Naturalism, Theism and the Cognitive Study of Religion Dr Aku Visala,2013-06-28 This book provides a critical philosophical analysis of the claim that contemporary cognitive approaches to religion undermine theistic beliefs. Recent scientific work into the evolution and cognition of religion has been driven by and interpreted in terms of a certain kind of

philosophical and methodological naturalism. The book argues that such naturalism is not necessary for the cognitive study of religion and develops an alternative philosophical and methodological framework. This alternative framework opens the cognitive study of religion to theological and philosophical considerations and clarifies its relationship to other approaches to religious phenomena. This unique contribution to discussions regarding the philosophical and theological implications of the cognitive study of religion summarizes the so far fragmentary discussion, exposes its underlying assumptions, and develops a novel framework for further discussion.

Human Nature and the Evolution of Society Stephen K. Sanderson, 2018-05-04 If evolution has changed humans physically, has it also affected human behavior? Drawing on evolutionary psychology, sociobiology, and human behavioral ecology, *Human Nature and the Evolution of Society* explores the evolutionary dynamics underlying social life. In this introduction to human behavior and the organization of social life, Stephen K. Sanderson discusses traditional subjects like mating behavior, kinship, parenthood, status-seeking, and violence, as well as important topics seldom included in books of this type, especially gender, economies, politics, foodways, race and ethnicity, and the arts. Examples and research on a wide range of human societies, both industrial and nonindustrial, are integrated throughout. With chapter summaries of key points, thoughtful discussion questions, and important terms defined within the text, the result is a broad-ranging and comprehensive consideration of human society, thoroughly grounded in an evolutionary perspective.

Selected chapters from Evolutionary Psychology, 2011

Ten Theories of Human Nature Leslie Forster Stevenson, David L. Haberman, 2009 Over four previous editions, *Ten Theories of Human Nature* has been a remarkably popular introduction to some of the most influential developments in Western and Eastern thought. This fifth edition features a new chapter on Buddhism and a completely revised and reorganized chapter on Darwinian theories. Lucid and accessible, *Ten Theories of Human Nature*, Fifth Edition, compresses into a small space the essence of such ancient traditions as Confucianism, Hinduism, Buddhism, and the Old and New

Testaments as well as the theories of Plato, Aristotle, Immanuel Kant, Karl Marx, and Jean-Paul Sartre. The authors juxtapose the ideas of these and other thinkers and traditions in a way that helps readers understand how humanity has struggled to comprehend its nature. To encourage readers to think critically for themselves and to underscore the similarities and differences between the many theories, the book examines each one on four points--the nature of the universe, the nature of humanity, the diagnosis of the ills of humanity, and the proposed cure for these problems. Ideal for introductory courses in human nature, philosophy, religious studies, and intellectual history, *Ten Theories of Human Nature*, Fifth Edition, will engage and motivate students and other readers to consider how we can understand and improve both ourselves and human society.

Evolutionary Psychology David M. Buss, 2004 This revised text provides a comprehensive overview of the field of evolutionary psychology. It includes information on landmarks in human evolution, intuitive biology, women's long-term mating strategies, men's long-term mating strategies and problems of kinship.
