Owl of Minerva Eric Pankey, 2019-10-08 A Walt Whitman Award-winning poet seeks the spiritual within everyday physical objects in this luminous collection. Taking its name from the Roman goddess of wisdom and her companion bird, Owl of Minerva turns astonishingly precise attention to the physical world, scouring it for evidence of the spiritual as the poet travels through such places as Appalachia, New England, Venice, Spain, the Caribbean, and the American Midwest. Along the way, Eric Pankey ponders mortality, religious narratives and iconography, the continued press of childhood on the present, and the simultaneous violence and beauty of the natural world. At the book's core are three ambitious poems titled "The Complete List of Everything," which together offer an extended vision of American longing and connection—as well as a window into the sort of compendium of images and moments a sustained devotion to poetry can yield. "The hope was to construct // A coherent totality of meaning from odds / And ends," Pankey writes, and so much of this book is about the difficult work of constructing meaning from the available material all around us. This book is an extraordinary example of lyric-meditative journaling—a large and profound collection by a brilliant poet writing at the height of his powers. "Pankey remains one of our leading practitioners of the metaphysical poem." —C. Dale Young, author of *Prometeo*

Command-line Rust Ken Youens-Clark, 2022 For several consecutive years, Rust has been voted most loved programming language in Stack Overflow's annual developer survey. This open source systems programming language is now used for everything from game engines and operating systems to browser components and virtual reality simulation engines. But Rust is also an incredibly complex language with a notoriously difficult learning curve. Rather than focusing on the language as a whole, this guide teaches Rust using a single small, complete, focused program in each chapter. Author Ken Youens-Clark shows you how to start, write, and test each of these programs to create a finished product. You'll learn how to handle errors in Rust, read and write files, and use regular expressions, Rust types, structs, and more. Discover how to: Use Rust's standard libraries and data types such as numbers, strings, vectors, structs, Options, and Results to create command-line programs Write and test Rust programs and functions Read and write files, including stdin, stdout, and stderr Document and validate command-line arguments Write programs that fail gracefully Parse raw and delimited text manually,

using regular expressions and Rust crates Use and control randomness

Courting the Yankees Ettie Ward, 2003 In a series of twenty-one original articles by legal scholars, editor Ettie Ward and the contributors examine both baseball law and baseball lore. By focusing on the famous New York Yankees, and incidents involving the team and the Yankee franchise, the book explores a wide range of legal issues as they relate to baseball. The chapters are organized so that the sports fan (even if neither a lawyer nor a Yankees' fan) is invited to read about sports and learn about the law. Baseball aficionados will enjoy the added insights provided by the discussion of various legal concepts, and lawyer sports fans will gain greater insight as to the application of familiar legal principles on and off the baseball diamond. The chapters cover some topics that would ordinarily be covered in a sports law course, as well as others that would not.

Post-theory Martin McQuillan, 1999 The first part of this work addresses the current state of critical theory, and questions the post-ness of the epistemological space after the event of theory as an institutional practice. The second part contains examples of the type of work theory has made possible, demonstrating the new directions opening up both within theory itself and in cross-disciplinary study as a result of theory. In this sense, post can be understood to be in dialogue with issues relating to postmodernism, post-Marxism and post-feminism.
