Sign Languages of the World Julie Bakken Jepsen,Goedele De Clerck,Sam Lutalo-Kiingi,William B.

McGregor,2015-10-16 Although a number of edited collections deal with either the languages of the world or the languages of particular regions or genetic families, only a few cover sign languages or even include a substantial amount of information on them. This handbook provides information on some 38 sign languages, including basic facts about each of the languages, structural aspects, history and culture of the Deaf communities, and history of research. This information will be of interest not just to general audiences, including those who are deaf, but also to linguists and students of linguistics. By providing information on sign languages in a manner accessible to a less specialist audience, this volume fills an important gap in the literature.

Concepts, Discourses, and Translations Barbara Lewandowska-Tomaszczyk,Marcin Trojszczak,2022-06-06 This present book discusses issues related to languages, cultures, and discourses by addressing a variety of topics ranging from culture and translation, cognitive and linguistic dimensions of discourse, and the role of language in political discourses and bilingualism. By focusing on multiple interconnected research subjects, the book allows us to see the intersections of language, culture, and discourse in their full diversity and to illuminate their less frequented nooks and crannies in a timely fashion.

Formal Approaches to Languages of South America Cilene Rodrigues, Andrés Saab, 2023-05-15 This book analyzes the linguistic diversity of South America based on approaches deeply rooted in the tradition of formal grammar. The chapters brought together in this contributed volume consider native languages all kinds of languages used in the region, including sign languages, indigenous languages and the romance languages (Portuguese and Spanish) originally introduced by European colonizers which underwent processes of transformation giving rise to new, local grammars. One fourth of the language families of the world are located in South America, but the majority of languages in the region are still understudied and out of the radar of theoretical linguistics mostly because their grammars are not well-known by international researchers. This book aims to fill this gap by bringing together studies rooted in the formal grammar approach first developed by Noam Chomsky, which sees language not only as mere corpora attested in oral and written production, but also as expressions of systems of thought and language production which are essential parts of human cognition. The book is divided in three parts - sign languages, romance languages and indigenous languages -, and brings together studies of the following South American languages: Brazilian Sign Language (Libras - Língua Brasileira de Sinais) Argentinian Sign Language (LSA - Lengua de Señas Argentina) Peruvian Sign Language (LSP- Lengua de Señas Peruana) Brazilian Portuguese Chilean and Argentinian Spanish Quechua Paraguayan Guarani A'ingae Macro-Jê languages Formal Approaches to the Languages of South America will be an invaluable resource both for theoretical linguists and cognitive scientists by providing access to top quality research on understudied languages and enabling these languages to be incorporated into comparative studies that can contribute to advance the knowledge of general principles governing all human languages.

Manos a la obra: lengua de señas, comunidad sorda y educación Miroslava Cruz-Aldrete, 2015-03-24 Las investigaciones que componen el presente volumen giran en torno a tres ejes principales: el estudio de las lenguas de señas, la comunidad sorda y la educación del sordo; y abordan aspectos tales como la organización cerebral de las lenguas de señas,

sus aspectos estructurales, la comunicación mediática, aspectos históricos y la situación actual y futura de la enseñanza, entre otros. Los autores nos presentan una muestra de temas que se han discutido desde hace décadas en este ámbito. Si bien provienen de diferentes disciplinas y ámbitos de estudio e investigación, así como de diferentes universidades nacionales y extranjeras, tienen en común el interés por la comunidad sorda y su lengua. Es de destacar la participación de compañeros y colaboradores sordos en estas investigaciones, va por ellos y para ellos. Participan: Héctor Chávez Rivera, Miroslava Cruz-Aldrete, Johan Cristian Cruz Cruz, Mónica Curiel, Ma. del Pilar Fernández-Viader, Ignacio Garnica-Dovala, María Ignacia Massone, Ana María Ojeda Salazar, Jordi Serrat Manén, Carlos Vera Flores, Miguel Ángel Villa-Rodríguez
