

Dean Radin The Conscious Universe

Jenny Randles

The Conscious Universe Dean Radin, 2010-10-26 The scientific evidence for telepathy, clairvoyance, prayer, jinxes, and other phenomena, from the author of *Entangled Minds*. This rigorously reasoned manifesto by an eminent parapsychologist provides astonishing answers to universal questions by unveiling persuasive empirical evidence for the existence of psychic phenomena. Dean Radin shatters myths that surround parapsychology, revealing the extent to which corporations, governments, and academia have embraced it, and exploring what the effects will be when—inevitably—mainstream science and society embrace it as well. Praise for *The Conscious Universe* “Radin is a mix of curiosity, scholarship, technical expertise, and sly wit.” —New York Times Magazine “Radin makes the most powerful case for the reality of parapsychological phenomena that I have yet encountered. . . . He writes clearly, powerfully, and persuasively, and this book shows that we are at a turning point in our scientific understanding of our minds and of nature.” —Rupert Sheldrake, PhD, author of *The Sense of Being Stared At* “Cutting perceptively through the spurious arguments frequently made by skeptics, [Radin] shows the evidence in favor of [paranormal] existence is overwhelming.” —Brian Johnson, PhD, Nobel laureate in physics

Real Magic Dean Radin, PhD, 2018-04-10 The chief scientist at the Institute of Noetic Sciences (IONS) turns a critical eye toward such practices as telepathy, clairvoyance, precognition and psychokinesis. Are such powers really possible? Science says yes. According to noted scientist and bestselling author of *The Conscious Universe*, Dean Radin, magic is a natural aspect of reality, and each of us can tap into this power with diligent practice. But wait, aren't things like ESP and telepathy just wishful thinking and flights of the imagination? Not according to the author, who worked on the US government's top secret psychic espionage program known as Stargate. Radin has spent the last forty years conducting controlled experiments that demonstrate that thoughts are things, that we can sense others' emotions and intentions from a distance, that intuition is more powerful than we thought, and that we can tap into the power of intention (think *The Secret*, only on a more realistic and scientific level). These dormant powers can help us to lead more interesting and fulfilling lives. Beginning with a brief history of magic over the centuries (what was called magic two thousand years ago is turning out to be scientific fact today), a review of the scientific evidence for magic, a series of simple but effective magical techniques (the key is mental focus, something elite athletes know a lot about), Radin then offers a vision of a scientifically-informed magic

and explains why magic will play a key role in frontiers of science.

Entangled Minds Dean Radin, 2009-11-24 Is everything connected? Can we sense what's happening to loved ones thousands of miles away? Why are we sometimes certain of a caller's identity the instant the phone rings? Do intuitive hunches contain information about future events? Is it possible to perceive without the use of the ordinary senses? Many people believe that psychic phenomena are rare talents or divine gifts. Others don't believe they exist at all. But the latest scientific research shows that these phenomena are both real and widespread, and are an unavoidable consequence of the interconnected, entangled physical reality we live in. Albert Einstein called entanglement spooky action at a distance—the way two objects remain connected through time and space, without communicating in any conventional way, long after their initial interaction has taken place. Could a similar entanglement of minds explain our apparent psychic abilities? Dean Radin, senior scientist at the Institute of Noetic Sciences, believes it might. In this illuminating book, Radin shows how we know that psychic phenomena such as telepathy, clairvoyance, and psychokinesis are real, based on scientific evidence from thousands of controlled lab tests. Radin surveys the origins of this research and explores, among many topics, the collective premonitions of 9/11. He reveals the physical reality behind our uncanny telepathic experiences and intuitive hunches, and he debunks the skeptical myths surrounding them. *Entangled Minds* sets the stage for a rational, scientific understanding of psychic experience.

The Science of Magic Dean Radin, PhD, 2025-10-21 A science-backed guide to discovering the real power of magic and implementing it in your life, from the renowned author of *Real Magic* There is an idea that shakes the core of our scientific principles: That our consciousness participates in creating our physical reality. It's an idea that runs counter to the materialist worldview we're all taught in school. But the outer edges of scientific inquiry bleed into what can only be called 'magic.' Dean Radin, Ph.D., is at the forefront of researching magic from a scientific standpoint. In *The Science of Magic*, he shines a light on today's scientific breakthroughs, from quantum mechanics to the mind-body connection to telepathy, that can best be explained by what we currently call magic (or psi). In short, today's magic is the science of tomorrow. He shares his own groundbreaking research on psi phenomena, and explains how you can start utilizing these findings in your own life today. Accessible and practical, *The Science of Magic* offers magical methods from the perspective of a scientist, demonstrating how to effect change with exercises and hands-on techniques. In short, magic is a mental skill, like meditation or mathematics. You will find a quiz to discover your natural talents and foundational activities for strengthening your skills, including: • Affirmations (word magic) • Sigils • Knots • Candle magic • Writing magic • Spell-casting With his uniquely science-backed approach, Dean guides you through testing magic on your own, for example through dream precognition, evoking synchronicity, and more. *The Science of Magic* is a journey to the outer edges of our understanding of the universe, showing where science is leading us: namely, to magic.

