American Cosmic Diana Walsh Pasulka, 2019-02 More than half of American adults and more than seventy-five percent of young Americans believe in intelligent extraterrestrial life. This level of belief rivals that of belief in God. *American Cosmic* examines the mechanisms at work behind the thriving belief system in extraterrestrial life, a system that is changing and even supplanting traditional religions. Over the course of a six-year ethnographic study, D.W. Pasulka interviewed successful and influential scientists, professionals, and Silicon Valley entrepreneurs who believe in extraterrestrial intelligence, thereby disproving the common misconception that only fringe members of society believe in UFOs. She argues that widespread belief in aliens is due to a number of factors including their ubiquity in modern media like *The X-Files*, which can influence memory, and the believability lent to that media by the search for planets that might support life. *American Cosmic* explores the intriguing question of how people interpret unexplainable experiences, and argues that the media is replacing religion as a cultural authority that offers believers answers about non-human intelligent life.

Heaven Can Wait Diana Walsh Pasulka, 2014-10-24 After purgatory was officially defined by the Catholic Church in the thirteenth century, its location became a topic of heated debate and philosophical speculation: Was purgatory located on the earth, or within it? Were its fires real or figurative? Diana Walsh Pasulka offers a groundbreaking historical exploration of spatial and material concepts of purgatory, beginning with scholastic theologians William of Auvergne and Thomas Aquinas, who wrote about the location of purgatory and questioned whether its torments were physical or solely spiritual. In the same period, writers of devotional literature located purgatory within the earth, near hell, and even in Ireland. In the early modern era, a counter-movement of theologians downplayed purgatory's spatial dimensions, preferring to depict it in abstract terms--a view strengthened during the French Enlightenment, when references to purgatory as a terrestrial location or a place of real fire were ridiculed by anti-Catholic polemicists and discouraged by the Church. The debate surrounding purgatory's materiality has never ended: even today members of post-millennial "purgatory apostolates" maintain that purgatory is an actual, physical place. *Heaven Can Wait* provides crucial insight into the theological problem of purgatory's materiality (or lack thereof) over the past seven hundred years.

American Cosmic D.W. Pasulka, 2019-01-23 More than half of American adults and more than seventy-five percent of young Americans believe in intelligent extraterrestrial life. This level of belief rivals that of belief in God. In *American*

Cosmic, D.W. Pasulka examines the mechanisms that foster a thriving belief in extraterrestrial life. Her work takes her from Silicon Valley to the Vatican Secret Archive and reveals how media has supplanted religion as a cultural authority that offers believers answers about non-human intelligent life.

Encounters D. W. Pasulka, 2023-11-07 As seen on The Joe Rogan Experience! A revolution is underway. For the first time in human history, we are at the cusp of experiencing contact with nonhuman life-forms of all kinds due to technological innovations and research into the experiences of people at the forefront of this development. In *Encounters*, author D.W. Pasulka takes readers to the forefront of this revolution, sharing the work of experts across a spectrum of fields who are working to connect humanity with unknown life-forms. Most of us have visions of nonhuman encounters that are shaped far more by Hollywood than they are informed by the current research. *Encounters* rewrites our visions of nonhuman species by featuring the work and stories of contemporary innovators who are rethinking our most basic assumptions about life and its manifestations beyond our experience. The author of *American Cosmic*, D.W. Pasulka is a professor of religion at UNC, Wilmington; her work as a scholar has given her the tools to systematically examine data that exceeds rational categories—exactly the skillset needed to parse the world of UFOs, angels, AI, dreams, and other dimensions, which exist at the edges of human understanding. *Encounters* is a riveting exploration of the leading science of nonhuman life and a bold glimpse of the future of humanity in a universe where we are far from alone.

Arrival of the Supraterrestrial D. W. Pasulka, 2026-07-28 AI, UAP, and the Catholic Visionaries who Saw Our Future In the early 20th century, a censured Catholic visionary predicted that humanity would soon encounter a new form of intelligence—one that would appear alien, but was something far stranger. By the mid-20th century, other Catholic mystics and science fiction visionaries like Arthur C. Clarke echoed similar prophecies, naming the 21st century as the critical threshold. In *Supraterrestrial*, acclaimed author and religious studies scholar D.W. Pasulka uncovers a hidden history of alleged contact between human and non-human intelligences—some framed as angels, others as UFOs/UAP—interwoven with the rise of artificial intelligence and the dream of immortality. Pasulka examines the science of life extension laboratories to the beliefs of UAP experiencers. She unveils a hidden architecture of belief and influence—one in which human consciousness is being reimaged and extended. Drawing on first-person interviews, suppressed histories, and access to insiders in science and tech, *Supraterrestrial* explores a startling new terrain: where the sacred meets the synthetic, and where the next phase of human evolution may already be underway.

Recently, with the latest improvements in image capturing and analytical technology and the proliferation of media and data sources we have acquired fantastic amounts of knowledge about the universe but still do not know how much more there is to be discovered. As J B S Haldane once said: 'The universe is not only stranger than we imagine, it is stranger than we can imagine.' Whatever your position on UFO's, from total believer to a complete skeptic, it's always better to arm yourself with the most up-to-date information on what we currently know, what we think we know and the people and personalities behind the theories and explanations of the various phenomena. *The Reliable Field Guide to UFO Science, Media and Data Sources* recognizes that the concept of "UFO" must also incorporate the possibilities of a wider spectrum of Unidentified Anomalous Phenomena/UAP and explores these concepts and ideas thoroughly. Believing in Bits Simone Natale, Diana Walsh Pasulka, 2020 Believing in Bits advances the idea that religious beliefs and practices have become inextricably linked to the functioning of digital media. How did we come to associate things such as mindreading and spirit communications with the functioning of digital technologies? How does the internet's capacity to facilitate the proliferation of beliefs blur the boundaries between what is considered fiction and fact? Addressing these and similar questions, the volume challenges and redefines established understandings of digital media and culture by employing the notions of belief, religion, and the supernatural.

Stories from The Messengers Mike Clelland, 2020-08-20 This is a companion to the groundbreaking ideas that began with Mike Clelland's earlier book, *The Messengers*. It is a further exploration into the connection, both symbolic and literal, between owls and UFOs. There is a strangeness to these accounts that defies any simple explanation. Each chapter tells a deeply personal story where these mysterious experiences are explored in depth. The book reads like a collection of short stories. The ancient mythology of the owl is repeating itself within the modern UFO report. What plays out is a journey of transformation, with an owl at the heart of each story.
