log linear analysis is a technique used  
in statistics to examine the relationship  
between more than two categorical  
variables the technique is used for both  
hypothesis testing and model building  
in both these uses models are tested to  
find the most parsimonious i e least  
complex model that best accounts for  
the variance in the observed  
frequencies a pearson s chi square test  
could be used instead of log linear  
analysis but that technique only allows  
for two of the variables to be c
