Genocide, Mass Atrocity, and War Crimes in Modern History James Larry Taulbee, 2017-02-06 Defining genocide as an international crime, this two-volume set provides a comparative study of historical cases of genocide and mass atrocity—clearly identifying the factors that produced the attitudes and behaviors that led to them—discusses the reasons for rules in war, and examines how the five principles laid out in the Geneva Conventions and other international agreements have functioned in modern warfare. Written by an expert on international politics and law, *Genocide, Mass Atrocity, and War Crimes in Modern History: Blood and Conscience* is an easy-to-understand resource that explains why genocides and other atrocities occur, why humanity saw the need to create rules that apply during war, and how culture, rules about war, and the nature of war intersect. The first volume addresses the history and development of the normative regime(s) that define genocide and mass atrocity. Through a comparative study of historical cases that pay particular attention to the factors involved in producing the attitudes and behaviors that led to the incidents of mass slaughter and mistreatment, the author identifies the reasons that genocides and mass atrocities in the 20th century were largely ignored until the early 1990s and why even starting then, responses were inconsistent. The second book discusses why rules in war exist, which factors may lead to the adoption of rules, what defines a war crime, and how the five fundamental principles laid out in the Geneva Conventions and other international agreements have actually functioned in modern warfare. It also poses—and answers—the interesting question of why we should obey rules when our opponents do not. The final chapter examines what actions could serve to identify future situations in which mass atrocities may occur and identifies the problems of timely humanitarian intervention in international affairs.

Capital Punishment and Latino Offenders Martin Guevara Urbina, 2003 Annotation This study analyzes death sentence outcomes data for Latinos in California, Florida, and Texas, and explores the effects of legal variables, race, and ethnicity in death sentencing. A review of historical relationships between African Americans, Caucasians, Cubans, and Mexicans is provided to shed light on how racial and ethnic minorities are more likely to experience discrimination, and a theoretical typology for understanding race and ethnic differences in sentencing is presented. Author information is not given. Annotation 2004 Book News, Inc., Portland, OR (booknews.com).

Electronically Monitored Punishment Mike Nellis, Kristel Beyens, Dan Kaminski, 2013-05-07 Electronic monitoring

(EM) is a way of supervising offenders in the community whilst they are on bail, serving a community sentence or after release from prison. Various technologies can be used, including voice verification, GPS satellite tracking and - most commonly - the use of radio frequency to monitor house arrest. It originated in the USA in the 1980s and has spread to over 30 countries since then. This book explores the development of EM in a number of countries to give some indication of the diverse ways it has been utilized and of the complex politics which surrounds its use. A techno-utopian impulse underpins the origins of EM and has remained latent in its subsequent development elsewhere in the world, despite recognition that it is less capable of effecting penal transformations than its champions have hoped. This book devotes substantive chapters to the issues of privatisation, evaluation, offender perspectives and ethics. Whilst normatively more committed to the Swedish model, the book acknowledges that this may not represent the future of EM, whose untrammelled, commercially-driven development could have very alarming consequences for criminal justice. Both utopian and dystopian hopes have been invested in EM, but research on its impact is ambivalent and fragmented, and EM remains undertheorised, empirically and ethically. This book seeks to redress this by providing academics, policy audiences and practitioners with the intellectual resources to understand and address the challenges which EM poses.

Controversies in Juvenile Justice and Delinquency Peter J. Benekos, Alida V. Merlo, 2014-10-10 After providing a history of the development of the juvenile court, this book explores some of the most important current controversies in juvenile justice. Original essays review major theories of juvenile delinquency, explore psychological and biological factors that may explain delinquent behavior, and examine the nexus between substance abuse and delinquency. A final chapter provides a comparative analysis.

Developments in Counter-Terrorist Measures and Uses of Technology Helen Fenwick, 2013-09-13 This book considers some of the most notable aspects of the legal response to the war on terror post- 9/11 and the use of technology to support them. It examines the shift from a criminal justice response to the creation of a parallel preventive system running in tandem with it. This system has tended to veer away from the commission of criminal offences or adherence to ordinary criminal justice safeguards. Such a preventive strategy relies on targeting terrorist suspects - those who it is thought may in future commit terrorist acts - and curbing their actions with the aim of preventing terrorist activity before it occurs. The book further considers the role that surveillance plays in the counter-terrorist efforts of state or non-state actors. It also evaluates the counter-productive effects that many of these measures have had. This book was originally published as a special issue of *International Review of Law Computers & Technology*.

China's Political System June Teufel Dreyer, 2008 China's Political System examines how the government of China is affected by ongoing efforts to harmonize its unique culture with external influences and ideas. Highly respected area specialist June Teufel Dreyer offers expert analysis of the historical context and current trends to show how this transition is

challenging China's economic, legal, military, social, and cultural institutions. Throughout the text, Dreyer challenges students to think about the broader problem of governance in China by comprehensively showing how past and present impact leaders, citizens, ethnic minorities, and policies and by incisively considering the different futures for China's political system.

Mobile Payments, Consumer Policy, and the Law Nwanneka Ezechukwu, 2023-03-17 Mobile technology offers an innovative and cost-effective channel for delivering a range of financial services, including mobile payments. In some jurisdictions, mobile payments simply provide a convenient option for facilitating payment transactions. In other jurisdictions, mobile payments are viewed as potentially transformative because they present an opportunity to expand access to financial services. However, as with other innovations, mobile payments raise consumer protection concerns and require robust regulatory mechanisms to address such concerns. Against this backdrop, the book adopts a typology of consumer policy tools which can be used to address the identified consumer concerns. This typology guides the enquiry into the existing consumer protection frameworks applying to mobile payments in selected jurisdictions (Canada, Kenya, and the United Kingdom). The main objective of this endeavour is to identify best practices that national authorities seeking to leverage mobile payments and similar innovations can emulate. This book will be of interest to policymakers, regulators, industry stakeholders, students, and scholars interested in the regulation of innovative financial services, particularly from a consumer protection perspective.

