50 Years Of Science In Singapore Bernard Tiong Gie Tan, Hock Lim, Kok Khoo Phua, 2016-12-12 As part of the commemorative book series on Singapore's 50 years of nation-building, this important compendium traces the history and development of the various sectors of Singapore science in the last 50 years or so. The book covers the government agencies responsible for science funding and research policy, the academic institutions and departments who have been in the forefront of the development of the nation's scientific manpower and research, the research centres and institutes which have been breaking new ground in both basic and applied science research, science museums and education, and the academic and professional institutions which the scientific community has set up to enable Singapore scientists to serve the nation more effectively. Each article is chronicled by eminent authors who have played important roles and made significant contributions in shaping today's achievement of science in Singapore. Professionals, academics, students and the general public will find this volume a useful reference material and an inspirational easy read.

Flexible Robotics in Medicine Hongliang Ren, 2020-06-20 Flexible Robotics in Medicine: A Design Journey of Motion Generation Mechanisms and Biorobotic System Development provides a resource of knowledge and successful prototypes regarding flexible robots in medicine. With specialists in the medical field increasingly utilizing robotics in medical procedures, it is vital to improve current knowledge regarding technologies available. This book covers the background, medical requirements, biomedical engineering principles, and new research on soft robots, including general flexible robotic systems, design specifications, design rationale, fabrication, verification experiments, actuators and sensors in flexible medical robotic systems. Presenting several projects as examples, the authors also discuss the pipeline to develop a medical robotic system, including important milestones such as involved regulations, device classifications and medical standards. - Covers realistic prototypes, experimental protocols and design procedures for engineering flexible medical robotics - Covers the full product development pipeline for engineering new flexible robots for medical applications, including design principles and design verifications - Includes detailed information for application and development of several types of robots, including Handheld Concentric-Tube Flexible Robot for Intraocular Procedures, a Preliminary Robotic Surgery Platform with

Cancer Theranostics, Second Edition Xiaoyuan Chen, Jingjing Zhang, Stephen Wong, 2025-09-30 *Cancer Theranostics, Second Edition* provide updates on new molecular imaging probes and techniques for early detection of cancer and describes molecular imaging-guided cancer therapy. Discussions also include nanoplatforms, incorporating both cancer imaging and therapeutic components, as well as clinical translation and future perspectives. New to this edition is the inclusion of recent developments and a streamlined structure that leads the reader through the content more intuitively, from problem to solution. More illustrations of different forms of cancer theranostics are included, and this edition also contains completely new content on DNA and RNA theranostics. In addition, new case studies are featured. This new edition is published in time

to meet the needs of medical researchers in a comprehensive manner, encompassing diagnostics, in vivo imaging and its use for image-guided therapy, and a variety of other miscellaneous subjects. This book is a must-have for all research scientists, medical physicists, and physician scientists in cancer experimental therapeutics and molecular imaging. - Describes the identification of novel biomarkers to advance molecular diagnostics of cancer - Includes the latest developments in liquid biopsy, new imaging techniques such as magnetic particle imaging, artificial intelligence, different types of image-guided interventions and drug delivery, and new forms of theranostics, including the most recent mRNA based theranostics - Gives various, novel forms of cancer interventions and treatments - Provides clinical translation of different types of cancer theranostics platforms
