The Housing Design Handbook David Levitt, 2012-12-06 How well have architects succeeded in building housing and what lessons can be learned from their triumphs and failures? The Housing Design Handbook will give you a complete understanding of what makes successful housing design. Through the analysis of work by Levitt Bernstein and a wide range of other UK practices, it illustrates good design principles and accumulates a wealth of knowledge in a readily accessible format for the first time. Written by a recognised authority in the field, the book provides: a range of cases to illustrate the way that different issues in the design of housing have been approached and with what degree of success a review of the place of housing as the most significant built form in the urban landscape an understanding of the importance of achieving a sense of place as the bedrock of social continuity a discussion of how flexibility might be achieved in order to accommodate future changes in housing need, if wholesale demolition and replacement is to be avoided more recent examples which explore why certain social groupings are more resistant to design innovation than others and why there has been such an

architectural breakthrough in market led, higher density urban living. David Levitt examines the ideas behind the schemes and assesses how successful and sustainable those ideas have proved, making this an essential reference for professionals and students practicing and studying the design and commissioning of housing.

The Psychology of Health and Illness Leslie D. Frazier, 2025-06-30 The Psychology of Health and Illness is a thoroughly updated version of Leslie Frazier's previous textbook on health psychology, which provides an engaging and contemporary approach to understanding health psychology from a truly international perspective. Combining both biopsychosocial and lifespan developmental perspectives, the book integrates core theory, research, and practice on global and cross-cultural health issues. It includes thoughtful and deliberately inclusive coverage of marginalized groups, especially BIPOC, LGBTQ+, and other underrepresented groups, designed to raise diversity and racial consciousness in a globally integrative way. Alongside classic health psychology concepts, the author introduces students to cutting-edge scientific and medical topics such as epigenetics, the gut microbiome, and the nonmedical use of prescription drugs. The book also focuses on global public health and health disparities and promotes a strengths-based approach to health, rather than a deficits-based approach. It includes a wide range of pedagogical features including real-world applications, engaging anecdotes and case studies, opportunities for self-reflection, and numerous text boxes. This is essential reading for undergraduate students on Health Psychology courses as well as those in related fields such as nursing and the allied health professions.

Transitions to Adulthood Through Recession Sarah Irwin, Ann Nilsen, 2018-04-19 Long-running trends towards increasing inequality between the rich and poor across Europe have been exacerbated by the 2008 global financial crisis and its aftermath. As employment opportunities for young people diminish and as the welfare state is pulled back, pathways to adulthood change and become more difficult to navigate. *Transitions to Adulthood Through Recession* consists of a collection of papers by researchers from Britain, Norway, Germany, Portugal, Italy and Greece, locating young people's transitions to adulthood in their national social, economic and political contexts. It explores young adulthood with reference to generational continuity and change and intergenerational support. With a cross-national comparative framework, this volume highlights the importance of variations in structural contexts for young people's transitions. Bringing together authors across sub-disciplines such as the sociology of youth, family and kinship, class and inequality and life-course studies, *Transitions to Adulthood Through Recession* will appeal to academic social scientists as well as final-year undergraduate and postgraduate students interested in fields such as political science, sociology, youth studies, social policy, anthropology and psychology; and a wider public readership.
