**American Revolutions in the Digital Age** Nora Slonimsky, Mark Boonshoft, Ben Wright, 2024-08-15 The interdisciplinary essays in *American Revolutions in the Digital Age* explore what digital tools can tell us about the late eighteenth- and early nineteenth-century United States and reveal how an understanding of the American past can make sense of our digital present. By employing a host of innovative digital research methods, these authors challenge long-held

assumptions about the American past. In addition, this collection uniquely demonstrates how contemporary anxieties about an array of topics, including media disinformation, patriarchy, economic inequality, and public memory, can be better understood through careful considerations of early American history. Displays! Susan P. Phillips,2014-01-10 Just about any librarian needs new ideas for dynamic, topical library displays. This new second volume offers ideas on a wide range of subjects including women of note, news-worthy events, Mother Nature, great moments in time, prominent figures in history, global cultures and more. Each display topic includes a comprehensive background discussion along with detailed assembly instructions, an explanation of the genesis of the idea and suggestions on ways to adapt these designs to fit into larger spaces. The author includes everyday items, prized collectibles and authentic antiques in each of the 45 displays featured.

**Why We Build** Rowan Moore,2023-12-15 In an era of brash, expensive, provocative new buildings, a prominent critic argues that emotions—such as hope, power, sex, and our changing relationship to the idea of home—are the most powerful force behind architecture, yesterday and (especially) today. We are living in the most dramatic period in architectural history in more than half a century: a time when cityscapes are being redrawn on a yearly basis, architects are testing the very idea of what a building is, and whole cities are being invented overnight in exotic locales or here in the United States. Now, in a bold and wide-ranging new work, Rowan Moore—former director of the Architecture Foundation, now the architecture critic for The Observer—explores the reasons behind these changes in our built environment, and how they in turn are changing the way we live in the world. Taking as his starting point dramatic examples such as the High Line in New York City and the outrageous island experiment of Dubai, Moore then reaches far and wide: back in time to explore the Covent Garden brothels of eighteenth-century London and the fetishistic minimalism of Adolf Loos; across the world to assess a software magnate's grandiose mansion in Atlanta and Daniel Libeskind's failed design for the World Trade Center site; and finally to the deeply naturalistic work of Lina Bo Bardi, whom he celebrates as the most underrated architect of the modern era.

**Rip Van Winkle** Washington Irving,2020-11-02 Rip Van Winkle by Washington Irving Rip Van Winkle focuses on the simple and idle character of Rip Van Winkle. Most of the villagers love him, but his termagant wife, Dame Van Winkle, constantly scolds him. Rip is good at helping others, but he's inept at helping himself or his family. Leave Dame Van Winkle to take care of the house, take care of the children and work on the farm. However, Rip Van Winkle is not lazy. He is good at hunting and fishing and is willing to do things for others. However, when it comes to his own land, he seems unlucky. He can't make anything grow, and out of frustration he often spends time away from his annoying wife and their ruined farm. Rip likes to spend time with his friends, who are other idle men like him, on a bench in front of the inn. They are called the philosophers of the city and their reflections are languid and cheerful. The main leader of the men's group is the inn's owner, Nicholas Vedder, who never speaks and always smokes. The other men prowling the inn include Van Brummel, the schoolmaster, and Brom Dutcher. Dame Van Winkle believes that these men are a bad influence on Rip Van Winkle. She follows Rip to the inn and scolds him and all the other men. Unable to escape his wife in the city, Rip finds solace by going hunting in the woods. He takes his dog, Wolf, who is also afraid of Dame Van Winkle, and his gun. While exploring the Catskill Mountains, Rip and his dog reach the highest point. Rip rests, leans back on a grassy knoll, and examines the land around him. As it gets dark, Rip reluctantly begins to head home. Then he hears a man calling his name. Rip at first can't find the source, but eventually, he spies on a strange man climbing the mountain. The man wears old-fashioned Dutch clothes and carries a large beer keg on his back. Rip, helpful by nature, is going to help the man, who doesn't say a word. The man leads Rip through a strange river bed and leads him to a closed hole, where several other men are gathered. They all wear very old Dutch style clothing, and one man, who appears to be the leader, wears a high top hat with a feather. All the men are playing

**Workplace Privacy** Jonathan Remy Nash,Samuel Estreicher,2010 Employers everywhere today must delicately balance the need to maintain a safe and proper workplace with employees rights and the risk of liability. The fact that new technologies make it easier for employers to monitor their employees whereabouts, communications, and activities only serves to make the issue more acute. Now, in this collection of essays by outstanding scholars and practitioners in U.S. labour law and practice, employers and their legal counsel will find a broad array of important contributions to the law and

study of workplace privacy. Based on papers delivered at the 58th annual labour conference of the New York University Center on Labor and Employment Law, this book reflects and analyzes recent developments, providing the best comprehensive work on U.S. workplace privacy. How far should employers be allowed to go in monitoring employees? Where do employers' rights to run their businesses end and employees' privacy rights begin? Is the existing law sufficient to resolve recurring conflicts? These are among the big questions tackled in these articles. Among the many specific issues covered are the following: use of global positioning systems (GPS) in tracking employees; background checking for job applicants; email monitoring; physical monitoring of employees; scope and lawfulness of so-called lawful activity laws; employer involvement in employees' nonworkplace behaviour (e.g., drug testing); employees' rights of association; regulation of fraternizing and dating among employees; employee privacy issues in employer-union bargaining; privacy issues in public sector employment; privacy issues and threats of terrorism; and efforts by employers to verify employees' nationality and immigration status. Authors pay special attention to fast-breaking developments such as in the extraterritorial reach of the European Union's data protection directive and the current status of the U.S. National Labor Relations Board's Register-Guard decision. A special feature is a very early draft of a chapter of the forthcoming Restatement (Third) of Labor and Employment Law made available through the graces of the American Law Institute on the U.S. common law of employee privacy rights. As always, this important annual publication offers definitive current scholarship in its theme area of labour and employment law. As such, it will be of inestimable value to practitioners, government officials, academics, and others interested in developments in employment and labour relations law and practice.
