Multiple Choice Claire Cook, 2016-06-29 A More Magazine Don't Miss pick by the New York Times bestselling author of *Must Love Dogs*. Her quirky voice and sense of humor are as strong as ever.—The Orlando Sentinel March Monroe and her daughter Olivia are going to college. March knows that Olivia is going, naturally, since she and her husband have just made their first exorbitant tuition payment. But Olivia doesn't exactly know the arrangement . . . yet. Imagine Olivia's surprise when one day she shows up for training at a local radio station and finds out that one of the other interns is . . . her mother. very funny...with plenty of giggles.—The Hartford Courant "Cook has a gift for telling an entertaining and funny story that is light enough for a beach read, yet weighty enough to get under your skin and into your heart. Her characters are quirky and inconsistent, good-hearted folks who make mistakes and have regrets, but none of the damage is lasting. Love and forgiveness beat out hate and revenge." —Patriot Ledger "Cook's ability to make families foibles ring true -- and funny -- ensures a delightful read."—Library Journal "Claire Cook infuses her novels with that sassy kind of off-beat humor that makes you giggle, shake your head, and then keep reading. And isn't that what you want a beach book to do?" —Florida Today "Cook's characters are delightful and quirky, and the storyline is fast paced and lively with just the right touch of humor and romance." —Fresh Fiction "Nobody does the easy-breezy beach read with a lighter hand than Claire Cook." —Hartford Courant

EMDR and The Art of Psychotherapy With Children Carolyn Settle, Robbie Adler-Tapia, 2008-06-16 ...[This book contains] invaluable material for the child therapist with varied theoretical backgrounds to more confidently apply EMDR to children. -- Frances Klaff, for Journal of EMDR Practice and Research, Volume 3, Number 3, 2009 In this book the authors present an overview of how therapists can get started in conceptualizing psychotherapy with Eye Movement Desensitization and Reprocessing (EMDR) methodology through Adaptive Information Processing (AIP) theory. The focus of the book is to teach therapists to effectively use the entire EMDR protocol with young children. The first chapter provides a comprehensive overview of how to get started with EMDR after completing basic training. The book continues with chapters that detail the basic skills in using EMDR with children and then transitions to more advanced skills in using EMDR with children with specific diagnosis and presenting issues. They follow with a chapter summarizing the published evidence to date supporting the practice of EMDR with children. Data is then incorporated into a chapter summarizing their research on EMDR with young children in order to provide evidence of therapists' ability to adhere to the EMDR protocol with children, and to

document their research findings about training therapists to use EMDR with children. Finally, they conclude the book with goals for the future of EMDR with children while encouraging therapists to consider conducting research in order to compel the practice of EMDR with children into the mainstream of child psychotherapy. It is a major task of the book to inspire therapists to begin thinking about conducting research and how important research is to therapists in order to validate and advance the practice of psychotherapy. In the end, the most significant goal of this book is to provide best practice for children who are in need of expert psychotherapy in order to change the trajectory of their lives. The hope is to provide guidance and support to therapists in order to launch them in their practice of EMDR. This is the art of treating children with EMDR.

Ida Applebroog Ida Applebroog, 2002 Did you know that Ida Applebroog has been monitoring your home for the last 25 years? Whilst you were at it, thinking no decent citizen would peer in through lowered curtains at your version of domestic bliss, Applebroog was freeze-framing your scenes for posterity (yours, not hers). Show and tell seems to be the driving element behind her late-blooming career; variously labeled as a social voyeurist and a commentator, she is most aptly described as a willing witness of the way things work in that mini-theater of cruelty called life. Though her work is featured in the permanent collections of major international institutions, Applebroog's work has not received the public attention it deserves, a situation which this monograph means to remedy.

The American South is a diverse region with its own vocabulary, peculiarities, and complexities. Tennessee whiskey may technically be bourbon, but don't let anyone in Kentucky hear you call it that. And while boiling blue crabs may be the norm across the Lowcountry in South Carolina and Georgia, try that in front of Marylanders and they're likely to put you in the pot. Now, from the editors of Garden & Gun comes this illustrated encyclopedia covering age-old traditions and current culture. *S Is for Southern* contains nearly five hundred entries spanning every letter of the alphabet, with essays from notable Southern writers including: Roy Blount, Jr., on humidity Frances Mayes on the magnolia Jessica B. Harris on field peas Rick Bragg on Harper Lee Jon Meacham on the Civil War Allison Glock on Dolly Parton Randall Kenan on Edna Lewis The Lee Brothers on boiled peanuts Jonathan Miles on Larry Brown Julia Reed on the Delta

We are Knights on the Trajectories of a Post-everything Era Elodie Pong,2007 How do we know and understand who we really are as human beings? The concept of 'the self' is central to many strands of psychology and philosophy. This book tackles the problem of how to define persons and selves and discusses the ways in which different disciplines, such as biology, sociology and philosophy, have dealt with this topic. Richard S. Hallam examines the notion that the idea of the self as some sort of entity is a human construction and, in effect, a virtual reality. At the same time, this virtual self is intimately related to the reality of ourselves as biological organisms. Aiming to integrate a constructionist understanding of self with the universalizing assumptions that are needed in natural-science approaches, this text is unique in its attempt to create a dialogue across academic disciplines, while retaining a consistent perspective on the problem of relating nature to culture.
