Traditional Economy Fouad Sabry, 2024-01-08 What is Traditional Economy A traditional economic system is one that is founded on ancient practices, historical precedents, and long-held beliefs. A traditional economy is a type of economic system in which the commodities and services that are produced by the economy, as well as the rules and manners in which they are distributed, are influenced by the traditions, practices, and beliefs that are prevalent in the economy. There is a strong correlation between this type of economic structure and rural and agriculturally-based nations. Bartering and trading are the defining characteristics of a traditional economy, which is often referred to as a subsistence economy. When there is a small surplus of products produced, they are often distributed to a controlling authority or landowner. If there is any surplus of goods, they are also distributed.
