*Online Brand Communities* Francisco J. Martínez-López, Rafael Anaya, Rocio Aguilar, Sebastián Molinillo, 2015-12-11 This book presents and analyzes the concept of online brand communities, an emerging and exciting topic in marketing and eCommerce. First, it lays out the foundations like the evolution of the Web and the so-called Social Web, its utility for users and businesses, and the evolution of the marketing mind-set to adapt the Social Web. On this basis, the book then presents a detailed analysis of online brand communities, examining the concept of virtual community with a specific focus on virtual brand communities. In this context the book also explores recent trends related to branding and brand management. Next, it proposes a classification system for online brand communities, taking into account questions like the motivating factors for consumers to join, participate and stay in a community. The process of value creation in communities is examined from both business and consumer perspectives. The book draws to a close with a brief presentation of the process broadly accepted for the successful development of online brand communities.

**Gravity Flow Water Supply** Santiago Arnalich, 2010-10 Tackling a Gravity Flow Water Project for the first time? This book is intended to get you on your feet quickly. You'll learn how to select pipe sizes, work out the demand you need to meet, interpret topographic surveys and perform economic calculations to compare different alternatives. Besides producing a sound design, it will help you to get to grips with the materials, put in orders, supervise the building work, and most of what you will need in your quest for access to safe water.

**Europe and the Mediterranean Economy** Joan Costa-Font, 2012-07-26 With the creation of the Mediterranean partnership and the recent move towards the creation of the Union for the Mediterranean in 2008, a new emphasis is placed on the Mediterranean in the study of European Integration. This book brings together a collection of experts to address this important new area of study and discuss issues such as development, aid, labour, markets, human capital investment, Europeanization and institutional reform.

**Socioeconomic and Geopolitical Aspects of Global Climate Change** Leonidas Osvaldo Girardin, 2024-03-21 This book discusses climate change from an academic point of view centered on and from Latin America. Although climate change is a global issue, there has been a notable lack of input from the Latin American perspective, which means that many Latin American intellectuals often bring ideas, tools and potential solutions proposed by external, international research centers or

organizations to the region. This book embraces a Latin American viewpoint to critically engage the problem and many of the concepts used in the analysis of climate change. The text emphasizes heterogeneity as an essential factor that cannot be absent in the analysis of how to understand and face the challenges posed by climate change. This heterogeneity refers not only to the magnitude of the impact that different regions will experience (including in their productive activities, ecosystems and social groups), but also to their contexts and capacities. Different countries' and regions' historical accumulated emissions—the primary cause of the current atmospheric concentrations of greenhouse gases—can inform current responsibilities, and their diverse productive structures will also contribute to different baselines in energy, agriculture and other sectors. Asymmetries in economic, technological and political capacities to face climate-related challenges will influence the social and economic costs of potential adaptation and mitigation measures. Using this conceptual approach, the book focuses on some of the main climate change-linked impacts expected in the region, such as effects on semi-arid ecosystems, and feasible, sector-specific adaptation measures. Furthermore, it contextualizes mitigation measures that appear on the international agenda (including the utilization of economic instruments to flexibilize the fulfillment of climate commitments) in the Latin American region. *Socioeconomic and Geopolitical Aspects of Global Climate Change: An Intersectorial Vision from the South of the South* offers socioeconomic and geopolitical analysis from the perspective of a region that is going to suffer impacts disproportionately greater than its historical and current responsibility in triggering this global environmental threat.

**Victims of Progress** John H. Bodley, 2008 This compelling account of the effect of technology and development on indigenous peoples throughout the world examines major issues of intervention: social engineering, economic development, self-determination, health and disease, and ecocide. *Victims of Progress* provides a provocative context in which to think about civilization and its costs.

