

Cuestionario De Datos Personales Psicología

Richard J. Gerrig, Philip G. Zimbardo

Psicología comunitaria de la convivencia Carlos Arango Cálad, 2018-11-29 En este libro se describe el desarrollo como psicólogo comunitario de su autor, mostrando las facetas, profesional, investigadora, crítica y reflexiva. La reflexión desemboca en su propuesta marcada por la dimensión afectiva y su rechazo a la consideración meramente técnica de la Psicología Comunitaria. Este posicionamiento de Arango parece muy importante ya que es parte del paradigma que se ha ido desarrollando, pluralmente, en América Latina. Para alguien que plantea la convivencia como eje fundamental para el quehacer psicológico y lo hace además desde un país dividido por fuerzas destructivas y a la vez unido en la calidad de su gente, debe constituir una confirmación de la oportunidad y de la necesidad de su quehacer. Un quehacer que se afina en su historia específica y en su historia cultural y que se ha venido construyendo durante casi tres décadas. Para alguien que plantea la convivencia como eje fundamental para el quehacer psicológico y lo hace además desde un país dividido por fuerzas destructivas y a la vez unido en la calidad de su gente, debe constituir una confirmación de la oportunidad y de la necesidad de su quehacer. Un quehacer que se afina en su historia específica y en su historia cultural y que se ha venido construyendo durante casi tres décadas.

El psicólogo, 1989

Psicología Analítica de Jung. M. Pilar G. Molina, En este libro, se exploran los conceptos clave de la psicología analítica de Jung, sus aplicaciones en la terapia, y sus influencias más allá del ámbito clínico, como en el arte, la literatura y las terapias alternativas. Además, se ofrece una guía paso a paso para terapeutas que deseen aplicar esta terapia en su práctica profesional, proporcionando un enfoque claro y estructurado sobre cómo integrar los principios junguianos en el trabajo clínico. La terapia junguiana, con su énfasis en los sueños, los símbolos y el inconsciente, se expone en este texto para ayudar a los profesionales a guiar a sus pacientes en un proceso de autodescubrimiento profundo y transformación personal. El psicoanálisis junguiano, desarrollado por Carl Gustav Jung, es una de las corrientes más profundas y complejas de la psicología moderna. A diferencia de otros enfoques que se centran en los conflictos personales y las experiencias individuales, Jung propuso una visión más amplia de la psique humana, introduciendo conceptos revolucionarios como el inconsciente colectivo, los arquetipos y el proceso de individuación. Su enfoque no solo aborda los aspectos personales de la mente, sino también aquellos elementos universales que compartimos como humanidad, conectando al individuo con su

dimensión espiritual, simbólica y cultural. A través de estas páginas, el lector será guiado por un viaje hacia el inconsciente, descubriendo cómo los sueños, los símbolos y los arquetipos pueden no solo curar, sino también orientar a las personas hacia una vida más plena y auténtica. El legado de Carl Jung continúa vigente, ofreciendo una perspectiva única sobre el funcionamiento de la mente y los misterios de la psique humana.

Psicología y vida Richard J. Gerrig, Philip G. Zimbardo, 2005

Investigación en Psicología, Salud y Educación, 2024-10-30 El conocimiento científico avanza a un ritmo vertiginoso gracias a las investigaciones y estudios que se vienen desarrollando en los diferentes ámbitos de conocimiento. En este libro se recogen diferentes trabajos científicos localizados en las ramas de la Psicología, la Salud y la Educación como pilares fundamentales del conocimiento y del bienestar general de la sociedad. Se recogen trabajos tanto experimentales como de revisión sistemática que sientan las bases para futuros estudios. Los trabajos están elaborados por diferentes profesionales de diferentes países europeos desde una perspectiva multidisciplinar. Se recogen 25 trabajos de diferentes ramas del conocimiento en los que se abordan temáticas muy dispares siempre enfocadas a la mejora del bienestar y la calidad de vida de las personas a lo largo de todo el ciclo vital, pues encontramos estudios desde el propio nacimiento hasta la edad adulta. En muchos de los estudios se trata el enfoque de la sostenibilidad desde las diferentes perspectivas dando respuesta al desarrollo de una investigación orientada hacia la consecución de los objetivos de la Agenda 2030. Se abordan estudios centrados en la educación sostenible, el bienestar mental mediante prevención del acoso escolar, del suicidio en adolescentes, ansiedad matemática, etc. También cabe destacar los estudios centrados en el bienestar físico en los que se trabaja con la rehabilitación en ictus, el tratamiento fisioterápico en el puerperio, cuidados nutricionales para la salud, etc. Todo ello, contribuye claramente a un avance en diferentes campos de la Psicología, la Salud y la Educación a lo largo del ciclo vital de la persona, con el claro objetivo de mejorar su salud física y mental, y por ende, su bienestar y calidad de vida.
