Strategic Marketing Management: A Means-End Approach Mark E. Parry, 2001-12-22 Strategic Marketing Management provides a logical approach for developing and positioning corporate and product brands, and skillfully managing those brand positions over time. Case studies and examples illustrate how to maximize benefits from a first-mover strategy, navigate a brand extension, set priorities when establishing brand meanings, and more. Whether branding new product lines or managing brand meanings for established products, this accessible, concise guide helps marketing executives assess market trends, make branding decisions quickly and confidently—then execute those decisions with precision.

Theoretical Foundations of Means-end Chains Jerry Corrie Olson, 1988

E-Business Innovation and Process Management Lee, In, 2006-12-31 E-business research is currently one of the most active research areas. With the rapid advancement in information technologies, e-business is growing in significance and is having a direct impact upon ways of doing business. As e-business becomes one of the most important areas in organizations, researchers and practitioners need to understand the implications of many technological and organizational changes taking place. *Advances in E-Business Research: E-Business Innovation and Process Management* provides researchers and practitioners with valuable information on recent advances and developments in emerging e-business models and technologies. This book covers a variety of topics, such as e-business models, e-business strategies, online consumer behavior, e-business process modeling and practices, electronic communication adoption and service provider strategies, privacy policies, and implementation issues.

International Encyclopedia of Hospitality Management 2nd edition Abraham Pizam, 2012-06-25 The International Encyclopedia of Hospitality Management is the definitive reference work for any individual studying or working in the hospitality industry. There are 185 Hospitality Management degrees in the UK alone. This new edition updates and significantly revises twenty five per cent of the entries and has an additional twenty new entries. New online material makes it the most up-to-date and accessible hospitality management encyclopedia on the market. It covers all of the relevant issues in the field of hospitality management from a sectoral level (lodging, restaurants/food service, time-share, clubs and events) as well as a functional one (accounting and finance, marketing, strategic management, human resources, information technology and facilities management). Its unique, user-friendly structure enables readers to find exactly the information

they require at a glance - whether they require broad detail that takes a more cross-sectional view across each subject field or more focused information that looks closely at specific topics and issues within the hospitality industry today.

Consumer Behavior and Marketing Strategy J. Paul Peter, Jerry Corrie Olson, 1996 This work shows how the various elements of consumer analysis fit together in an integrated framework, called the Wheel of Consumer Analysis. Psychological, social and behavioural theories are shown as useful for understanding consumers and developing more effective marketing strategies. The aim is to enable students to develop skills in analyzing consumers from a marketing management perspective and in using this knowledge to develop and evaluate marketing strategies. The text identifies three groups of concepts - affect and cognition, behaviour and the environment - and shows how these they influence each other as well as marketing strategy. The focus of the text is managerial, with a distinctive emphasis on strategic issues and problems. Cases and questions are included in each chapter.

Understanding Consumer Behaviour J. Paul Peter, 1996 Understanding Consumer Behaviour offers a unique, focused, integrative, strategic-marketing approach to the topic-specifically the way in which consumer behaviour is brought into the discussion of marketing strategy. Abundant use of current, student-friendly examples that effectively tie-in and illustrate the theories presented.

Climate Change Research S. Zwerver, R.S.A.R. Rompaey, M.T.J. Kok, M.M. Berk, 1995-11-20 Climate change is more and more considered to be a major global environmental risk. The above mentioned conference was the concluding part of a new programme organized in The Netherlands with a view to stimulating participation of Dutch scientists in the international research effort concerning the problem of climate change. The proceedings of the Maastricht Conference on Climate Change Research cover a wide range of subjects including: * key note papers of internationally leading scientists on relevant aspects of the climate problem * assessments of NRP-research on the climate system, the causes of potential change in the system, the possible effects and consequences of climate change, and alternative responses (including technological and/or social) that are considered within the context of sustainable development * short papers of the NRP- and related projects with final conclusions per project This book will be of value to anyone professionally interested in the various aspects of climate change research and policy.

