Transportation and Mobility Technology Futures Sungwon Lee,Devon Farmer,Hyun Kim,2025-10-15 Emerging technologies in the transport sector have had, and will have, profound implications for the betterment of our daily lives and economic prosperity. This book delves into modern and emerging transportation technologies, highlighting their significance as they transform how we move people and goods, offering crucial insights for navigating the future of transportation systems. It also discusses policy implications of these technologies, and touches on economic and econometric methodologies for analyzing transportation policy impacts. Emerging transport technologies, such as autonomous vehicles, ITS, and V2X, along with new trends relating to how we use transport services, will shape our daily mobility, and related industries will flourish. This book discusses the recent trends in technology development for mobility and deals with important related issues such as technology acceptance and related policies. Recognizing the importance of the topic, the book provides a comprehensive review of emerging technology developments and their prospects. It also serves as an analytical framework for assessing their impacts and discusses related issues such as people's reactions and legal frameworks that may be required. This book is written primarily for transport professionals in government or consulting, but it is also appropriate for academic use, or for anyone with an interest in transportation and cities.

A To Z Share Market (Intraday Trading) Gautam Kumar,2019-12-20 If you are new to the stock market, then you must have tried to know about the stock market from somewhere. You must have heard most of two things; first, we always should trade to stop loss and second, we should trade after identifying the trends. But have you ever heard? We should trade by looking at chart patterns! We should understand both the trend patterns and signal patterns together! We should trade after knowing the sentiment of most traders! You will never hear these things. A To Z Share Market (Intraday Trading) explains everything about the stock market in a very easy way, including: • How to trade in the stock market? • How to understand the chart? • What do traders see in the chart? Which makes them feels that stock is going to rise or fall. • Why Chart Pattern, Trend pattern, Signal pattern and open interest are considered most important in trading? • How can we learn to trade in an easy way? Many such important things are explained in this book with examples, which are very important for you to know before trading in the stock market.

Economic Challenges and Young Adults Magdalena Osińska,2025-06-17 In recent years, there has been an

unprecedented shift in the attitudes of young individuals towards the key economic issues they encounter as they embark on their adult lives. Sociologists have identified two distinct generations, namely Generation Y and Generation Z, which exhibit behaviours contrary to those of their parents and older generations. The reasons behind these shifts are shared across European countries, where these generations have experienced lives characterized by peace, cultural diversity, globalization, economic stability, relative economic and social well-being, as well as parental care and education. Addressing a gap in the economic literature, this book uniquely bridges the current understanding of youth with empirical evidence specific to Central and Eastern European Countries, represented by Poland and Czechia. Germany was taken as an example of a Western European Country. The novelty lies in identifying the contemporary trends and determinants shaping the decision-making process of young adults regarding the labour market, savings and investments, job satisfaction, retirement, and sustainable consumption. The book draws on a theoretical foundation from both economic and sociological perspectives. The book comprises ten interconnected chapters, each contributing to the central theme of youth intentions and attitudes toward economic/financial issues. The summary is presented from the perspective of contemporary megatrends. The target audience includes students and researchers in fields related to contemporary economic challenges—such as economics, psychology, and sociology. Given the challenges faced by young adults from post-socialist states, implementing the policy recommendations in the book may contribute to reducing the gap between them and their counterparts in Western European countries. Institutions involved in social policy, including both non-governmental organizations and public entities, will also find the policy implications to be of interest.

Proceedings of the International Conference on Sustainable Collaboration in Business, Technology, Information, and Innovation (SCBTII 2023) Suhal Kusairi, Forget Mingiri Kapingura, Ratih Hendayani, Nizam Ahmat, 2023-11-17 This is an open access book. Sustainable Collaboration in Business, Technology, Information and Innovation SCBTII 2023: “Preserving the Sustainability of Business in Accelerated Digital Transformation and Transition Collide” The COVID-19 pandemic had dealt a devastating blow to the SDGs, which were already off track before the pandemic forced the closure of schools, government services and workplaces worldwide. The pandemic erased more than four years of progress in eradicating poverty and pushing millions into extreme poverty. On the other hand, digital transformation rapidly creates a world of ever-faster technological developments. In response, every business must think of itself as a tech business. Companies need to re-design their processes and ensure their people have the skills needed for a world where we increasingly collaborate and work alongside capable and intelligent machines. Unfortunately, the war in Ukraine has accelerated the schism and confrontation between the major global powers. Another point of tension is the US-China relations joining the trade, technological, economic, and geostrategic competition. This year will be more significant. But the world business before us is not divided into two concrete blocks. Instead, a full-scale reconfiguration of alliances is underway, which forces all other actors to

reposition themselves about the new strategic competition dynamics and to seek out their own spaces in a global transformation. On the other hand, the green and the digital transitions, which seemed to work hand in hand towards building a more sustainable world, have collided. Against this backdrop, universities, as academic institutions, play an essential role in educating and providing professional human resources and conducting high-quality research that benefits humanity. However, universities must take a more significant part and be innovative and creative in engaging and supporting the development opportunities and consolidation of the Global community. To embark on this role effectively, universities must always foster communication and discussion among academicians, scholars, practitioners, and policymakers under the Sustainability Development Goals (SDGs). Academia, Government, Business, and Communities must increasingly cooperate to achieve academic and research excellence and constructive solutions to current business and economic issues. Sustainable Collaboration in Business, Information, and Innovation (SCBTII) 2023 is an international conference that brings together academics, professionals, entrepreneurs, researchers, learners, and other associated groups from all over the world that is interested in theories, as well as practices in the field of the digital economy for global competitiveness. This conference provides opportunities for presenters and participants to exchange new ideas and experiences, create research relationships, and find international partners for future collaboration to respond to economy, business, social and technological development challenges successfully and effectively for better life well-being.

