GCSE English Language for AQA Progress Student Book Clare Constant,Imelda Pilgrim,Bernard Ward,2015-06-04

Specifically written for the AQA GCSE English language specification for first teaching from 2015, this student book is designed for students to progress to grade 5, with extension activities to facilitate achievement beyond this. With progress at its heart, this differentiated resource covers a range of 19th-, 20th-, and 21st-century texts and has spelling, punctuation, and grammar support integrated throughout.

Language Power: 100 Things You Need to Know to Make Language Work for You Norbert Schmitt,2023-09-30 From the minute you wake up until the time you fall asleep, you use language. This book will show you how language functions, and how to make it work better for you. Norbert Schmitt, an internationally known language specialist, explains 100 ways that you can use language more effectively in your everyday life. The book covers a wide range of real-world language topics, including the following and much more: • The differences between men's and women's language • How to use language more effectively in your business and personal life • Understanding how politicians and the news spin language • How your children's language should develop, and what to do if there are problems • Helping your children learn how to read • How language can go wrong after a stroke, or as we grow older Schmitt covers each language topic in a clear and easy-to-understand manner which assumes no previous knowledge. Each topic is introduced by a question you might be wondering about (What kinds of language tricks do salespeople use to get me to buy things?). The reader-friendly answers are given in short but informative descriptions, with a quick summary at the end. Many sections have brief quizzes or tasks to check how much you know about language and how well you are using it. Each topic also has suggestions for interesting Internet websites to check for more information. Language is fascinating, and this book shows you some of its details that only experts had access to before.

Psychosis Under Discussion Michael Farrell,2017-11-10 Psychosis Under Discussion: How We Talk About Madness examines the ways in which psychosis is discussed by considering the relationship between language and the perception of mental disorder. A wide range of perspectives is discussed - including historical terms, personal accounts, psychiatric

terminology, psychoanalysis and later theoretical analyses, advocacy, anti-psychiatry, slang and humour, and media coverage – and each way of discussing psychosis is revealing. For example, psychiatric terminology and related research, in its efforts to understand and clarify can seem distancing, dispassionate, and too sure of its ground, whereas the language of advocacy, while being supportive and sensitive, can also seem euphemistic and evasive. In the discourse of mental disorder, both the content of views and the manner in which they are expressed are influential, making it important to take into account both. Psychosis Under Discussion puts these and other important issues under the microscope. International in range, the book's analysis draws on psychiatry, psychology, philosophy, linguistics and history. Written in Michael Farrell's well-known clear and direct style, the book is essential reading for all those interested in understanding mental disorder and the role of language.

Critical Thinking, Thoughtful Writing John Chaffee, Christine McMahon, Barbara Stout, 2005 Written by leading educators in interdisciplinary critical thinking, this popular rhetoric with readings makes a direct link between learning to write and read effectively and developing critical-thinking skills. Each chapter focuses on a particular critical-thinking skill, such as problem solving or analyzing complex issues, which is practiced and explored through Thinking-Writing Activities and thematically linked readings. Students further develop these skills through carefully sequenced pedagogy that promotes writing and a cross-disciplinary approach that asks them to critically evaluate a variety of readings.

Thinking Critically John Chaffee, 2005 Thinking Critically, 8/e, teaches the fundamental thinking, reasoning, reading, and writing abilities that students need for academic success. The text begins with basic skills related to personal experience and then carefully progresses to the more sophisticated reasoning skills required for abstract, academic contexts. Thinking Critically introduces students to the cognitive process while teaching them to develop their higher-order thinking and language abilities. A number of distinctive characteristics make the text an effective tool for both instructors and students. Exercises, discussion topics, and writing assignments encourage active participation, stimulating students to critically examine their own and others' thinking.
