Richard N. Aslin, Jeffrey R. Alberts, Michael R. Petersen

Behavioral Regulators of Behavior in Primates Clarence Ray Carpenter, 1973 This international symposium contains 18 papers contributed by primatologists from both Japan and the United States. In them are many definitions of problems as well as techniques and methods for investigating and understanding nonhuman primate behavior.

Development of Perception Psychobiological Perspectives Richard Aslin, 2012-12-02 Development of Perception: Psychobiological Perspectives, Volume 1, Audition, Somatic Perception, and the Chemical Senses, is the first of a two-part series covering vision, audition, olfaction, taste, tactile sensitivity, and sensory-motor activity during ontogenesis. The focus is on approaches to perceptual development that incorporate a psychobiological perspective. The present volume contains both overviews and specific discussions of audition, somatic perception, and the chemical senses aimed at the anatomical, neurophysiological, and behavioral levels. The book is organized into four parts. Parts A and B are devoted to aspects of auditory perceptual development in animals and humans, respectively. These include studies on the development of species-specificity in duckling auditory perception; the functional role of auditory perception in parent-offspring recognition in birds; the development of auditory localization in human infants; and experiential components in the development of speech perception. Part C covers issues of somatosensory and sensorimotor development, including pioneering studies of development and plasticity in the neural structures of specialized somatosensory areas. Part D contains chapters on the development of olfaction and taste.

Leadership Anatomy in Motion Louisa Loran, 2025-10-21 Leadership Anatomy in Motion is a call to action for leaders ready to thrive amid uncertainty—not by having all the answers but by navigating complexity with integrity, moving with clarity, and creating conditions for others to grow. Drawing on years of leadership experience and her work advising executives, Louisa Loran offers a deeply human, sharp perspective on what leadership truly demands when priorities misalign, data overwhelms, and activity replaces impact. A blend of powerful storytelling and actionable strategies, this book is a grounded companion built on lived experience. Its real-world guidance equips you to embrace emerging technologies, harness fresh perspectives, and challenge outdated assumptions. The book explores four essential behaviors: envisioning

with ambition, expanding with curiosity, steering with decisiveness, and embodying change with grounded awareness. Louisa's stories reveal insights and tensions behind leadership and offer practical wisdom that sticks. You'll discover:

- How to balance strong strategy and personal empowerment
- How to act on emerging signals and lead in fast-moving ecosystems
- How to make collective intelligence transformational
- How to steer with discipline—while staying attuned to the human pulse of change
- How to meet change with readiness, not resistance

Leadership Anatomy in Motion shows that the advantage in business and in life isn't in seeing what's happening; it's in knowing what to make of it—and having the conviction to lead.

Current Ornithology Val Nolan Jr., Ellen D. Ketterson, 2012-12-06 As we assume the editorship of *Current Ornithology*, it seems useful to review the objectives of the series. We cannot improve on the statements of our predecessors when they began their service as editors. In his preface to Volume 1 (1983), Richard F. Johnston wrote: The appearance of the first volume of a projected series is the occasion for comment on scope, aims, and genesis of the work. The scope of *Current Ornithology* is all of the biology of birds. Ornithology, as a whole-organism science, is concerned with birds at every level of biological organization, from the molecular to the community, at least from the Jurassic to the present time, and over every scholarly discipline in which bird biology is done; to say this is merely to expand a dictionary definition of ornithology. The aim of the work, to be realized over several volumes, is to present reviews or position statements concerning the active fields of ornithological research. Dennis M. Power, who edited Volumes 6-12 (1989-1995), began his preface to Volume 6 (1989) as follows: This edited series has three principal goals. The first is to provide information in a relatively concise way for researchers needing an overview of specific disciplines. The second is to provide an update on specific schools of thought, bringing together ideas from colleagues whose works often appear in a variety of journals. And the third is to stimulate and suggest directions for new research.
