Multidisciplinary Applications of Computer-Mediated Communication Bui, Hung Phu,Kumar, Raghvendra,2023-04-03 Computer-mediated communication (CMC) refers to human communication mediated by electronic devices. CMC can be broken down into two forms: synchronous and asynchronous. Synchronous CMC provides opportunities for direct communication between involved parties. In contrast, asynchronous CMC refers to communication that takes place when the message sender does not receive an immediate response from the recipient. Further study is required to fully understand the uses and applications of this communication. Multidisciplinary Applications of Computer-Mediated Communication considers the future use of CMC and recent applications of CMC in different contexts in the world with implications for further development. Covering key topics such as learning environments, business communication, and social media, this reference work is ideal for industry professionals, researchers, scholars, academicians, practitioners, instructors, and students.

Corpus Linguistics for Grammar Christian Jones,Daniel Waller,2015-04-24 Corpus Linguistics for Grammar provides an accessible and practical introduction to the use of corpus linguistics to analyse grammar, demonstrating the wider application of corpus data and providing readers with all the skills and information they need to carry out their own corpus-based research. This book: explores the kinds of corpora available and the tools which can be used to analyse them; looks at specific ways in which features of grammar can be explored using a corpus through analysis of areas such as frequency and

colligation; contains exercises, worked examples and suggestions for further practice with each chapter; provides three illustrative examples of potential research projects in the areas of English Literature, TESOL and English Language. Corpus Linguistics for Grammar is essential reading for students undertaking corpus-based research into grammar, or studying within the areas of English Language, Literature, Applied Linguistics and TESOL.

Vocabulary Increase and Collocation Learning Haiyan Men, 2017-09-04 This book highlights research that expands on our knowledge of second- language collocation acquisition. It presents original findings based on the largest collocation database to date, encompassing over 8,000 collocations: verb + noun, adjective + noun, and noun + noun. These collocations, collected from a one-million-learner corpus, were not confined to English as a foreign language (EFL) learners at a particular proficiency level, but also included learners at three levels. As such, the book provides a panoramic view regarding L2 collocation acquisition, not only in terms of learners' acquisition of different types of collocations, but in terms of the developmental patterns in L2 collocation learning. One major discovery is that there is a collocation lag as learners' proficiency levels rise, which is associated with vocabulary increase, in particular semantic domains—a remarkable insight for second-language acquisition researchers, English teachers and EFL learners alike. The findings reported shed new light on how collocations are acquired by EFL learners, offering guidance on how they can best be taught. In closing, the book discusses pedagogical aspects that arise from considering how learners can be helped with collocation learning.

First Language Influences on Multilingual Lexicons Paul Booth, Jon Clenton, 2020-02-26 This collection brings together recent research on the influences between first and additional languages with a focus on the development of multilingual lexicons. Featuring work from an international group of scholars, the volume examines the complex dynamics underpinning vocabulary in second and third languages and the role first languages play within this process. The book is organized around three different facets of research in this area - lexical recognition, processing, and knowledge; the effects of first languages on second language reading and writing, collocations, and translation skills; and, vocabulary testing - drawing on examples from a variety of languages, including European languages, Arabic, and Japanese. Setting the stage for further research on the interplay between first languages and multilingual lexicons, this volume is key reading for students and researchers in applied linguistics, language learning and teaching, bilingualism, second language acquisition, and translation studies.

Analysing English-Arabic Machine Translation Zakarya Almahasees, 2021-11-29 Machine Translation (MT) has become widely used throughout the world as a medium of communication between those who live in different countries and speak different languages. However, translation between distant languages constitutes a challenge for machines. Therefore, translation evaluation is poised to play a significant role in the process of designing and developing effective MT systems. This book evaluates three prominent MT systems, including Google Translate, Microsoft Translator, and Sakhr, each of which provides translation between English and Arabic. In the book Almahasees scrutinizes the capacity of the three systems in dealing with translation between English and Arabic in a large corpus taken from various domains, including the United Nation (UN), the World Health Organization (WHO), the Arab League, Petra News Agency reports, and two literary texts: *The Old Man and the Sea* and *The Prophet*. The evaluation covers holistic analysis to assess the output of the three systems in terms of Translation Automation User Society (TAUS) adequacy and fluency scales. The text also looks at error analysis to evaluate the systems' output in terms of orthography, lexis, grammar, and semantics at the entire-text level and in terms of lexis, grammar, and semantics at the collocation level. The research findings contained within this volume provide important feedback about the capabilities of the three MT systems with respect to English-Arabic translation and paves the way for further research on such an important topic. This book will be of interest to scholars and students of translation studies and translation technology.

The Idiom Principle and L1 Influence Ying Wang, 2016-10-06 This book examines delexical verb + noun collocations such as *make a decision*, *give rise to* and *take care of* in Swedish and Chinese learner English. Using a methodological framework that combines learner corpus research with a contrastive perspective, the study is one of the very few in the field to incorporate corpora of the learner's L1 to investigate the effects of L1 influence. The book provides a highly detailed and multi-faceted analysis of delexical verb + noun collocations in terms of frequency of occurrence, lexical preferences and morphosyntactic patterns. Quantitative and qualitative results on overuse, underuse and errors are presented with linguistically and pedagogically relevant interpretations that include cultural and discourse aspects. More importantly, the book throws light on how L2 learners may alternate between the open-choice principle and the idiom principle as well as the

extent and nature of L1 influence on their collocational use.