The Conscious Universe Dean I. Radin, 1997 This myth-shattering book explains the evidence for the veracity of psychic phenomena, uniting the teachings of mystics, the theories of quantum physics, and the latest in high-tech experiments. With painstaking research and deft, engaging prose, Radin dispels the misinformation and superstition that have clouded the understanding of scientists and laypeople alike concerning a host of fascinating oddities. Psychokinesis, remote viewing, prayer, jinxes, and more - all are real, all have been scientifically proven, and the proof is in these pages. Though the link defies the laws of classical physics, it may heel closely to the basic precepts of quantum mechanics. Finally, Radin takes a bold look ahead, to the inevitable social, economic, academic, and spiritual consequences of the mass realization that mind and matter can influence each other without having physical contact.

Supernormal Dean Radin, PhD, 2013-07-16 Can yoga and meditation unleash our inherent supernormal mental powers, such as telepathy, clairvoyance, and precognition? Is it really possible to perceive another person's thoughts and intentions? Influence objects with our minds? Envision future events? And is it possible that some of the superpowers described in ancient legends, science fiction, and comic books are actually real, and patiently waiting for us behind the scenes? Are we now poised for an evolutionary trigger to pull the switch and release our full potentials? Dean Radin, Director of Research at the Institute of Noetic Sciences (IONS) and bestselling author of *The Conscious Universe*, presents persuasive new experimental evidence for the existence of such phenomena. He takes us on a thrilling scientific journey and challenges outdated assumptions that these abilities are mere superstition. Focusing on Patanjali's mysterious Yoga Sutras -- 2,000 year-old meditation practices believed to release our extraordinary powers -- Radin offers powerful evidence confirming that sometimes fact is much stranger, spookier, and more wonderful than the wildest fiction.

The Outline of Parapsychology Jesse Hong Xiong, 2009-11-09 This is a work of systematic parapsychology. The book aims to construct a framework and system of parapsychology, taking a comprehensive approach to the field. The Outline of Parapsychology states that parapsychology has a different philosophical background from the existing science and religions, and posits that pantheism could be the theoretical basis of parapsychology. The book also integrates parapsychology with oriental philosophies and New Age movement thought.

Create a Magnificent Now! Alex Ledgister, PhD, 2014-09-30 *Create a Magnificent NOW!* is the first book about the law of attraction that presents a failsafe solution for achieving optimal health, wealth, and self-fulfillment. Coach Alex reveals what he believes is the real secret behind powerful manifestation. By embracing this secret and making it the cornerstone of the LOA process, Coach Alex believes that anyone can manifest whatever one desires -- as long as the end result will never harm anyone else. This book removes the fairy dust from the LOA and its practices of meditation, visualization, and manifestation. Coach Alex points out that magic is nothing more than physical laws scientifically explained. By citing numerous laboratory studies based on the work of some of the world's most trusted scientists, he provides measurable

validation of the efficacy of the LOA through the new science of neuroplasticity. These studies also explain exactly why the LOA works. For the first time in the history of modern man, through actual demonstrations of the law of attraction, neuroplasticity builds a bridge between science and metaphysics. Skeptics who scorned the law of attraction as a New Age fad will think twice after studying the findings of these prestigious scientists. These studies confirm what ancient mystics and spiritual teachers have always known: unquestionably the LOA has the ability to improve the quality of any person's life. Create a Magnificent NOW is a book about the law of attraction written by a professional life coach who personally used this universal law to jumpstart his own life; in the process, discovering a secret failsafe method for successful manifestation.

Extraordinary Knowing Elizabeth Lloyd Mayer, 2008-02-26 In 1991, when her daughter's rare, hand-carved harp was stolen, Lisby Mayer's familiar world of science and rational thinking turned upside down. After the police failed to turn up any leads, a friend suggested she call a dowser—a man who specialized in finding lost objects. With nothing to lose—and almost as a joke—Dr. Mayer agreed. Within two days, and without leaving his Arkansas home, the dowser located the exact California street coordinates where the harp was found. Deeply shaken, yet driven to understand what had happened, Mayer began the fourteen-year journey of discovery that she recounts in this mind-opening, brilliantly readable book. Her first surprise: the dozens of colleagues who'd been keeping similar experiences secret for years, fearful of being labeled credulous or crazy. Extraordinary Knowing is an attempt to break through the silence imposed by fear and to explore what science has to say about these and countless other “inexplicable” phenomena. From Sigmund Freud's writings on telepathy to secret CIA experiments on remote viewing, from leading-edge neuroscience to the strange world of quantum physics, Dr. Mayer reveals a wealth of credible and fascinating research into the realm where the mind seems to trump the laws of nature. She does not ask us to believe. Rather she brings us a book of profound intrigue and optimism, with far-reaching implications not just for scientific inquiry but also for the ways we go about living in the world.

