Cannabis in nutrition Pharmacology University, 2021-11-10 Cannabis sativa is a plant that has lived very near man since ancient times, dating back to thousands of years before Christ. During this time, it has been attributed all kinds of properties: textile, ceremonial, aphrodisiac, medicinal, and even nutritional. The progressive release of restrictions on the research and consumption of cannabis derivatives in more and more countries has opened the door to exploring its multiple properties, including its effect on eating disorders and nutrition. Historical records exist which describe the intake of cannabis in various ancient civilizations. One of the most interesting ones found is from China, where its consumption, as a food, was recurrent during the post-World War II famines. Nowadays, along with the popularization of cannabis the medicinal use, there is a growing movement promoting its consumption or its derivatives as a dietary supplement, due to its beneficial effect on health and well-being in general. Cannabis is also a solid candidate to be incorporated into the culinary world, due to its organoleptic properties: the flavor, aroma, and texture that its incorporation into various recipes can provide. Do you know what nutrition is? It is necessary to answer this question before talking about the nutritional properties of cannabis and how its derivatives could positively influence daily well-being. Likewise, Do you know what is an orexigenic? Because some molecules present in the cannabis plant have properties of this type, it is for this reason that its use has been proposed as an alternative to treat eating disorders. Did you know that the cannabis leaf is rich in certain types of carbohydrates, proteins, and antioxidants? The nutritional properties of the cannabis plant are a topic that is often neglected, overshadowed by the

multiple benefits demonstrated by cannabinoids, its main molecules in the medicinal use of the same. Did you know that you can incorporate cannabis into your daily diet by combining it with products such as flour, dairy products, and oils? This is a simple way to include the benefits of cannabinoids in your daily routine, but these preparations are not so easy to make, and their misuse can result in adverse or, for some, unwanted effects. Incorporating cannabis in daily life is a possible practice that can be beneficial. Nonetheless, it is necessary to have the relevant information at hand. With this in mind, the Pharmacology University team has developed this audiobook, in which you can find the answers to the above questions and many others that you may not yet be asking yourself. You will learn about many topics with this audiobook: including basic concepts, such as nutrition, food types, origins of eating disorders, and how cannabis or its derivatives can significantly contribute to their resolution, as well as to the improvement of health in general. In short, now that you have at your disposal the necessary information, supported by scientific evidence, we invite you to explore the many ways in which you can prepare homemade recipes using cannabis, thus casually incorporating it into a daily life oriented to wellness and health.

In order to accommodate the educational needs of people globally, technology will be required that supports inclusion and promotes equity for both learning processes and governance in educational institutions. Feeding the Future María del Mar Rivas Carmona, María de los Ángeles Ruiz Romero, 2021-02-24 The agri-food sector encompasses an extremely wide range of activities regarding the entire value chain of a product and generates a huge volume of work for translators. Nevertheless, the sheer proportion has yet to be truly reflected in academic studies and research. This work intends to shed light on the vague, and barely addressed until now, delimitation of the area of activity of the multifaceted and versatile agri-food translator. Through a text typologisation of genres and subgenres, within the margins of hybridity, specialisation and register, this work approaches the characteristics of scientific-technical, medical-health, legal-administrative, humanistic-literary, tourist, advertising and gastronomic and culinary agri-food texts, and assesses the skills required from their translator.

Biogeography Mihails Gailis, 2010 Biogeography is the study of the geographic distribution of taxa and their attributes in space and time. Investigating biogeographic patterns and processes requires considerable amounts of data collected over

large spatial and/or temporal scales. Evolutionary biogeography integrates distributional, phylogenetic, molecular and paleontological data in order to discover biogeographic patterns and assess the historical changes that have shaped them, following a step-wise approach. This book aims to understand the biogeography of the Drosophilidae in Africa and in other regions. This book also examines the development of preventive and educational components of conservation biogeography. The relevance of biogeographical evolutionary analyses for conservation science is discussed as well. In addition, the general methods that can be applied to prioritise areas for protection at regional global scales are also briefly commented on and exemplified with Mexico as a case study.
