**Charles Sears**

**Science vs. Religion** Elaine Howard Ecklund, 2010-05-06 That the longstanding antagonism between science and religion is irreconcilable has been taken for granted. And in the wake of recent controversies over teaching intelligent design and the ethics of stem-cell research, the divide seems as unbridgeable as ever. In *Science vs. Religion*, Elaine Howard Ecklund investigates this unexamined assumption in the first systematic study of what scientists actually think and feel about religion. In the course of her research, Ecklund surveyed nearly 1,700 scientists and interviewed 275 of them. She finds that most of what we believe about the faith lives of elite scientists is wrong. Nearly 50 percent of them are religious. Many others are what she calls spiritual entrepreneurs, seeking creative ways to work with the tensions between science and faith outside the constraints of traditional religion. The book centers around vivid portraits of 10 representative men and women working in the natural and social sciences at top American research universities. Ecklund's respondents run the gamut from Margaret, a chemist who teaches a Sunday-school class, to Arik, a physicist who chose not to believe in God well before he decided to become a scientist. Only a small minority are actively hostile to religion. Ecklund reveals how scientists-believers and skeptics alike are struggling to engage the increasing number of religious students in their classrooms and argues that many scientists are searching for boundary pioneers to cross the picket lines separating science and religion. With broad implications for education, science funding, and the thorny ethical questions surrounding stem-cell research, cloning, and other cutting-edge scientific endeavors, *Science vs. Religion* brings a welcome dose of reality to the science and religion debates.

**International Handbook of Education for Spirituality, Care and Wellbeing** Marian de Souza,LESLIE J. FRANCIS,James O'Higgins-Norman,Daniel G. Scott,2009-10-13 Acknowledging and understanding spiritual formation is vital in contemporary education. This book explores the dynamic relationship between education and wellbeing. It examines the theory underpinning the practice of education in different societies where spirituality and care are believed to be at the heart of all educational experiences. The book recognizes that, regardless of the context or type of educational experience, education is a caring activity in which the development of the whole person - body, mind and spirit - is a central aim for teachers and educators in both formal and informal learning. The chapters in this handbook present and discuss topics that focus on spirituality as an integral part of human experience and, consequently, essential to educational programs which aim to address personal and communal identity, foster resilience, empathy and compassion, and promote meaning and connectedness.

**The Search for God** Charles Sears,2005-11 The most important question of all time is, Does God or a supreme being or entity of some kind actually exist. And if so what is our relationship to Him, Her or It? Can God be found in the church or is a personal experience necessary? Is there then, a just and beneficent God, or is He a capricious being favoring some and not others? Is there a divine plan or is everything random? Even the most ardent secularists admit that there must have been an incredible alignment of circumstances and events, enabling life as we know it to form and exist. The fantastic design and function of the human body, alone, points to an amazing creation, whether we arrived at our present state through evolution or otherwise. Are we mortal beings or spiritual, or a combination of both? And what exactly does it mean to be spiritual? Did He give us free will? What about life after death? Is there an absolute good God as millions believe or is He of our own invention, a necessary myth to give us hope and purpose, to help us through this often difficult and painful world? Is there truth to be learned or is it mainly a matter of faith? Are these questions unanswerable and the idea of God forever incomprehensible? These and other questions, thinking persons have wrestled with for centuries. Herein are selected quotations from notable persons throughout history on the subject of God, religion, spirituality, afterlife and ethics. They are

quotes from all points of view, believers, nonbelievers and agnostics. The reader may discover renewed confidence in her own beliefs or disbeliefs, or one might, as Emerson and Goethe have suggested, fashion one's own personal bible or religion, based on one's own ideas of what is true. It is my hope that through some of these quotations, uttered by thinking, questioning people throughout history, the door to the greatest mystery of all time may be opened a c

