Validity Assessment in Rehabilitation Psychology and Settings Dominic A. Carone,Shane S. Bush,2018 This is the first book devoted to the topic of validity assessment in rehabilitation contexts and is written by two board certified psychologists with extensive experience in clinical neuropsychology and rehabilitation psychology. This book describes (a) why validity assessment is important, (b) validity assessment methods, and (c) special topics related to validity assessment in rehabilitation psychology (e.g., managing invalid presentations, mild traumatic brain injury, forensic and disability applications, ethical considerations). Although primarily intended for the rehabilitation psychologist who is new to the topic of validity assessment, this book is also designed to be helpful to other rehabilitation specialists, students and trainees, and psychologists experienced in validity assessment, including neuropsychologists.

Conducting Prescribed Fires John R. Weir,2009-10-26 Landowners and managers, municipalities, the logging and livestock industries, and conservation professionals all increasingly recognize that setting prescribed fires may reduce the devastating effects of wildfire, control invasive brush and weeds, improve livestock range and health, maintain wildlife habitat, control parasites, manage forest lands, remove hazardous fuel in the wildland-urban interface, and create residential buffer zones. In this practical and helpful manual, John R. Weir, who has conducted more than 720 burns in four states, offers a step-by-step guide to the systematic application of burning to meet specific land management needs and goals.

Wildlife Ecology and Management Christopher E. Comer,Eric G. Bolen,William L. Robinson,2025-01-24 For over 40 years, Bolen and Robinson's exceptional text, *Wildlife Ecology and Management*, has been a noteworthy and comprehensive introduction to the art, science, and practices of wildlife management in the United States. Now, in its Sixth Edition, new contributing author Christopher Comer continues their legacy, accentuating the integration of ecology and wildlife management with new developments in the issues and challenges wildlife managers face every day. As awareness continues

to grow of the complexities generated by the interactions of wildlife and society, the authors discuss these concerns with nongame and endangered wildlife, exotic species, wildlife diseases, conservation biology, and urban wildlife. Technology has fundamentally changed how wildlife managers learn about and manage wildlife; effective and informative advances include spatial analysis, molecular techniques, and methods to detect different species. A seminal text, *Wildlife Ecology and Management* continues to provide valuable insight into a dynamic and multifaceted field.

Models, Strategies, and Methods for Effective Teaching Hellmut R. Lang,David N. Evans,2006 Practical in approach, this text focuses on how both pre-service and experienced teachers can demonstrate the attributes, acquire the competencies, and meet the standards essential to effective teaching. The framework for the text is the Teacher Competency Profile. Chapter by chapter, the essential knowledge and skills for effective teaching are presented. Each chapter contains recent research and best practice information with respect to the theme discussed. This is followed within each chapter with guidelines for teaching, practical approaches to information, extensive examples, cases, and activities. The sequential framework guides the pre-service student s professional development from basic teaching approaches to sophisticated strategies, methods, and skills. By identifying the essential competencies of teaching and providing guidelines for meeting professional standards, this text is also of value for use in seminars, workshops, and professional reading by practicing teachers.
