Saying It With Songs Katherine Spring,2013-11 Hollywood's conversion from silent to synchronized sound film production not only instigated the convergence of the film and music industries but also gave rise to an extraordinary period of songs in American cinema. Saying It With Songs considers how the increasing interdependence of Hollywood studios and Tin Pan Alley music publishing firms influenced the commercial and narrative functions of popular songs. While most scholarship on film music of the period focuses on adaptations of Broadway musicals, this book examines the functions of songs in a variety of non-musical genres, including melodramas, romantic comedies, Westerns, prison dramas, and action-adventure films, and shows how filmmakers tested and refined their approach to songs in order to reconcile the spectacle of song performance, the classical norms of storytelling, and the conventions of background orchestral scoring from the period of silent cinema. Written for film and music scholars alike as well as for general readers, Saying It With Songs illuminates the origins of the popular song score aesthetic of American cinema.

**Song Sheets to Software** Elizabeth C. Axford, 2004-06-24 The second edition continues to be a valuable source to printed music, music software, and Web sites useful to musicians, and includes interesting essays on the history of printed music, copyright laws, music theory fundamentals, and other topics. Many questions posed by musicians and others concerned with music production and instruction are answered with short, effective explanations (e. g., the duration of copyright, the concept of fair use, writing lead sheets, publishing music). Axford's volume will be especially useful to young musicians or others beginning a career in some aspect of music. A useful section, Web Sites for Musicians, reveals the book's currency: very few dead links were detected, attesting to careful updating from the first edition. The section Tech Talk: Terms A - Z provides brief definitions for many new terms used by musicians or technology specialists. A valuable desk reference for everyone involved in the music industry.