Spirituality and Business Sharda S. Nandram, Margot Esther Borden, 2009-11-11 We, Sharda and Margot, feel very honored to be able to write and edit such a book. Our spiritual journey has led to the passion of bringing together and sharing the thoughts we ourselves have come across in our lives by meeting gurus, swamis, like-minded seekers, managers, teachers, entrepreneurs, academics, students, and by reading books and practicing spiritual techniques. We also have gained much spiritual inspiration from the teachings of Sri Aurobindo and The Mother to whom we are grateful. The thoughts presented in this book already exist in the East and West. Integrating them into the way we do business, can help us to regain trust and respect in business even in the current economic crisis. We aim to convince others of our deep belief that spiritual practices and a spiritual orientation help make life more enjoyable and makes us better human beings through helping us to live in line with our karma in every context of life, in our roles as employees, entrepreneurs, managers, leaders, mothers, or fathers, etc.

**Yogalands** Paul Bramadat, 2015-04-08 Millions of people practise yoga, attracted to the mat by its promise of physical and mental benefits, social connection, and spiritual nourishment. Promoted as a way of healing the body and mind from wounds inflicted by the world, modern yoga may be a critique of the social order – an “anti-world” to which practitioners escape. Yet yoga can never free itself entirely from the compromises and contradictions of reality. In *Yogalands* Paul Bramadat wrestles with his position as a skeptical scholar who is also a devoted yoga practitioner. Drawing from his own experience, and from conversations with hundreds of yoga teachers and students in the United States and Canada, he seeks to understand what yoga means for people in the modern West. In doing so, he addresses issues that often sit beneath the surface in *yogalands*: why yoga’s religious dimensions are rarely mentioned in classes; how the relationship between yoga and trauma might be reconsidered; and how yoga seems to have survived debates around nationalism, cultural appropriation, and sexual misconduct. *Yogalands* encourages practitioners and critics to be more curious about yoga. For insiders, this can deepen their practice, and for observers, this approach is an inspiring and unsettling model for engaging with other passionate commitments.

**Science Vs. Religion** David Turell, 2004 Science vs. Religion shows that the scientific discoveries of the past 150 years prove God exists beyond a reasonable doubt. Our universe is carefully designed to allow life and human development. The universe started with a Big Bang, the beginning of space and time. There is no 'before' before the Bang, and science does not know what caused it. Darwin's Theory of Evolution appears to do away with God, but there is enormous controversy among

Darwin scientists as to how evolution works. Other scientists raise critical objections. Darwinism is not proven. Scientists don't know how life got started, because living matter, even single-celled forms, have been found to be extremely complex. This book proposes, for those who have faith in God and for those who have chosen not to accept God on faith, if they study scientific discoveries they will find overwhelming evidence of the Hand of God.

Faith in America: Personal spirituality today Charles H. Lippy,2006 Over the last 25 years, there has been much talk of the presumed decline in religious participation in America. In addition, from the 1960s on, surveys that mark the influence of religion in American life have shown a mixed response. Many suggest that religion is losing influence in the culture as a whole; others indicate that while organized religion may be experiencing challenges, spirituality is on the upswing. At the same time, however, there have been signs that religious life in the U.S. is extraordinarily healthy. But religion in America has changed, to be sure, in a number of ways. And it has changed us and our culture in return. This timely set looks at the major forces that are changing the shape of religion in American life.

Reclaiming Spirituality Diarmuid Ó Murchú,1998 In this thought-provoking and rambunctious follow-up to Quantum Theology, English priest and social psychologist Diarmuid O Murchu celebrates the spiritual renaissance of our time as an alternative to religious fanaticism and religious indifference. He sees this phenomenon as part of the evolving spiritual story of humankind stretching back 70,000 years. The spirituality that is appealing to seekers today embodies global, inclusive, co-operative, egalitarian, and feminine values. O'Murchu outlines its linkage of the new cosmology with a respect for the natural world through the spirituality of native peoples. He points out its embrace of pre-patriarchal values of relatedness, passion, feeling, imagination, and justice. Two other accents of this new paradigm are its emphasis upon the erotic power of spirituality and its reappropriation of the shadow in all its diverse dimensions. Only time will tell what new permutations this

global spirituality will take. O'Murchu has done a fine job mapping out its contemporary lineaments.