Drug Wars and Coffeehouses David R. Mares, 2006 An international policy issue awash in myths, moral inconsistencies, social prejudices, and political rhetoric, it's no wonder students find the international drug trade an alluring topic to study and discuss. With his brief and engaging new book, David Mares explores the reasons why there is so much disagreement among nations about which policies are most appropriate to address drug production, distribution, and trade. From the more tolerant "coffee house" style policies of the Netherlands which focus on public health concerns, to the United States' just-say-no "drug war" approach, nations frame and seek to resolve these issues in very different ways and with different levels of success. This variation creates a host of global cooperation and policy coordination problems, making *Drug Wars and Coffee Houses* an ideal supplement for giving students an opportunity to apply the larger themes of any political economy course to a substantive policy area. A compelling framework—focusing on political economic ideas and analysis—shows students how leaders and policymakers need to understand the drug trade as a full-blown commodity system if they are to impact its different segments. As he discusses drug production, consumption, distribution, and money laundering, Mares carefully shows what insights micro political economic, realist, constructivist, and social deviant

perspectives each bring to bear on the problem. And, through the book's use of extended case studies, this text offers students an inside look at a complex and fascinating policy area, from Sweden's attempts to enforce drug-war style policies, to the UK's movement towards decriminalization, to the responses of such international organizations as the United Nations and the European Union. A comprehensive bibliography of websites, articles, and book length studies point to further research on the topic, while class-tested research and study questions for each chapter will jumpstart class discussions and projects.

Crime and Punishment Fyodor Dostoyevsky,2017 Crime and Punishment is the story of a murder committed on principle, of a killer who wishes to set himself outside and above society. It is marked by Dostoevsky's own harrowing experience, and yet there are moments of wild humour. This authoritative translation comes with a challenging new introduction and helpful annotation.

Race in Society Margaret L. Andersen,2021-03-12 Comprehensive yet concise, Margaret Andersen's Race in Society, Second Edition is a topical introduction to race and ethnicity organized around four key questions: What does the idea of race mean and where does it come from? What are the consequences of the social construction of race? How is racial inequality structured into social institutions? What are different policies and approaches for change toward racial justice? In her accessible, student-friendly style, Andersen introduces readers to the current scholarship on race, including recent studies conducted during the COVID-19 pandemic and the protests following the murder of George Floyd. New to this edition: New coverage of the effects of COVID-19 included throughout the book, including its impact on anti-Asian racism, violent crime, racial disparities in health care, and people of color in low wage service jobsExpanded discussion of immigration, including US politics about immigration and national borders displays the connection between immigration and racializationUpdated discussion of policing, police violence, and both historical and contemporary acts of vigilante "justice" against people of colorUpdated information on residential and educational segregation including new material on the racial achievement gap and the effects of school closures during the COVID-19 pandemic

Introduction to Early Childhood Education Marian Marion,2010 Armed with the mantra knowledge before action, this introduction to early childhood education allows teachers to first understand the development of the whole child and then to plan an environment and curriculum that will allow them to learn and thrive. Using a largely developmental approach, this first edition text explores both time-honored theories of early childhood development and current models and modern

research in the field. Part One of the text discusses the history and theories of childhood development, while Part Two instructs teachers how to support children's emotional, social, cognitive, and physical development. The final section of the book explains how to assessment and guidance to support children and how to implement developmentally appropriate curriculum in the classroom. This text is supplemented with a number of features and ancillaries that make learning easier for students and teaching easier for instructors. Students will benefit from the many boxed activities and aides as well as by the online features contained in MyEducationLab. Teachers may take advantage of the online instructors' guide, online test back, numerous videos, and PowerPoint slides.

World of Work Report 2008 Raymond Torres,2008 In the majority of countries, the incomes of rich people have grown faster than is the case for their poorer counterparts. To what extent is this a problem for society and the economy? What are the factors behind observed trends and what can policy makers do to address excessive income inequality? This report looks at these issues comprehensively and provides answers to some of the key questions of today's international debate.--BOOK JACKET.

Agency Theory Alexander Stremitzer,2005 Designing a contract is often more of an economic than a legal problem. A good contract protects parties against opportunistic behavior while providing motivation to cooperate. This is where economics and, especially contract theory, may prove helpful by enhancing our understanding of incentive issues. The purpose of this book is to provide specific tools which will help to write better contracts in real world environments. Concentrating on moral hazard literature, this book derives a tentative checklist for drafting contracts. As an economic contribution to a field traditionally considered an art rather than a science, this treatment also gives much attention to methodological issues.

Sources of International Criminal Law Pawel Aleksander Kupis,2015-01-27 Academic Paper from the year 2012 in the subject Law - European and International Law, Intellectual Properties, grade: A, University of Wroclaw, language: English, abstract: The sources if international criminal law are diverse, frequently not immediately obvious, and complicated by a number of different factors. This makes the mission of identifying and applying international criminal law particularly difficult, needing a lot of effort and energy. Thus, it is important to identify the sources of international criminal law in order to determine what weight should actually be attached to international treaties, international custom, documents, materials and judicial decisions, which are commonly referred to in the context of individual criminal responsibility in international law.
