

Little Blue Dot Quote

Thirumalaisamy P. Velavancorresponding

The Epic Journey in Greek and Roman Literature Thomas Biggs, Jessica Blum, 2019-05-23 From Homer to the moon, this volume explores the epic journey across space and time in the ancient world.

Five Billion Years of Solitude Lee Billings, 2013-10-03 “A definitive guide to astronomy’s hottest field.” —The Economist Since its formation nearly five billion years ago, our planet has been the sole living world in a vast and silent universe. But over the past two decades, astronomers have discovered thousands of “exoplanets,” including some that could be similar to our own world, and the pace of discovery is accelerating. In a fascinating account of this unfolding revolution, Lee Billings draws on interviews with the world’s top experts in the search for life beyond earth. He reveals how the search for exoplanets is not only a scientific challenge, but also a reflection of our culture’s timeless hopes, dreams, and fears.

Technology Challenged Miguel Flach Aznar, 2005 For most of the earth’s existence it has hosted organic life. Single cell life evolved into multicellular plants and animals. Some animals started to use simple tools from otters cracking open shellfish with rocks to chimpanzees dipping into termite mounds with sticks but another animal went farther. It used tools to create even better tools. With spears it hunted. With sewn animal hides it survived the cold. With plows it created surplus. With tablet and scribes it recorded information. These tools led to the printing press, microscope, steam engine, telephone, airplane, and computer. We call these things technology, and for a million years they have been transforming our environment with ever increasing speed and power, costs and benefits. Technology creates new fields of study, destroys old lines of work, and offers new ways to cure illness. Our political decisions and consumption choices rest atop technology. So how do we choose? How do we evaluate technology and technological issues to choose what is good for us, our community, and our civilization? Through simple questions, *Technology Challenged* reveals patterns underlying all technology, helping us to understand our creations and choose our future. Praise for *Technology Challenged*: Fish don’t notice water and most of society doesn’t think about technology. But technology grows ever more powerful, and blindly accepting or rejecting it grows ever more dangerous. The critical thinking process described by Aznar opens a door to understanding through which every citizen in our country should walk. Karl Pister Chancellor Emeritus University of California at Santa Cruz Technology infuses everything we do. Like a gathering storm, it has become the fastest moving, most powerful new element of our natural world. Like any force of nature, it is something we should study well, to chart a course to a better future, a course that takes care of

our loved ones along the way. Only a lifelong learner can be a good captain in our technological world, and this scintillating, optimistic book will help you get your sea legs. Read *Technology Challenged*, consider its advice, and rejoice. This is a wondrous time to be alive.

John Smart
President
Institute for the Study of Accelerating Change

Technology Challenged is a passionate and personal voyage of discovery into today's complicated world of technology. Here educators and parents can find a simple road map to understanding technology and find a new approach to get across technologys culture and wisdom to children of all ages.

Dom Lindars
Senior Director
Oracle Corporation

Having tracked technology on surprising pathways to its secret dumping grounds in the slums of China and India, I have witnessed both sides of the technology coin the glory as well as the horror. Our very survival as a species requires that we fully appreciate both possibilities. Anyone concerned about the life and death relationship between our planet's future and technology, should read *Technology Challenged*.

Jim Puckett
Coordinator
Basel Action Network

Aznar tackles the important issue of how we, as a society, evaluate our technology. With the power to feed the world or to destroy it, technology is worth thinking about.

Mac OS X Tiger Killer Tips Scott Kelby, 2005-08-08

Tip rule! Have you ever noticed that in just about every Mac book, the author will include a couple of tips in each chapter (you'll usually find them in the sidebar, or at the bottom of the page in a tinted box). Sometimes it's a shortcut, a faster way to do something, or a clever workaround that just makes your life easier. People really love those tips, but there's only one problem--there's never enough of them. That's why Scott Kelby, bestselling author and Editor-in-Chief of Mac Design magazine came up with the idea to create a book that's nothing but "sidebar" tips. That's right--this entire book, cover-to-cover is packed with nothing but those cool inside secrets, slick workarounds, undocumented shortcuts, and sneaky little tricks that will make you faster, better, and have more fun using Mac OS 10.4 (Tiger). Nothing but the tips! You're not going to find complicated descriptions on how to configure a network, how to partition a hard drive, or lines and lines of scary-looking UNIX code--instead this book is nothing but cool tips--and it's all written in Scott's casual, plain English style so you can start using these tips today. Plus, this book does the standard sidebar tip one better by including a clear screen capture with nearly every tip, so you can see exactly how it's all done. Not just tips. Killer tips! To be in this book, every tip has got to be a Killer Tip (the kind of tip that makes you nod and smile, then call all your Mac buddies to tune them up with your new-found power). Scott's a total hip hound (in fact, it was Scott who created the entire smash-bestselling Killer Tips book series), and he doesn't hold anything back--it's all here from the man who literally wrote the book on cool productivity tips. If you like doing things the easy way, if you like getting twice the work done in half the time, and if you get a kick out of knowing all the inside secrets and undocumented shortcuts that will wow your friends and coworkers, you're absolutely going to love this book.

