**James D. Torr**

Justifying America's Wars Nicholas Kerton-Johnson, 2010-09-13 This book examines the justifications for, and practice of, war by the US since 1990, and examines four case studies: the Gulf War, Kosovo, Afghanistan and Iraq. The author undertakes an examination of presidential speeches and public documents from this period to determine the focal points on which the respective presidents based their rhetoric for war. The work then examines the practice of war in the light of these justifications to determine whether changes in justifications correlate with changes in practice. In particular, the justificatory discourse finds four key themes that emerge in the presidential discourses, which are tracked across the case studies and point to the fundamental driving force in US motivations for going to war. The four key themes which emerge from the data are: international law or norms; human rights; national interest; and egoist morality (similar too, but wider than, 'exceptionalism'). This analysis shows that 9/11 resulted in a radical shift away from an international law and human rights-focused justificatory discourse, to one which was overwhelmingly dominated by egoist-morality justifications and national interest. This book will be of much interest to students of US foreign policy, humanitarian intervention, Security Studies, and IR theory.

Rethinking Japanese Public Opinion and Security Paul Midford, 2011-01-24 Rethinking Japanese Public Opinion and Security argues that Japanese public opinion matters and has acted to prevent overseas military deployments involving combat while increasingly supportive of a more normal military establishment capable of autonomously defending Japanese territory.

*Public Opinion and International Intervention* Richard Sobel, Peter A. Furia, Bethany Barratt, 2012-05 Rarely has a foreign policy event spawned such interest in international public opinion as has the Iraq War. What does this war indicate about the extent to which public opinion influences foreign policy leaders? Have leaders' decisions about participating in the Iraq Coalition reflected the willingness of their citizens to do so? Are leaders of some countries more responsive to public opinion than others? The editors address these questions using select case studies that explore the extent to which leaders and people in democracies that are capable of participating in the Iraq War Coalition have willingly done so. Each chapter is based on the premise that democracies are most responsive to public opinion and that the wealthiest democracies would be most capable, though not necessarily most willing, to participate in the Iraq War. The editors have assembled contributions that build on the successful model of Richard Sobel's *International Public Opinion and the Bosnia Crisis*. In this Iraq volume, leading scholars debate the role of public opinion in particular countries' decisions to participate—or not—in an international conflict, making it an essential text for any foreign policy course.

*God's End Time Moves* Ida ZaraGrace Iyen-Aghedo, 2018-12-13 God's End-Time Moves is as much about the outpouring of God's Holy Spirit as it is about the affirmation of His Truth and Word, both of which shall touch down everywhere on earth. This book is a work of the End-Time Prophetic Mission, to show in what direction the Lord God of All Creation will be leading the world and, even more so, the Church. God is set to show in every way that the world is not in place by accident, and the Spirit of God will appear to walk on two feet while still being solidly Spirit. In His mercy and grace, God always allows an adequate period of preparation so that no one will be caught unaware, except by personal choice. God's End-Time Moves, therefore, is His wakeup call!

**Here's Looking at You** Ernest D. Giglio, 2010 Now in its third edition, *Here's Looking at You: Hollywood, Film and Politics* examines the tangled relationship between politics and Hollywood, which manifests itself in celebrity involvement in political campaigns and elections, and in the overt and covert political messages conveyed by Hollywood films. The book's findings contradict the film industry's assertion that it is simply in the entertainment business, and examines how, while the majority of Hollywood films are strictly commercial ventures, hundreds of movies - ranging from *Birth of a Nation* to *Capitalism* - do indeed contain political messages. This new edition has been updated with new photos and cartoons, and

includes two new chapters, one on Afghan-Iraqi war films and the other on the treatment of race and gender in Hollywood films, that are sure to stimulate discussion. Here's Looking at You serves as a basic text for political film courses and as a supplement in American government and film studies courses, and will also appeal to film buffs and people in the film industry.

**Military Intervention in the name of Democracy?** Marina Fernandez Arroyo, 2017-03-01 Document from the year 2016 in the subject Politics - Topic: Public International Law and Human Rights, , language: English, abstract: President Obama acknowledged in the final State of the Union Address of his presidency last January 2016, we should have learnt by now the lessons of Vietnam and Iraq. The country that flags itself as the land of freedom and democracy, justifies their militarily interventions abroad by reasons of US security and placement of democracy. At this point one would wonder, could democracy really be implemented through foreign military intervention? This paper will analyse: In the first place, the legal basis established by the United Nations to consider a military intervention lawful, and the democratic mechanisms of adoption within domestic law systems to decide whether to initiate a military intervention. Secondly, the moral basis to impose democracy abroad and the criteria to choose the country that will be object of change. And finally, how successful was the implementation of democracy in countries which were dictatorial regimes such as Iraq and Afghanistan. This paper finds that the imposition of democracy by force is not justified under international law and that imposition by force is not democratic. Meanwhile, promoting democracy is democratic and much safer. Iraq and Afghanistan are the living proof of catastrophic implementation. Besides, the justification of invading a country in order to establish democracy loses its credibility when we notice that undemocratic countries are still good allies. Domestically, it is generally the executive power that decides to wage war. This shows that there is little popular participation in such important choices.

*The Renegotiation of the Just War Tradition and the Right to War in the Twenty-First Century* Cian O'Driscoll,2008-03-15 This book examines the manner by which the just war tradition has been invoked, engaged, and developed in the context of the war on terror. It pays particular attention to the questions of anticipatory war, humanitarian intervention, and punitive war, and looks to compare current thinking on these issues to classical ideas about when and how war might be justified. In doing so, it draws our attention to the renegotiation of the right to war that is taking place in the post-9/11 world, while also illuminating the stories of change, continuity, and contestation that underpin the ongoing development of the just war tradition.
