Glenda Tibe Bonifacio,Roxanna Balbido Epe

Disasters in the Philippines Glenda Tibe Bonifacio,Roxanna Balbido Epe,2023-04-28 Bringing together the voices of local scholars in the Philippines, this book offers critical insights into one of the world's most disaster-prone regions. The Asia-Pacific region is one of the most vulnerable regions in the world, with the effects of climate change contributing to rising sea levels and increasingly frequent typhoons and floods. Case studies in this book examine such disasters, including the aftermath of 2013 super typhoon Haiyan. Discussions are centered around four themes: women and empowerment, economics and recovery, community and resilience, and religion and spirituality. Through its analysis, the book demonstrates the scopes, inequities, and inefficiencies of policies and responses, as well as forms of empowerment and resilience, in meeting challenges in disaster-afflicted communities in the Philippines. Its conclusions provide a more nuanced and grounded perspective of policies, practices, and approaches in the sociology of disasters today.

Time Out Venice Editors of Time Out,2014-11-17 Think 'Venice', and images of gondolas drifting along misty canals and pigeon-feeding visitors dwarfed by the splendor of St. Mark's and its square come unavoidably to mind. If it's Venetian icons of the sort you're looking for, this magical city will never disappoint. But for a more rounded experience, the longtime residents and experts who have contributed to the sixth edition of the Time Out Venice guide will lead you down back streets and into campi and calli where few tourists tread: to hidden churches with hidden artworks; to architectural and sculptural gems in concealed courtyards; and to districts where the everyday life of Venice goes on in time-honored, washing-festooned, market-haggling fashion. And the guide will take you beyond, out across the lagoon to verdant islands and swimming beaches, as well as to the magnificent cities — Padua, Verona, Vicenza, Treviso — and countryside of the mainland Veneto region. Highlights: • Venture beyond the well-worn trail from St Mark's to the Rialto and perfect the art of getting blissfully lost in the Venetian labyrinth • Explore art-packed churches and breathtaking museums • Escape the menu turistico and discover Venice's authentic eateries

The second European Colonialism Ruben Ygua,2025-05-04 Traditional methods of studying the past have always given greater importance to nationalist, religious and moral interests, which subordinated the historical fact to the System point of view. The time has come to simplify and show respect for our ancestors, striving to know what really happened in the past, and not just what they want to inform us about. After so many years of studying History, I came to the conclusion that the best study system is through an impartial, objective Chronology that just put each event in its exact place in time, revealing History without manipulation. This Chronology contains not only purely political facts, such as the foundation of cities, the birth of kingdoms and empires, scientific and geographical discoveries, natural disasters and epidemics; it also includes information on the most different fields of human activity: chemistry, astronomy, geography, mathematics, and so on. In parallel, the chronology is complemented by data that do not belong to a specific date, but to an entire epoch, they are each society generalities, curiosities, customs, the religion of each civilization, inventions or discoveries that cannot be placed in an exact date, etc. The result of all this set is one of the most complete chronologies within its reach, periodically updated with the latest archaeological and scientific discoveries, and that transforms the reader into an eyewitness of the past,

understanding the relation of geographically distant facts to each other, but closely connected in time and influencing unexpected consequences. This is something that traditional history has generally ignored when it was not usable. A work of this magnitude could not be published in a single book, so I have divided it into several collections, and the Spanish originals are being translated into French, English, Italian and Portuguese. The chronology goes from prehistory to the present day year by year, as far as possible. For those who prefer a deeper and more detailed study, I have prepared a second chronology, day by day, which for now covers from 1789 to 1946, divided into five collections.
