The English manor c.1200-c.1500, 2013-01-01 Provides a comprehensive introduction and essential guide to one of the most important institutions in medieval England and to its substantial archive. This is the first book to offer a detailed explanation of the form, structure and evolution of the manor and its records. Offers translations of, and commentaries upon, each category of document to illustrate their main features. Examples of each category of record are provided in translation, followed by shorter extracts selected to illustrate interesting, commonly occurring, or complex features. A valuable source of reference for undergraduates wishing to understand the sources which underpin the majority of research on the medieval economy and society.

English University Life in the Middle Ages Alan B Cobban, 2022-02-22 First Published in 1999. This work presents a composite view of medieval English university life. The author offers detailed insights into the social and economic conditions of the lives of students, their teaching masters and fellows. The experiences of college benefactors, women and university servants are also examined, demonstrating the vibrancy they brought to university life. The second half of the book is concerned with the complex methods of teaching and learning, the regime of studies taught, the relationship between the universities in Oxford and Cambridge, as well as the relationship between town and gown.
