White Supremacy and the American Media Sarah D. Nilsen, Sarah E. Turner, 2021-11-29 This volume examines the ways in which the media, including film, television, social media, and gaming, has constructed and sustained a narrative of white supremacy that has entered mainstream American discourse. With chapters by today's preeminent critical race scholars, the book looks in particular at the ways media institutions have circulated white supremacist ideology across a wide range of platforms and texts that have had significant impact on shaping our current polarized and racialized social and political landscape. Systematically scrutinizing every media platform, this volume provides readers with an understanding of the ways in which media has provided institutional support for white supremacist ideology, and presents them with the means to examine and analyze the persistence of these narratives within our racial discourse, thus offering the necessary knowledge to challenge and transform these racially divisive and destructive narratives. *White Supremacy and the American Media* will be of interest not only to scholars working in critical race studies and popular culture in the United States, but also to those working in the fields of Film and Television Studies, Sociology, Geography, Art History, Communication and Media Studies, Cultural Studies, American Studies, Popular Culture, and Media Studies.

Social Justice, Decoloniality, and Southern Epistemologies within Language Education Vander Tavares, 2023-03-03 With a strong focus on decoloniality and social justice, this volume brings together critical theories, concepts, and practices on TESOL from multiple Brazilian perspectives. The chapters showcase the work of teachers and teacher educators in confronting sociopolitical issues in Brazil, including in the domains of democracy, language education, and knowledge production, as well as prevailing issues within TESOL itself. Contributions stem from an eclectic range of analytical orientations that reflect ontological and epistemological diversity while demonstrating why, where, and how TESOL is done in Brazil. In doing so, this volume also establishes a place for Southern voices to be heard in the move toward challenging complex and long-standing issues of representation, marginalization, and exclusion that have traditionally characterised North-South relations in TESOL as a field. This volume seeks to promote Southern-based conversations about decoloniality and social justice in TESOL and will be of direct relevance to graduate students, researchers, and scholars in the field of TESOL and foreign language education.

Exploring Teachers in Fiction and Film Melanie Shoffner, 2016-03-31 This book about teachers as characters in

popular media examines what can be learned from fictional teachers for the purposes of educating real teachers. Its aim is twofold: to examine the constructed figure of the teacher in film, television and text and to apply that examination in the context of teacher education. By exploring the teacher construct, readers are able to consider how popular fiction and film have influenced society's understandings and views of classroom teachers. Organized around four main themes—Identifying with the Teacher Image; Constructing the Teacher with Content; Imaging the Teacher as Savior; The Teacher Construct as Commentary—the chapters examine the complicated mixture of fact, stereotype and misrepresentation that create the image of the teacher in the public eye today. This examination, in turn, allows teacher educators to use popular culture as curriculum. Using the fictional teacher as a text, preservice—and practicing—teachers can examine positive and negative (and often misleading) representations of teachers in order to develop as teachers themselves.

The Lacanian Teacher Nick Stock, Nick Peim, 2025-06-11 What does it mean to be a Lacanian teacher? This book responds through three avenues: what Lacan had to say about teaching, how Lacan taught his seminars, and what his theoretical ideas might have to say about teaching in general. The authors propose a rethinking of the teacher, the relationship between teacher and their fantasmatic educational landscape, a deconstruction of pedagogy, and a consideration of the teacher's enjoyment. An original understanding of the ontological dimension of education is proposed, along with an account of the implications this has for the thinking and being of a teacher. This book represents a valuable addition to the emerging body of Lacanian critical work in education and offers fresh insights for practitioners and scholars in the fields of education and psychoanalysis.

Handbook of Research on Social Justice and Equity in Education Keengwe, Jared, 2022-05-06 There is growing pressure on teachers and other educators to understand and adopt the best ways to work with the various races, cultures, and languages that diverse learners represent in the ever-increasing culturally-diverse learning environments. Establishing sound cross-cultural pedagogy is also critical given that racial, cultural, and linguistic integration has the potential to increase academic success for all learners. To that end, there is also a need for educators to prepare graduates who will better meet the needs of culturally diverse learners as well as support their students to become successful global citizens. The Handbook of Research on Social Justice and Equity in Education highlights cross-cultural perspectives, challenges, and opportunities pertaining to promoting cultural competence, equity, and social justice in education. It also explores multiple

concepts of building a bridge from a monocultural pedagogical framework to cross-cultural knowledge. Covering topics such as diversity education and global citizenship, this major reference work is ideal for academicians, researchers, practitioners, policymakers, instructors, and students.

Leadership, Learning, Well-being, and Justice in Educational Organizations José Matias Alves , Mireia Tintoré, Lídia Jesus Pecegueiro Serra, 2025-03-21 Educational leadership is a pivotal factor influencing student learning, second only to direct classroom instruction. Leaders in educational settings are tasked with shaping a collective vision for inclusion and fostering a school culture centered on social justice and well-being, ensuring success for every student. The role of leadership in mobilizing and inspiring purposeful, interdependent action through a shared vision is crucial for leveraging teachers' professional capital, fostering a climate of innovation and inclusion, and enhancing teachers' agency and learning cultures within educational organizations. Despite the diversity of leadership styles — ranging from toxic to transformational, laissez-faire to instructional, and charismatic to servant — understanding their effects is essential, especially given the pressing need to construct new, inclusive educational environments. Current research highlights the importance of educational

leadership practices that promote personal, professional, organizational, and social well-being, yet there remains a significant gap in comprehensively understanding how these practices can be optimized to foster quality teaching and inclusive learning.
