Henriqueta Nóvoa, Monica Drăgoicea

Imagined Communities Benedict Richard O'Gorman Anderson, 1991 What makes people love and die for nations, as well as hate and kill in their name? While many studies have been written on nationalist political movements, the sense of nationality—the personal and cultural feeling of belonging to the nation—has not received proportionate attention. In this widely acclaimed work, Benedict Anderson examines the creation and global spread of the 'imagined communities' of nationality. Anderson explores the processes that created these communities: the territorialisation of religious faiths, the decline of antique kingship, the interaction between capitalism and print, the development of vernacular languages-of-state, and changing conceptions of time. He shows how an originary nationalism born in the Americas was modularly adopted by popular movements in Europe, by the imperialist powers, and by the anti-imperialist resistances in Asia and Africa. This revised edition includes two new chapters, one of which discusses the complex role of the colonialist state's mindset in the development of Third World nationalism, while the other analyses the processes by which all over the world, nations came to imagine themselves as old.

Imagined Communities: Reflections on the Origin and Spread of Nationalism (New Edition) Benedict Anderson, 2006-11-17 The definitive, bestselling book on the origins of nationalism, and the processes that have shaped it. *Imagined Communities*, Benedict Anderson's brilliant book on nationalism, forged a new field of study when it first appeared in 1983. Since then it has sold over a quarter of a million copies and is widely considered the most important book on the subject. In this greatly anticipated revised edition, Anderson updates and elaborates on the core question: what makes people live and die for nations, as well as hate and kill in their name? Anderson examines the creation and global spread of the 'imagined communities' of nationality, and explores the processes that created these communities: the territorialization of

religious faiths, the decline of antique kinship, the interaction between capitalism and print, the development of secular languages-of-state, and changing conceptions of time and space. He shows how an originary nationalism born in the Americas was adopted by popular movements in Europe, by imperialist powers, and by the movements of anti-imperialist resistance in Asia and Africa. In a new afterword, Anderson examines the extraordinary influence of *Imagined Communities*, and the book's international publication and reception, from the end of the Cold War era to the present day.

Nicaragua: The Imagining of a Nation Luciano Baracco, 2005 At the nexus of politics, sociology, development studies, nationalism studies and Latin American studies, this work takes Nicaragua as a case study to engage and advance upon on Benedict Anderson's ideas on the origins and spread of nationalism.

A Life Beyond Boundaries Benedict Anderson, 2018-08-21 An intellectual memoir by the author of the acclaimed *Imagined Communities* Born in China, Benedict Anderson spent his childhood in California and Ireland, was educated in England and finally found a home at Cornell University, where he immersed himself in the growing field of Southeast Asian studies. He was expelled from Suharto's Indonesia after revealing the military to be behind the attempted coup of 1965, an event which prompted reprisals that killed up to a million communists and their supporters. Banned from the country for thirty-five years, he continued his research in Thailand and the Philippines, producing a very fine study of the Filipino novelist and patriot José Rizal in *The Age of Globalization*. In *A Life Beyond Boundaries*, Anderson recounts a life spent open to the world. Here he reveals the joys of learning languages, the importance of fieldwork, the pleasures of translation, the influence of the New Left on global thinking, the satisfactions of teaching, and a love of world literature. He discusses the ideas and inspirations behind his best-known work, *Imagined Communities* (1983), whose complexities changed the study of nationalism. Benedict Anderson died in Java in December 2015, soon after he had finished correcting the proofs of this book. The tributes that poured in from Asia alone suggest that his work will continue to inspire and stimulate minds young and old.

Language Policy and Language Planning Sue Wright, 2016-04-08 This revised second edition is a comprehensive overview of why we speak the languages that we do. It covers language learning imposed by political and economic agendas as well as language choices entered into willingly for reasons of social mobility, economic advantage and group identity.

