Urban Geography Michael Pacione, 2009 This is the most comprehensive and readable book on urban geography in the array of contemporary literature on the subject.

Cities of North America Lisa Benton-Short, 2013-12-12 This timely text provides a comprehensive overview of the dramatic and rapidly evolving issues confronting the cities of North America. Metropolitan areas throughout the United States and Canada face a range of dynamic and complex concerns—including the redistribution of economic activities, the continued decline of manufacturing, and a global growth in services. The contributors provide compelling examples: Inner cities have experienced both gentrification and continued areas of segregation and poverty. Downtown revitalization has created urban spectacles that include festivals, marketplaces, and sports stadiums. Older, inner-ring suburbs now confront decline and increased poverty, while the outer-ring suburbs and exurbs continue to expand, devouring green space. The book explores how the combined processes of urbanization and globalization have added new responsibilities for city governments at the same time leaders are grappling with planning, economic development and finance, justice, equity, and social cohesion.

Cities have become the stage upon which new forms of ethnic, racial, and sexual identities are constructed and reconstructed. They are also connected to wider ecological processes as urban spaces are compromised by manmade and natural disasters alike. Introducing contemporary spatial arrangements and distributions of activities in metropolitan areas, this clear and accessible book covers economic, social, political, and ecological changes. It is also the only text to include the physical geography of urban areas. Bringing together leading geographers, it will be an ideal resource for courses on urban geography and geography of the city. Contributions by: Matthew Anderson, Lisa Benton-Short, Geoff Buckley, Christopher DeSousa, Bernadette Hanlon, Amanda Huron, Yeong-Hyun Kim, Nathaniel M. Lewis, Robert Lewis, Deborah Martin, Lindsey Sutton, John Tiefenbacher, Thomas J. Vicino, Katie Wells, and David Wilson.

Human Geography Erin H. Fouberg, Alexander B. Murphy, 2020-01-22 Fouberg/Murphy: Human Geography: People, Place, and Culture, 12th Edition, teaches students to appreciate the diversity of people, places, and cultures, and understand the role people play in shaping our world. The goals of this edition are to provide geographic context to global, regional, national, and local issues and to teach students to think geographically and critically about these issues. Human Geography features beautifully designed maps, dozens of vibrant photographs taken by the author team, and author and guest field notes that help students see how geographers read cultural landscapes and use fieldwork to understand places. Fouberg's Human Geography, 12th Edition, now integrates Threshold Concepts to help students develop their ability to think geographically. Once they learn and apply one of these concepts in the context of a given place, students integrate it into their thinking and can draw from it as they learn new material and explore other places.

CORP 2011 Proceedings/Tagungsband Manfred Schrenk, Vasily V. Popovich, Peter Zeile,

New Patterns Michael Carr, 1997 This text introduces modern geographical theory in an accessible format and reflects the changing nature of the subject. The in-depth analysis of topics, consolidated by extensive reference to case study material makes this textbook an essential.

The North American City Maurice Yeates,1990 The fourth edition of the North American City, like its predecessors, is intended primarily as a textbook for undergraduates, principally at universities and colleges in the United States and Canada. The aim is to provide an overview of the broad scope and increasingly diversified nature of the geographer's interests in, and contributions to, the study of cities. This overview therefore lays the foundations for more advanced study in the field relating to the book's three main themes: the organization of the city system, the internal structure of the city, and public policy relating to urban issues.
