Procesos urbanos y sustentabilidad José Alberto Aguirre Anaya, Laura Alejandra Garrido Rodríguez, Andrés Esteban Torres González, Claudia Olivas Amezcua, Diana Melchor Barrera, María Esperanza Rock Núñez, Juan Pablo Zatarain Hernández, Karol Hernández Alarcón, Leticia Isabel Mejía Guaderrama, María Dolores Álvarez Contreras, Miriam Anahí Guerra Hernández, 2022-06-03 Ante los retos y contradicciones que enfrenta el desarrollo sustentable, las contribuciones de esta obra sirven para detectar los puntos ciegos de su discurso, así como aquellos momentos en los que su práctica se encuentra ante callejones sin salida. Sus casos de estudio delatan problemas particulares en la generación de políticas urbanas sustentables: participación ciudadana y grupos sociales marginados son algunos de ellos.

Transformative Planning Christopher Silver, Andrea Frank, 2021-11-25 The Dialogues in Urban and Regional Planning series offers a selection of some of the best scholarship in urban and regional planning from around the world with internationally recognized authors taking up urgent and salient issues from theory, to education for and practice of planning. This 7th volume features contributions on the theme of Transformative Planning: Smarter, Greener and More Inclusive Practices. It includes chapters from leading planning scholars and practitioners who critically examine how transformative planning practices seek to reduce inequalities, promote sustained, inclusive and sustainable economic growth, achieve gender equality, improve human health and well-being, foster resilience of urban communities and protect the environment and thereby change urban planning paradigms. Several case studies of emerging transformative planning interventions illustrate practical ways forward. Transformative Planning offers provocative insights into the global planning community's struggle and contribution to tackle the major challenges to society in the 21st century. It will be of use for advanced undergraduate and graduate courses in the wide-ranging fields encompassed by urban studies, sustainability studies, and urban and regional planning. The Dialogues in Urban and Regional Planning (DURP) series is published in association with the Global Planning Education Association Network (GPEAN) and its member national and transnational planning schools associations.

Landlord and Tenant Alan Gilbert, Ann Varley, 2002-09-11 This ground-breaking work employs survey data and in-depth interviews to compile a detailed picture of landlords and tenants in developing countries. Focusing on Mexico the authors

examine the state's housing policy, with its clear bias towards increasing home ownership, and explores the possibilities of improving the quality and increasing the stock of rented accommodation in the developing World.

The Routledge Handbook of Urban Studies in Latin America and the Caribbean Jesús M. González-Pérez, Clara Irazábal, Rubén C. Lois-González, 2022-07-19 This handbook presents the great contemporary challenges facing cities and urban spaces in Latin America and the Caribbean. The content of this multidisciplinary book is organized into four large sections focusing on the histories and trajectories of urban spatial development, inequality and displacement of urban populations, contemporary debates on urban policies, and the future of the city in this region. Scholars of diverse origins and specializations analyze Latin American and Caribbean cities showing that, despite their diversity, they share many characteristics and challenges and that there is value in systematizing this knowledge to both understand and explain them better and to promote increasing equity and sustainability. The contributions in this handbook enhance the theoretical, empirical and methodological study of urbanization processes and urban policies of Latin America and the Caribbean in a global context, making it an important reference for scholars across the world. The book is designed to meet the interdisciplinary study and consultation needs of undergraduate and graduate students of architecture, urban design, urban planning, sociology, anthropology, political science, public administration, and more.

Steering the Metropolis Inter American Development Bank, United Nations Human Settlements Programme, Development Bank of Latin America, 2017-10-24 A distinctive feature of urbanization in the last 50 years is the expansion of urban populations and built development well beyond what was earlier conceived as the city limit, resulting in metropolitan areas. This is challenging the relevance of traditional municipal boundaries, and by extension, traditional governing structures and institutions. *Steering the Metropolis: Metropolitan Governance for Sustainable Urban Development,*” encompasses the reflections of thought and practice leaders on the underlying premises for governing metropolitan space, sectoral adaptations of those premises, and dynamic applications in a wide variety of contexts. Those reflections are structured into three sections. Section 1 discusses the conceptual underpinnings of metropolitan governance, analyzing why political, technical, and administrative arrangements at this level of government are needed. Section 2 deepens the discussion by addressing specific sectoral themes of mobility, land use planning, environmental management,

and economic production, as well as crosscutting topics of metropolitan governance finance, and monitoring and evaluation. Section 3 tests the concepts and their sectoral adaptations against the practice, with cases from Africa, America, Asia, and Europe.