Chinese and Global Financial Integration through Stock Connect Flora Huang, 2023-10-19 This significant and timely book explores a novel market mechanism, Stock Connect, which gives mutual market access to Chinese and international investors, and provides original analyses and fresh insights. This mechanism could become the new normal in future global financial integration. By examining this cross-border scheme from a regulatory perspective via a three-tiered analytical framework (investors, issuers and regulators), this book unearths the profound implications of Stock Connect to local and global financial markets and the legal impediments to its implementation. It covers a broad range of topics in this cross-boundary investment channel, including an overview of four existing connectivity arrangements (Shanghai-Hong Kong, Shenzhen-Hong Kong, Shanghai-London and China-Switzerland), the uniqueness of these connectivity arrangements, investor protection, regulations of connect issuers, regulatory cooperation and enforcement, the impacts on local and global financial markets, the implications for the world market connectivity as well as the challenges and future of Stock Connect. This pioneering study will appeal to a broad range of readers who are interested in the on-going reshaping of international financial systems and China's emerging influence in the international financial order.

On Power: Neurophilosophical Foundations and Policy Implications Nayef R. F. Al-Rodhan, 2022-02-08 'On Power: Neurophilosophical Foundations and Policy Implications' seeks to provide a historical, contemporary and predictive analysis of power. It aims to explain the history of political power in a unique way by approaching the concept of power through the lens of neurophilosophy - the application of neuroscientific principles to practical questions of governance, ethics, political and moral philosophy. In this book, Professor Nayef Al-Rodhan provides an accessible, incisive, and provocative take on the history, nature, and future of power. His insights go beyond conventional wisdom by exploring some of the themes that will become increasingly relevant to analysing power in the decades to come. A central idea of the book is the highly addictive universal nature of power at the neurochemical level, the craving for it, and the intense resistance to giving it up in all walks of life and circumstances. This can be applied directly to thinking about governance, political change, public policy, national and international peace, security, and prosperity. Al-Rodhan formulates an innovative conceptual picture of power by integrating the findings of neuroscience with the broader implications of power in the era of digital connectivity and cognitive and physical enhancement technologies. In doing so, he guides our approach to political power and public policy, influenced by ubiquitous, disruptive, and intrusive technologies. This book will appeal to students and scholars of neuroscience, philosophy, government, business, and international relations. It will also hold particular interest for politicians, public servants, think-tankers, policy-makers, and journalists, as well as senior executives from the corporate, sports, media and entertainment world.

Investment in Islamic Mutual Funds Manal Dhafer Al-Qahtani, M. Ishaq Bhatti, 2025-12-24 This book is an authoritative study of the various performance measures and characteristics of Islamic mutual funds (IMFs). It also enables general investors to gain knowledge about mutual fund investment particularly related to IMFs. The performance evaluations of IMFs are presented from the point of view of academics with the application of fundamental and technical analyses. It offers a balance between theory and application by providing chapters that combine clear summaries of existing research in the field with practical guidelines for the analysis of IMFs in general. The chapters cover a broad range of topics including understanding of Islamic investments, the advantages and disadvantages of IMFs, the comparison features between IMFs and CMFs, long and short-term investing, measuring fund risk and returns, and analyzing from various competitive models and finally, it provides tips for fund investment decision-making. This book delivers step-by-step, decision-making tips to stimulate the readers in the analysis and selection of various IMF fund allocations based on their characteristics. This is a comprehensive text in the field of Islamic investment for students, academicians and also general investors, alike.

Role of Health Economic Data in Policy Making and Reimbursement of New Medical Technologies Mihajlo (Michael) Jakovljevic, Tetsuji Yamada, 2017-11-23 This Research Topic was focused on provision of novel medical technologies worldwide keeping in mind financial sustainability challenge. An exemplary area certainly are oncology pharmaceuticals where prices have increased 10-fold in recent years leading to concerns on affordability. The objective of this collection of studies was to reveal some of the hidden underlying causes of unequal access to the medicines. Another core issue is the growing proportion of out-of-pocket health spending in many world regions. In line with the joint efforts of the editors and authors we received an exceptionally high response worldwide. This E-Book attracted a total of 37 self-standing research submissions out of which 32 ultimately passed external peer review and got published. Base affiliations of the authors spread across academia, pharmaceutical and medical device industry, governmental authorities and clinical medicine. Their home institutions were situated in fifteen different countries inclusive of Japan, Israel, Russia, USA, Germany, Italy, Netherlands, Austria, Spain, Malta, Serbia, Poland, Bulgaria, Hungary and Malaysia. We frankly believe that authors succeeded to cover important literature gaps referring to these world regions. We solicit global professional audience to put our efforts to the test and read this contribution to the health economics literature.
