*Corpus Linguistics for Curriculum Design* Graham Burton, 2025-11-28 *Corpus Linguistics for Curriculum Design* explores how corpora can be employed in the design of language curricula, both for English as a Foreign/Second Language and for other languages. This book provides an overview of established approaches to curriculum design and guides the reader towards an understanding of how corpora can be used to inform such processes, providing them with the skills needed to use corpora to inform the design of their own curricula. This is the first book to systematically and comprehensively set out what corpus-informed curriculum design can look like, providing in-depth coverage of both General English and English for Specific Purposes. It considers a number of different language areas such as grammar, vocabulary and pragmatics, showing how both item selection and ordering within a curriculum can be informed by corpora. This accessible guide is essential reading for students and researchers in Teaching English to Speakers of Other Languages (TESOL), Applied Linguistics, English Language Teaching (ELT), materials design as well as language teachers and curriculum designers.

Dictionaries are used at home and at school, cited in law courts, sermons and parliament, and referred to by crossword addicts and Scrabble players alike. Lexicography provides a detailed overview of the history, types and content of these essential references. Howard Jackson analyzes a wide range of dictionaries, from those for native speakers to thematic dictionaries and those on CD-ROM, to reveal the ways in which dictionaries fulfil their dual function of describing the vocabulary of English and providing a useful and accessible reference resource. Beginning with an introduction to the terms used in lexicology to describe words and vocabulary, and offering summaries and suggestions for further reading, *Lexicography: An Introduction* is highly student-friendly. It is ideal for anyone with an interest in the development and use of dictionaries.
