Governing Natural Resources for Sustainable Peace in Africa Obasesam Okoi,Victoria R Nalule,2023-12-18 This book examines the dynamics of natural resource conflicts in Africa and explores the different governance approaches for securing sustainable peace. One of the most prominent challenges facing Africa today is the consequences of natural resource extraction. While these resources hold the potential for economic transformation across Africa, their extraction also comes with a range of environmental, social, and economic consequences, including issues related to governance. This book assembles a unique cohort of peacebuilding, environmental justice, and sustainable development scholars and practitioners from Africa and beyond to examine the dynamics of natural resource conflict and explore the governance approaches that offer pathways for sustainable peace in Africa. Drawing on case studies and empirical lessons from the Horn of Africa, Southern Africa, West Africa, East Africa, and the Central Sahel region, along with the African Union, the multidisciplinary contributors offer fresh insights into the nature of natural resource conflict in Africa, delve deeper into the complexities of natural resource governance, and highlight the interplay between resource governance and sustainable peace. By shedding light not only on Africa's experiences and vulnerabilities but also on the challenges of natural resource governance, this book fills a crucial gap in understanding the connection between natural resource governance, conflict, and pathways for sustainable peace in Africa. Drawing on a range of disciplinary perspectives, this book will be of interest to students and scholars of natural resource governance, peace and conflict studies, environmental policy and justice, sustainable development, security studies and African studies more widely.

Bakassi: Or the Politics of Exclusion and Occupation? Fongot Kini-Yen,2012-05-15 This is a complex volume that combines a good deal of survey data on Bakassi and its populations with more ethnographically based insights into the conditions of the Bakassi communities. The book is the outcome of research carried out by Fongot Kini between 2004 and 2009. The work is intended to serve as first hand exhaustive information on the live situation in the contested Bakassi Cameroon-Nigeria border region. The term Bakassi engenders multiple meanings loaded with many conflicting emotional,

spiritual and material interests. Native inhabitants are systematically disinherited of their ancestral cultural heritage and socio-economic resources. They are bastardised, humiliated and scammed by unscrupulous opportunists who deliberately misidentify them with intentions of dispossessing them of their ancestral lands and natural resources. Overall the author is in sympathy with the Bakassi who he argues have been marginalised and neglected by the Cameroon state. In particular, the value of the indigenous communities in terms of local economies as well as securing this vital border area has not been recognised and various external groups have been either allowed or encouraged to settle there to both the detriment of local populations and to the security of the region.

Planning in Contemporary Africa Ambe J. Njoh,2003 Why do authorities in post-colonial African states continue to employ European or Western planning models? What are the implications for different societal groups of adopting such models? Several decades following independence, this outstanding volume provides in-depth empirical research to uncover the answers to such questions. The book focuses in particular on Cameroon, the only African country to have been colonized by three different European powers: Germany, Britain and France. It discusses the nature of the state in peripheral capitalist countries and sets current planning and land use policies in their historical, colonial and post-colonial contexts. The author then proceeds to examine key planning issues such as housing, land ownership, sustainable development, environmental and waste management, transportation, infrastructure and gender. In addition to analyzing the impact of colonialism and imperialism on the built environment in Cameroon in particular and sub-Saharan Africa in general, the book also addresses global issues about urbanism and will be particularly relevant to those interested in planning, regional studies and development, and development geography.
