the book soon reveals sources of natural unrefined salts free of chemical additives. These exquisite & beneficial condiments make food more digestible, very definitely more tasty & even, in many cases, rebuild health. Natural salts are still harvested in a few secluded areas of the world, some under very modern purity standards. This ancient technology for harvesting true human quality salt is alive & well abroad. We still have untouched pristine coastlines. Doesn't it make sense to again produce our own? The right salt has always galvanized the spirit of men & women. Salaries maintained morale & courage in Caesar's Roman legions. At a time we seek the determination to regain our lead, this book shows the way.

Earth Energies Serge Kahili King, 1992-11-01 Examinations and accounts of experimentation with subtle energies. In addition to the scientifically accepted forces of electricity, magnetism, and gravity, there are, according to the author, psychoenergetic forces, those that interact with the mind as well as the body. His research deals with the energies behind extraordinary phenomena like non-physical healing, levitation, telekinesis, superstrength, and many others in which the mind is always an important factor. He touches on pyramid power, dowsing, feng shui, and the use of magnets for healing. These, and many more sources may have a single energy in common; the same way different physical elements all have electrons in common. Leave skepticism behind, and be fascinated by his examples and observations that may someday prove to be of practical value, and no more strange than bread mold being used to cure disease.

Lost and Found Jemma Macera, 2014 Jemma Macera is a poet, author, and social activist living in Ithaca, New York. Living in Ithaca provided her with ample alternative therapists and a supportive community that enabled her to find a healing path. Jemma attributes her high level of functionality to following the shaman's

journey to wellness through singing, dancing, and storytelling, as well as to the generosity of many friends and healers. Her journey to wellness is the result of trusting the superior wisdom of the body and the unconscious mind over a disabled brain. Jemma lives with her life partner Walter, in her family home, and continues to enjoy square dancing, music, and singing with friends.
