State-of-the-Art Technologies in Food Science Murlidhar Meghwal, Megh R. Goyal, 2018-08-14 There has been a growing interest in the health benefits derived from fruits and vegetables and the food products based on them. Many foods contain various phytochemicals, flavonoids, fibers, macronutrients and micronutrients, minerals, etc. that are good for health and essential for keeping good health. This volume provides a global perspective of the current state of food and health research, innovation, and emerging trends. It focuses on topics of food for better health, including functional foods and nutraceutical foods. The book is divided into several sections, covering: • Foods for Human Health Promotion and Prevention of Diseases, which include fruits, vegetables, and grains: their peels and fiber for better human health, health prospects of bioactive peptides derived from seed storage proteins, mushrooms as a novel source of antihyperlipidemic agents, and emerging foodborne illnesses and their prevention. • Specific Fruits, Spices and Dairy-Based Functional Foods for Human Health, which looks at the functional medicinal values of fenugreek, fruits as functional foods, and functional fermented dairy products. • Issues, Challenges, and Specialty Topics in Food Science, which focuses mainly on the stability issues of whole wheat flour, physicochemical properties and quality of food lipids, methods for food analysis and quality control, and interventions of ohmic heating technology in foods. The volume will be of interest to health practitioners, food specialists, nutrition producers and suppliers, practicing food process engineers, food technologists, researchers, food industry professionals, and faculty and upper-level students in food science.

Opportunities in the Nutrition and Food Sciences Institute of Medicine, Committee on Opportunities in the Nutrition and Food Sciences, 1994-02-01 Thanks to increased knowledge about nutrition, many threats to human health have been curbed. But there is much more to be learned. This new volume identifies the most promising opportunities for further progress in basic and clinical research in the biological sciences, food science and technology, and public health. The committee identifies cross-cutting themes as frameworks for investigation and offers a history of nutrition and food science research with nine case studies of accomplishments. The core of the volume identifies research opportunities in areas likely to provide the biggest payoffs in enhancing individual and public health. The volume highlights the importance of technology and instrumentation and covers the spectrum from the effects of neurotransmitters on food selection to the impact of federal food programs on public health. The book also explores the training of nutrition and food scientists. This comprehensive resource

will be indispensable to investigators, administrators, and funding decisionmakers in government and industry as well as faculty, students, and interested individuals.

Smart and Intelligent Food Packaging Swarna Jaiswal, Kalpani Y. Perera, Amit K. Jaiswal, 2025-12-19 Smart and Intelligent Food Packaging: Innovations and Insights, a new volume in the Sustainable Food Packaging series, is a comprehensive guide to the latest developments in the field of packaging technology, with a focus on the integration of smart and intelligent features to enhance product quality, safety, and sustainability. Organized into three sections, the book covers fundamental concepts and technologies as well as real-world applications and case studies, providing readers with a complete understanding of the latest trends and best practices in this rapidly evolving field. With the growing importance of sustainability and increasing demand for sustainable and efficient packaging solutions, this series of books represents a comprehensive guide to navigating this rapidly evolving landscape. - Covers smart and intelligent packaging topics, including emerging technologies, sustainability, consumer perception, and successful case studies - Brings real-world examples and case studies of successful implementation of smart and intelligent packaging in the food industry - Offers practical recommendations and best practices for companies looking to adopt smart and intelligent packaging, reduce environmental impact, and improve food safety and quality control

Low-Temperature Processing of Food Products Seid Mahdi Jafari, Hadis Rostamabadi, 2024-03-30 Approx. 460 pages - Thoroughly explores novel applications of low-temperature unit operations in food industries - Brings innovative freezing technologies - Clarifies phase change of water, freezing processes, mass and heat transfer phenomena

Microbiological Guidelines Collective, 2018-04-04 Food plays an essential part in everyday life. Food should be tasty, healthy, sustainable and preferably not too expensive. But food should also be safe and with sufficient guarantees on maintaining good quality aspects until the end of shelf life. The various actors in the food supply chain have an interest in verifying the expected quality and safety by means of microbiological analyses of food. Measurement brings knowledge and microbiological guidelines help in the decision-making process for judging the acceptability of food or food production processes. The present handbook provides microbiological guidelines and current applicable EU legal criteria (status 1.1.2018) for a wide range of food categories (dairy, meat, seafoods, plant-based foods, bakery products, composite foods, shelf-stable food, water) and subcategories therein, based upon the type of food processing and intrinsic characteristics of the foods. This book can be consulted to provide quick answers on the expected microbiological contamination of foodstuff. It can help in interpretation of test results in assessing good (hygienic) practices in the production of food, determining the shelf life and ensuring food safety. The handbook also presents definitions of the wide variety of foodstuffs available and some reflections on, in particular, food safety issues or the on-going debate for some food items in assessing microbial quality. This book provides crucial information about food safety, for the use of students and professionals. EXTRACT First