Mortality in an International Perspective Jon Anson, Marc Luy, 2014-03-24 This volume presents a state of the art coverage of the measurement and evolution of mortality over time. It describes in great detail the changes in the cause patterns of mortality, the changes in mortality patterns at different ages, and specific analyses of mortality in particular countries. Derived from a meeting of the European Working Group on Health, Morbidity and Mortality held at the Vienna Institute of Demography, September 2011, it presents a cross-section of the work and concerns of mortality researchers across Europe, ranging from London and Madrid in the west to Moscow in the east, with a few additions from further afield. Although most of the papers focus on a particular population, the range of the papers is broad; taken together they present an inter-disciplinary cross-section of this multi-faceted field. Coverage includes estimating life expectancy in small areas, with an application to recent changes in US counties; socioeconomic determinants of mortality in Europe using the latest available data and short-term forecasts; predicting mortality from profiles of biological risk and performance measures of

functioning; infant mortality measurement and rate of progress on international commitment using evidence from Argentina; avoidable factors contributing to maternal deaths in Turkey; changes in mortality at older ages: the case of Spain (1975-2006); variable scales of avoidable mortality within the Russian population; long-term mortality decline in East Asia, and much more. Perspectives in Mortality Research will serve as a valuable resource for professionals and students in sociology, demography, public health and personal finance.

**Systemic Knowledge-Based Assessment of Higher Education Programs** Espinosa, Edgar Oliver Cardoso, 2016-05-31 The true success of a nation can be measured by its ability to create, disseminate, and utilize knowledge through education. A quality education instills in students the capability to add value to the economy through his or her skills, to participate in society, and to improve the overall wellness of his or her community. Systemic Knowledge-Based Assessment of Higher Education Programs offers theoretical and pedagogical research concerning the management of educational systems on both the national and international scale. Exploring the most effective ways to utilize intellectual capital, this publication implores educators to ensure that their students hone the skills necessary to interact in the globalized economy, using all of the information available to them. This book is a versatile asset for educators, administrators, government agencies, and students of education.

*Engineering Technologies for Renewable and Recyclable Materials* Jithin Joy, Maciej Jaroszewski, Praveen K.M., Sabu Thomas, Reza Haghi, 2018-10-03 This new resource focuses on many recent advances in recycling and reuse of materials, outlining basic tools and novel approaches. It covers such important issues as e-waste recycling, bio-mass recycling, vermitechology, recovery of metals, polymer recycling, environmental remediation, waste management, recycling of nanostructured materials, and more. Also included is coverage of new research in the use of laser spectroscopy, pyrolysis, and recycled biomaterials for biomedical applications.

*Diario oficial* Mexico, 2010

Water Resources Engineering Larry W. Mays, 2019-04-02 Modern water conveyance and storage techniques are the product of thousands of years of human innovation; today we rely on that same innovation to devise solutions to problems surrounding the rational use and conservation of water resources, with the same overarching goal: to supply humankind with adequate, clean, freshwater. Water Resources Engineering presents an in-depth introduction to hydrological and hydraulic processes, with rigorous coverage of both core principles and practical applications. The discussion focuses on the engineering aspects of water supply and water excess management, relating water use and the hydrological cycle to fundamental concepts of fluid mechanics, energy, and other physical concepts, while emphasizing the use of up-to-date analytical tools and methods. Now in its Third Edition, this straightforward text includes new links to additional resources

that help students develop a deeper, more intuitive grasp of the material, while the depth and breadth of coverage retains a level of rigor suitable for use as a reference among practicing engineers.

*Cosmos* Carlos Herrero Bervera,2009

*Lactancia Materna* María José Aguilar Cordero, Ma. José Aguilar Cordero,2005-02 Resumen del contenido: Conceptos, definiciones e historia de la lactancia. Nodrizas. Epidemiología de la lactancia materna. Anatomía de la glándula mamaria. Fisiología de la glándula mamaria. Composición, propiedades y bioquímica de la leche humana. Principios inmediatos. Componentes bioquímicos de la leche humana. Vitaminas, minerales y otros compuestos. Patrón de crecimiento en los niños lactados al pecho. Instauración y fomento prenatal de la lactancia materna. Seguimiento de los bebés alimentados con leche materna en los centros de salud. Técnicas de lactancia materna. Alimentación complementaria, lactancia prolongada y tándem. Promoción de la lactancia materna. Ventajas y causas de abandono. Lactancia materna y familia. Evidencias científicas de la eficiencia de los diez pasos para una lactancia materna exitosa. Nutrición materna durante el embarazo y la lactancia. Ejercicio físico y lactancia materna. Problemas maternos relacionados con las mamas. Anestesia y lactancia materna.