Key Thinkers on Space and Place Mary Gilmartin, Phil Hubbard, Rob Kitchin, Sue Roberts, 2024-05-11 Space and place are at the heart of how geographers and sociologists think. This updated edition of the essential undergraduate text will introduce you to the most influential thinkers in the tradition of social theory, with a new focus on the past fifty years. This book is designed to engage with theoretical debates in human geography through the individuals who have made the most significant contributions to this field. This will show you how ideas are shaped by contexts, and how those ideas in turn effect change. This book shows how theoretical understandings evolve, shift and change. It also highlights the connections between

different thinkers, whose ideas are developed in collaboration with or in reaction to others. Spatial thought is never developed in a vacuum, but is always constructed by individuals and groups of people located in particular institutional and social structures, with their own sets of personal and political beliefs. The biographical approach of this book reveals how individual thinkers draw on a rich legacy of ideas from past and contemporary generations. With increased coverage of international and female thinkers, as well as those who work against Eurocentric notions of space and place, this book reveals the exciting reorientation of Geography towards new ideas and methods in the last decade. Each entry contextualises its subject within on-going (inter)disciplinary debates and important political moments, as well as highlighting connections between different thinkers. Together the chapters uncover the rich and diverse evolution of social theory, equipping you with the foundational ideas of geographical thought. Each entry offers the following components: i) a short biography ii) an explanation of ideas iii) an exploration of how their ideas have been used and critiqued iv) a selective bibliography of key publications (and key publications which review or critique)

Exploring Services Science Henriqueta Nóvoa, Monica Drăgoicea, 2015-01-06 This book contains the refereed proceedings of the 6th International Conference on Exploring Service Science (IESS), held in Porto, Portugal, in February 2015. Service science constitutes an interdisciplinary approach to systematic innovation in service systems, integrating managerial, social, legal, and engineering aspects to address the theoretical and practical challenges of the service industry and its economy. Under Three Flags Benedict Richard O'Gorman Anderson, 2005 In this sparkling new work, Benedict Anderson provides a radical recasting of themes from *Imagined Communities*, his classic book on nationalism, through an exploration of fin-de-siècle politics and culture that spans the Caribbean, Imperial Europe and the South China Sea. A jewelled pomegranate packed with nitroglycerine is primed to blow away Manila's 19th-century colonial elite at the climax of *El Filibusterismo*, whose author, the great political novelist Jose Rizal, was executed in 1896 by the Spanish authorities in the Philippines at the age of 35. Anderson explores the impact of avant-garde European literature and politics on Rizal and his contemporary, the pioneering folklorist Isabelo de los Reyes, who was imprisoned in Manila after the violent uprisings of 1896 and later incarcerated, together with Catalan anarchists, in the prison fortress of Montjuich in Barcelona. On his return to the Philippines, by now under American occupation, Isabelo formed the first militant trade unions under the influence of Malatesta and Bakunin. Anderson considers the complex intellectual interactions of these young Filipinos with the new science of anthropology in Germany and Austro-Hungary, and with post-Communist experimentalists in Paris, against a

background of militant anarchism in Spain, France, Italy and the Americas, Jose Marti's armed uprising in Cuba and anti-imperialist protests in China and Japan. In doing so, he depicts the dense intertwining of anarchist internationalism and radical anti-colonialism. *Under Three Flags* is a brilliantly original work on the explosive history of national independence and global politics.

Urban Highlanders Charles W. J. Withers, 1998 This text offers a full-scale examination of the out-movement of migrant Highlanders from the Highlands to the urban Lowlands in the 18th and 19th centuries and of the migrant culture of urban Gaels within this new urban context. It follows work by the author on the historical geography of the Gaedhealtachd, the Gaelic-speaking areas of Scotland.

Indonesia and the ASEAN Free Trade Agreement Alexander C. Chandra, 2008 Indonesia and the ASEAN Free Trade Agreement analyzes the relationship between Indonesian nationalism and regional integration, with specific reference to the ASEAN Free Trade Agreement (AFTA). Alexander C. Chandra challenges prevailing arguments that nationalism and regionalism cannot coexist, and argues that the two ideologies can stand in a symbiotic relationship to each other. Chandra provides an in-depth discussion of the 1992 AFTA trade agreement, including an analysis of the attitudes of Indonesians toward the trade agreement, a political history of the formation of the agreement, and a review of the effects of the wave of democratization in 1997. Indonesia and the ASEAN Free Trade Agreement will be of interest to upper-level students and researchers of Asian studies and economics. Book jacket.
