**Good to Great** E. Z. - Reader, 2016-06-03 This is a SHORTENED VERSION of the original book; to help you understand the book faster and better! Good to Great: Shortened Version (Into 35 Pages or Less)! Why Some Companies Make the Leap...And Others Don't Good to Great is a book written by American author, business consultant and lecturer on the subjects of company sustainability and its economic growth, Jim Collins. Collins enrolled Stanford University and studied Mathematic and managed to obtain his MBA, which was followed by eighteen months of working as a consultant with McKinsey and Co. Afterwards he worked as a product manager for Hewlett and Packard. Besides writing this book, Collins also wrote or co-authored all together six books and all of them were based on his research. One of the books he wrote was built to Last, a book that was best-seller for more than six years and a book that was also translated into twenty-five languages. Good to Great: Why Some Companies Make the Leap...And Others Don't talks about what makes crucial difference between companies that do good and companies that do great business. There the author continues and explains that even though initially there is nothing wrong with 'good', but later that 'good' can and often does, prevent us from achieving more of our potential. Good will keep us satisfied with current situation, but because of this satisfaction we will be unable and unwilling to try to achieve something more. Things are similar in business. While there are many companies that are good, there are only a few companies that exceed at what they do, which means that there are many companies that are somewhat 'stuck' in being good. This book offers ways how to understand what distinguishes good and great companies and what each company should do in order to achieve being 'great', which makes it excellent literature for businessmen. **Good to Great** Jim Collins, 2001 The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the

mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

**Summary** Wisdom-Summary, 2020-08-24 A Complete Summary of Good to Great Jim Collin's Good to Great examines companies that have not only endured over time, but who managed the transition from being good companies to becoming outstanding performers. The eleven companies found to have taken this leap managed to outperform the stock market 6.9 times over fifteen years. The author set out to understand what distinguished great organizations from a carefully selected group of companies that did not make the grade. The research team came up with some unexpected outcomes. At the time of the transition from Good to Great all eleven companies were being led by Level 5 Leaders. These people showed a unique combination of humility and professional will. They were prepared to do anything necessary for the benefit of the organization. Level 5 Leaders started out, not by plotting the direction of the company, but by ensuring that they had all the

right people in the right positions. Then they confronted the brutal facts of their organization, and used this knowledge to ensure that they chose the right direction for the firm. Knowing what the organization should be doing-and equally importantly what it should not be doing-they stuck stubbornly to the plan even when they were in dire circumstances. The culture of discipline within the organization ensured that the path to excellence would eventually be met. Patience, endurance and discipline, doggedly sticking only to what the company did best, resulted in outstanding results. This investigation of what distinguished the great from the mediocre is an excellent study of what is needed to build great organizations. **Pastoral Leadership** Won Sang Lee, 2015-01-14 In ascending to heaven, Jesus Christ gave the church the Great Commission to expand the gospel to all nations. Despite this biblical commission, it is still an unfinished task. As leaders of

local churches, pastors play a crucial part in this endeavor. Pastoral leadership principles have varied widely throughout history, yet it is interesting to discover the similarities between pastoral leadership principles practiced by John Chrysostom (AD 347-407) in Antioch and Constantinople, and Won Sang Lee (1937-) in Washington, DC. Despite ministering 1600 years apart, both pastors share the same core values: care for people, Christ-like character, biblical preaching, and world missions. This suggests that continued emphasis on these principles will play a significant role in fulfilling the Great Commission, independent of time and place.

**One Sacred Effort** Chad Brand, David Hankins, 2006-05-01 The preamble of the original constitution of the Southern Baptist Convention describes the purpose of the SBC as “eliciting, combining, and directing the energies of the whole denomination in one sacred effort, for the propagation of the Gospel.” These words are not only historically significant; they convey the mission and purpose and distill the distinct facets of the SBC Cooperative Program. One Sacred Effort looks close at this unique and enduring ministry operation.