Birding and Mysticism Volume 2 George E. Lowe, 2009-09-29

In volume 2 of *Birding and Mysticism: Enlightenment*

Through Bird Watching, there is no traditional table of contents; rather, there are the five main parts and their sections and subsections, which contain the substantive ideas and memes of volume 2, followed by six appendices. The main thrust of volume 2 concerns the many aspects, faces, and forms of mysticism: religious, spiritual, rational, scientific, personal, and practical.

Afterlives of Affect Matthew C. Watson, 2020-07-27 In *Afterlives of Affect* Matthew C. Watson considers the life and work of artist and Mayanist scholar Linda Schele (1942–98) as a point of departure for what he calls an excitable anthropology. As part of a small collective of scholars who devised the first compelling arguments that Maya hieroglyphs were a fully grammatical writing system, Schele popularized the decipherment of hieroglyphs by developing narratives of Maya politics and religion in popular books and public workshops. In this experimental, person-centered ethnography, Watson shows how Schele's sense of joyous discovery and affective engagement with research led her to traverse and disrupt borders between religion, science, art, life, death, and history. While acknowledging critiques of Schele's work and the idea of discovery more generally, Watson contends that affect and wonder should lie at the heart of any reflexive anthropology. With this singular examination of Schele and the community she built around herself and her work, Watson furthers debates on more-than-human worlds, spiritualism, modernity, science studies, affect theory, and the social conditions of knowledge production.

The Epic Journey in Greek and Roman Literature Thomas Biggs (Classicist), Jessica Blum, 2019 This volume explores journeys across time and space in Greek and Latin literature, taking as its starting point the paradigm of travel offered by the epic genre. The epic journey is central to the dynamics of classical literature, offering a powerful lens through which characters, authors, and readers experience their real and imaginary worlds. The journey informs questions of identity formation, narrative development, historical emplotment, and constructions of heroism - topics that move through and beyond the story itself. The act of moving to and from 'home' - both a fixed point of spatial orientation and a transportable set of cultural values - thus represents a physical journey and an intellectual process. In exploring its many manifestations, the chapters in this collection reconceive the centrality of the epic journey across a wide variety of genres and historical contexts, from Homer to the moon.

Cosmos 1999 - The Third Year of Space 1999 John K. Balor, 2019-07-10 What does Gerry Anderson's television series SPACE 1999 have in common with Carl Sagan's award-winning television documentary COSMOS? Not very much, one might expect, but this book documents an Online Alpha discussion where fans of the science fiction series discuss and debate differences and similarities from a wide range of perspectives, some of them arguing that two series may be so closely connected that it might be natural to think of COSMOS as the third year of SPACE 1999. This book is written on an idealistic basis. It is sold at the lowest price the publisher was willing to accept. A free e-book version can be downloaded at

The Work of Art Adam Moss,2024-04-16 THE NEW YORK TIMES BESTSELLER “The book is a visual feast, full of drafts, sketches, and scribbled notebook pages. Every page shows how an idea becomes a finished design.” —Ari Shapiro, All Things Considered From former editor of New York magazine Adam Moss, a collection of illuminating conversations examining the very personal, rigorous, complex, and elusive work of making art What is the work of art? In this guided tour inside the artist’s head, Adam Moss traces the evolution of transcendent novels, paintings, jokes, movies, songs, and more. Weaving conversations with some of the most accomplished artists of our time together with the journal entries, napkin doodles, and sketches that were their tools, Moss breaks down the work—the tortuous paths and artistic decisions—that led to great art. From first glimmers to second thoughts, roads not taken, crises, breakthroughs, on to one triumphant finish after another. Featuring: Kara Walker, Tony Kushner, Roz Chast, Michael Cunningham, Moses Sumney, Sofia Coppola, Stephen Sondheim, Susan Meiselas, Louise Glück, Maria de Los Angeles, Nico Muhly, Thomas Bartlett, Twyla Tharp, John Derian, Barbara Kruger, David Mandel, Gregory Crewdson, Marie Howe, Gay Talese, Cheryl Pope, Samin Nosrat, Joanna Quinn & Les Mills, Wesley Morris, Amy Sillman, Andrew Jarecki, Rostam, Ira Glass, Simphiwe Ndzube, Dean Baquet & Tom Bodkin, Max Porter, Elizabeth Diller, Ian Adelman / Calvin Seibert, Tyler Hobbs, Marc Jacobs, Grady West (Dina Martina), Will Shortz, Sheila Heti, Gerald Lovell, Jody Williams & Rita Sodi, Taylor Mac & Machine Dazzle, David Simon, George Saunders, Suzan-Lori Parks
