**Nutrition Through the Life Cycle** Prakash Shetty,2007-10-31 Nutrition is viewed traditionally as the specific dietary requirements of different age groups, without exploring diet in the context of a life-long contributory factor to well-being. Nutrition Through the Life Cycle summarises what is known about the relationship between diet and health at different points in the life cycle, and the nutritional requirements of individuals of different ages. Nutrition policy and health promotion are discussed, together with how dietary interventions can provide long-term benefits to individuals and populations. Also covered are the major dietary challenges that exist in modern society, including the rise in incidence of obesity in both children and adolescents, anaemia in children and adolescents, and diet-related cancers. This book is published in association with Leatherhead Food International.

*Planning the Primary National Curriculum* Keira Sewell, 2024-02-29 A complete guide for trainees and teachers To prepare to teach the Primary National Curriculum, trainee teachers need more than just the Programmes of Study. They need a resource to help them understand, plan for, teach and assess the curriculum. This is their guide to planning the Primary National Curriculum. This book explores how to plan in primary schools. It covers curriculum design and structure, challenges to learning, and how children learn. This 4th edition includes a new chapter on Adaptive Teaching. For each curriculum subject the programme of study is included, with notes to help students interpret it in practice. The text covers how the teaching of each subject can be organised, assessment opportunities, key and essential resources in each subject, and how ICT can best be used in each subject to enhance teaching. Sequenced lesson examples in all subject chapters link theory to practice and highlight progression. The final section of the book explores the many ways in which the curriculum can be delivered. It includes the creative curriculum, dialogic teaching, cross-curricular learning and more current thinking about interpreting the curriculum.