we eat, then we do everything else M.F.K. Fisher Food plays an important part in everyday life. But when being a food scientist or in the food business, food gets to be an even bigger part of your life. Our team at the Food Microbiology and Food Preservation research group (FMFP-UGent) at Ghent University during its academic tasks in education, research, scientific activities at committees, but also in interaction with many food companies and stakeholders in the food supply chain in projects or contract work, has built up considerable expertise on the microbiological analysis of a large variety of foodstuffs. Being situated in Ghent, and thus close to Brussels, the heart of Europe, we intrinsically have to understand and deal with legal EU criteria or action limits. The latter is the reason why this book is mainly oriented towards inclusion or making reference to EU legal microbiological criteria for foodstuffs as well.

ABOUT THE AUTHORS The main author, Prof. Mieke Uyttendaele, leads, together with Prof. Frank Devlieghere, the Food Microbiology and Food Preservation Research Group (FMFP-UGent) at Ghent University, Belgium. Her teaching and research area covers aspects of microbiological analysis of foods, food safety and food hygiene. She has built over twenty years of experience by executing, initiating and coordinating various projects in this research discipline dealing with sampling and testing to collect baseline data on the microbial contamination of foods, looking into the virulence of food-borne pathogens, elaborating challenge testing to study the behavior of food-borne pathogens. All this information serves as an input for quality assurance and microbial risk assessment to support food safety decision-making and setting microbiological criteria. She was/is the promotor of more than 25 Ph.D students (including EU and non-EU citizens). Throughout her career, Prof. Uyttendaele has published more than 270 peer reviewed scientific papers, authored several book chapters and presented at numerous international Conferences/Workshops. Throughout the years she has also used her scientific expertise in interpretation of test results for analyses obtained in routine monitoring or analysis executed at the food service lab at FMFP-UGent.

Liposomal Encapsulation in Food Science and Technology C. Anandharamakrishnan, Sayantani Dutta, 2022-09-30

Liposomal Encapsulation in Food Science and Technology provides all the possible applications of liposomes in food and allied systems, along with recent advances made in these fields. This helps researchers in food science and technology, as well as those in interdisciplinary fields, better explore the opportunities that liposomal encapsulation offers. Among other topics, the book covers formulation and characterization of liposome, liposome mediated encapsulation of antimicrobials and probiotics, liposome-assisted delivery of enzymes and proteins, and liposome for delivery of dietary nutrients and nutraceuticals, etc. This approach facilitates building better dedicated or tandem approaches in respective fields for process/product development. Written by an international team of contributors, the book will aid academicians in developing more industry useful tools/techniques/products.

- Brings a broader overview of different modules of liposomal encapsulation of bioactive food supplements
- Provides all the possible applications of liposomes in food and allied systems, along with recent advances made in these fields
- Includes chemical, physical, medical and stability related chapters

Successful Aging Daniel J. Levitin,2020-01-07 INSTANT TOP 10 BESTSELLER • New York Times • USA Today • Washington Post • LA Times “Debunks the idea that aging inevitably brings infirmity and unhappiness and instead offers a trove of practical, evidence-based guidance for living longer and better.”—Daniel H. Pink, author of *When and Drive*
SUCCESSFUL AGING delivers powerful insights: • Debunking the myth that memory always declines with age • Confirming that health span—not life span—is what matters • Proving that sixty-plus years is a unique and newly recognized developmental stage • Recommending that people look forward to joy, as reminiscing doesn't promote health
Levitin looks at the science behind what we all can learn from those who age joyously, as well as how to adapt our culture to take full advantage of older people's wisdom and experience. Throughout his exploration of what aging really means, using research from developmental neuroscience and the psychology of individual differences, Levitin reveals resilience strategies and practical, cognitive enhancing tricks everyone should do as they age. *Successful Aging* inspires a powerful new approach to how readers think about our final decades, and it will revolutionize the way we plan for old age as individuals, family members, and citizens within a society where the average life expectancy continues to rise.
