Quotes from Believer Scientists Fernando José Walsh,2021-02-12 The main exponents of science are or have been profound believers in God, the Creator of the universe.In this work the reader will find hundreds of phrases emitted by many of them that speak of their faith convictions; and of the relationship between faith and its science.They are mostly recognized scientists who believe not only in one God, but expressly in the God of the Bible.With this book the author continues with the task begun in The Lord of the two books to revive an old, but current idea, that the Creator communicates with human beings through two books of His authorship: Nature (general revelation) and the Bible (special revelation).The Creator has given two books to the mankind. In one has shown His majesty, in another - His will ... The two books together inform us not only about the existence of God, but also about His indescribable blessings for us. It is a sin to sow among them weeds and discontent. Mikhail Lomonosov (1711-1765), father of Russian science.