The Field Lynne McTaggart, 2012-06-05 “A big, bold, brilliantly crafted page-turner with HUGE ideas that challenge every last view about how the world works. This is both a primer to understand the law of attraction and the essential book of our age.” — Jack Canfield, author of The Success Principles(TM) and featured teacher on The Secret(TM) “One of the most powerful and enlightening books I have ever read. A magnificent job of presenting the hard evidence for what spiritual masters have been telling us for centuries.” — Wayne W. Dyer During the past few years science and medicine have been converging with common sense, confirming a widespread belief that everything—especially the mind and the body—is far more connected than traditional physics ever allowed. The Field establishes a new biological paradigm: it proves that our body extends electromagnetically beyond ourselves and our physical body. It is within this field that we can find a remarkable new way of looking at health, sickness, memory, will, creativity, intuition, the soul, consciousness, and spirituality. The Field helps to bridge the gap that has opened up between mind and matter, between us and the cosmos. Original, well researched,

and well documented by distinguished sources, this is the mind/body book for a new millennium.

The Living Energy Universe Gary E. R. Schwartz, Gary E. Schwartz, Linda G. S. Russek, 1999 Presents the theory of universal living memory and living energy systems.

Afterwards, You're a Genius Chip Brown, 1998 Brown witnesses healing sessions in which injuries incurred in past lives are healed, torn auras are sewn, and then, incredibly, submits to such treatment himself - an intrepid traveler sending wildly colorful dispatches back from the outer frontiers.--BOOK JACKET.

The Ghost in the Universe Taner Edis, 2002 Emphasizing the results of natural science, physicist Taner Edis takes a fresh look at an age-old question: Is there a God or a spiritual reality beyond nature?

Be Careful what You Pray For-- You Just Might Get it Larry Dossey, 1997 Building on the scientific link Dossey has established between prayer and healing, *Be Careful What You Pray For* offers a fascinating look into human consciousness, intent, emotions, and psychology. With remarkable true stories, case histories, and solid scientific evidence, it takes the logical next step in documenting the full range of prayer's power, proving and cautioning that just as people can use prayer to positively affect health and healing, it is also absolutely possible to use prayer for negative and destructive means. With a perfect blend of scientific scrutiny and storyteller's art, Dossey examines the ways negative prayer consciously and subconsciously enters into our thoughts; illustrates different types of harmful prayers, curses, and hexes; and offers practical suggestions for learning to combat and protect ourselves from them.--BOOK JACKET. The Paranormal Source Book Jenny Randles, 1999 This revised edition contains all the main paranormal topics, ranging from apparitions and zoological mysteries, to ball lightning, crop circles, ESP, poltergeists, premonitions and UFOs, as well as new information on conspiracy theories, ancient wisdom and electronic pollution. The author gives details of the main cases in each area plus up-to-the-minute events, thinking, research and experiments. It also offers a comprehensive reading list of books and publications available within each topic, and addresses of recommended research organisations around the world.

The Spirit and Science of Holistic Health Jon Robison, Karen Blockman Carrier, 2004 We propose that the major health crises in the United States are not about heart disease, cancer, osteoporosis, or obesity. Instead they are about violence, prejudice, social isolation, and runaway materialism. Unfortunately, traditional health promotion continues to attack our problems by declaring war on disease, obsessing about epidemiologically based risk factors and frightening people about what they eat, how much they weigh, and what they like to do or not do. These approaches rarely help and often create an atmosphere of anxiety and confusion. This book is an invitation to health professionals to rethink our current understanding

of health, illness, and the process of healing. It covers topics that are rarely addressed in health promotion including the history of the human species, the Scientific Revolution, quantum physics, and the latest mind/body/spirit research. While it may seem as if this information is only marginally related to health, we believe it provides a critical foundation for the truly holistic approach to health promotion we describe in detail in this book. It is time to re-create our profession and set a daring new course to improve the quality of the human experience.

Has Science Found God? Victor J. Stenger, 2003 In the past few years a number of scientists have claimed that there is credible scientific evidence for the existence of God. Is this true? Are scientists close to solving the greatest of all mysteries? Physicist Victor J. Stenger delves into these questions from a skeptical point of view in this lucid presentation of the key scientific facts. Stenger critically reviews the attempts of many contemporary theologians and some scientists to resurrect failed natural theologies in new guises. Whether these involve updated arguments from design, anthropic coincidences, or modern forms of deism, Stenger clearly shows that nothing in modern physics, biology, or cosmology requires supernatural explanation and that those who claim evidence for intelligent design in the universe have made a number of fundamental scientific errors.--From publisher description.

Thinking Beyond the Brain David Lorimer, 2001 Consciousness is the hot topic in scientific circles--its precise nature holding huge implications for the future of science as a viable discipline. And with so many recent advances in brain studies, questions of mind and consciousness have become critically important for both theorists and hard scientists. Are we nothing but a pack of neurons that will in due course reveal their secrets in the laboratory? Or do our conscious mind and self-awareness stem from some dimension beyond material investigation? How, too, are we to account for parapsychological phenomena in which consciousness seems to defy space and time boundaries? These latest contributions to the debate--selected from the annual Beyond the Brain conferences--show that it is time for radical rethinking of our theories and methods in investigating phenomena of the human mind.
