

Greater Inscription Of The Gladiator

Valerie M. Hope

Gladiators Roger Dunkle, 2013-09-13 The games comprised gladiatorial fights, staged animal hunts (venationes) and the executions of convicted criminals and prisoners of war. Besides entertaining the crowd, the games delivered a powerful message of Roman power: as a reminder of the wars in which Rome had acquired its empire, the distant regions of its far-flung empire (from where they had obtained wild beasts for the venatio), and the inevitability of Roman justice for criminals and those foreigners who had dared to challenge the empire's authority. Though we might see these games as bloodthirsty, cruel and reprehensible condemning any alien culture out of hand for a sport that offends our sensibilities smacks of cultural chauvinism. Instead one should judge an ancient sport by the standards of its contemporary cultural context. This book offers a fascinating, and fair historical appraisal of gladiatorial combat, which will bring the games alive to the reader and help them see them through the eyes of the ancient Romans. It will answer questions about gladiatorial combat such as: What were its origins? Why did it disappear? Who were gladiators? How did they become gladiators? What was their training like? How did the Romans view gladiators? How were gladiator shows produced and advertised? What were the different styles of gladiatorial fighting? Did gladiator matches have referees? Did every match end in the death of at least one gladiator? Were gladiator games mere entertainment or did they play a larger role in Roman society? What was their political significance?

The Gladiators Fik Meijer, 2007-03-06 An analysis of the lives of ancient Rome's gladiators explores how they were both despised and hero-worshiped, chronicling how tens of thousands of gladiators perished publicly over the course of six hundred years.

Notes on a Gladiator's Tessera Murray, 1891

Gladiators 1st-5th centuries AD François Gilbert, 2024-11-21 This illustrated study lifts the veil on the gladiators of ancient Rome, who provided a bloody spectacle for the people of the Eternal City and its vast empire. By the start of the Principate in 27 BC, the gladiator games were a long-standing part of the social and political life of Rome and its sprawling empire. In the wake of reforms enacted by Augustus, the games continued to be at the heart of Roman culture and politics during the 1st and 2nd centuries AD. While prominent citizens harnessed the opportunities offered by the gladiator games to enhance their own reputations and reward their clients, the emperors soon assumed a near-monopoly on the provision of games; several even entered the arena themselves, most notoriously Commodus. In the quest for novelty, prisoners, criminals

and women came to participate in this grisly 'sport'. Only after the adoption of Christianity as the state religion in AD 380 did armed combat between gladiators enter a decline, and even then beast hunts persisted into the 6th century. Although much evidence remains, both literary and archaeological, the gladiators and their world continue to be misunderstood. Featuring full-colour reconstructions of these legendary arena fighters, this book draws upon the latest research and the author's own findings to cast new light on these formidable arena fighters and their legacy.

Gladiators at the Guildhall Nick Bateman, 2000 For over a hundred years people had searched for the Roman amphitheatre of London. In 1988, during a dig at the City's medieval Guildhall, the astonishing discovery was made. The curving stone walls of the arena and timber beams for the seating tiers confirmed that the gladiators' place of spectacle - lost for over 1500 years - had finally been found. The amphitheatre lay abandoned for centuries until - when little more than a hollow in the landscape - it became the site of a Viking trading settlement. The dig revealed some of the most complete remains of 11th-century timber houses to be found anywhere in Europe - showing how London thrived under King Cnut and the Danes. These simple buildings gave way to the first Guildhall, which evolved into a complex building at the political and economic heart of the medieval City. *Gladiators at the Guildhall* tells a tale of archaeological discovery, and of a place that resounds with the clash of Roman gladiators, the clamour of vikings bartering with merchants from Byzantium, and the chanting of medieval priests as Dick Whittington is elected mayor for the third time.

Prosopography and Onomasticon of Aegean Thrace Maria-Gabriella G. Parissaki, 2007 Over the past decades, studies devoted to the prosopography and onomastic on of specific regions have become a valuable means for students of the ancient

world seeking to attain a fuller knowledge of a society, its composition and development over the centuries; and their importance seems even greater in cases where these societies exhibit distinctive features, or where our knowledge of them remains only limited. This dimension was the main reason for writing a monograph devoted to the prosopography and onomasticon of Aegean Thrace; lying at the margins of the ancient Greek world, though at the same time at a vital point where different cultures met and made contact, this part of the north Aegean coast, bounded by the lower course of the Nestos and Hebros rivers, attracted peoples of different ethnological origins from an early date. Study of the personal names has much of value to offer for the society and history of the area: the origin of the colonists, the presence of the former inhabitants, the later, sporadic settlement here of Macedonians and Romans, and even matters relating to changes in naming habits or the appearance and dissemination of new religious beliefs. This objective, and the nature of the material itself, which, with very few exceptions, consists of names whose formation is clear and which are already known to scholarship, largely dictated the social and historical rather than philological and linguistic approach adopted in this work. Invaluable experience in the assembling and study of the material was gained from my participation in the publication of the Greek and Latin inscriptions of Aegean Thrace, recently completed by the north Greek programme of the Centre for Greek and Roman Antiquity, under the direction of Prof. Louisa D. Loukopoulou and in collaboration with the XIX Ephorate of Prehistoric and Classical Antiquities of Komotini. This work made it possible not only to assemble the onomastic material found in inscriptions from the region -which, in Aegean Thrace, as in most areas of the ancient world, are a valuable source of relevant information- but also to check the readings at the primary level, on the stone itself.

The Encyclopaedia Britannica, 1890

Constructing Identity Valerie M. Hope, 2001 This detailed examination of the funerary monuments of Aquileia, Mainz and Nimes allows the investigation of the relative impact of citizenship, social mobility and competitive display in the context of individual sites. It investigates how identity was constructed at death and which elements of the social persona of the deceased (gender, age, legal status, honours and occupation) influenced monument design. It also focuses on the representation of the family at death. It thus aims to reconstruct the communicative dimensions of the funerary memorials to reveal who was commemorated and how, and in the process establish how the relevance of funerary commemoration changed across time. What principles controlled space and design? What elements of social structure were manifested through the funerary record? How did each monument communicate and what were the messages transmitted? These are only some of the questions that the work sets out to answer.