Intelligent and Fuzzy Systems Cengiz Kahraman, Irem Ucal Sari, Basar Oztaysi, Selcuk Cebi, Sezi Cevik Onar, A. Çağrı Tolga, 2023-08-16 This book consists of the papers accepted after a careful review process at an international scientific meeting where the latest developments on intelligent and fuzzy systems are presented and discussed. The latest developments in both the theoretical and practical fields of the new fuzzy set extensions have been prepared by expert researchers. Contributed by participants from more than 40 different countries, this book is also a useful resource in terms of showing the levels that fuzzy and intelligent systems have reached in various countries of the world. The intended readers

are intelligent and fuzzy systems researchers, lecturers, M.Sc., and Ph.D. students studying fuzzy sets and artificial intelligence. The book covers fuzzy logic theory and applications, heuristics, and metaheuristics from optimization to machine learning, from quality management to risk management, making the book an excellent source for researchers.

Understanding Consumer Decision Making Thomas J. Reynolds, Jerry C. Olson, 2001-05-01 The goal of this book is to help business managers and academic researchers understand the means-end perspective and the methods by which it is used, and to demonstrate how to use the means-end approach to develop better marketing and advertising strategy. The authors discuss methodological issues regarding interviewing and coding, present applications of the means-end approach to marketing and advertising problems, and describe the conceptual foundations of the means-end approach. This book is of interest to academic researchers in marketing and related fields, graduate students in business, marketing research professionals, and business managers. It is intended as a reference book containing ideas about the means-end approach and its applications.

Consumer Behavior Wayne D. Hoyer, Deborah J. MacInnis, 2004 Active field researchers and award-winning teachers, Hoyer and MacInnis provide a broad conceptual model of consumer behavior to help student to see how all chapter topics tie together. The text also offers a strong marketing perspective, focusing on the implications of consumer behavior research for marketers. A casebook featuring approximately 16-20 consumer behavior cases can be packaged with new copies of the Third Edition, providing students a chance to practice applying what they learn.

The Consumption of Time and the Timing of Consumption Gerrit Antonides, Wilhelmus Antonius Arts, W. Fred van Raaij, 1991 Paperback. The papers in this book deal with the consumption of time, i.e. the time consuming aspects of activities and their evaluation, and with the timing of consumption, i.e. the advancement or postponement of consumption and saving activities. These two aspects of time are considered in an interdisciplinary setting by economists, psychologists and sociologists. Since this unique combination of disciplines is seldom observed, the first part of the book deals especially with the socioeconomic perspective as a research program, including the main paper by Amitai Etzioni. Two general discussion papers also deal with the relationship between the disciplines. Interesting features of this volume are: 1. Interdisciplinary work on the consumption of time, including discussion. 2. Interdisciplinary work on the timing of consumption, including discussion. 3. Discussions of the interdisciplinary approach in this area. 4. An extensive curriculum vitae of

Marketing for the Manufacturer J. Paul Peter, 1992 Manufacturers who want to remain viable in today's dynamic marketplace must have their fingers on the pulse of the ever-changing customer demands for quality products and services. Companies can no longer waste valuable time waiting for policies and plans to trickle down from executive boardrooms - consumers expect timely responses to their needs. J. Paul Peter explores the ways manufacturers can use the marketing function to initiate the alignment of manufacturing processes with customer demands. He gives you a detailed analysis of how marketing fits into various organizational structures and product management systems, bringing pertinent marketing and manufacturing issues to light. His logically flowing structure will guide you through the maze of product development, promotion, distribution, and pricing so you can formulate a successful manufacturing-marketing mix that augments customer responsiveness. Inside *Marketing for the Manufacturer* you will find methods for researching consumer markets and ways to adjust manufacturing, delivery, and inventory policies based on your findings, case studies that reveal real-world techniques for reconciling the differences between manufacturing and marketing functions, and specific strategies marketing professionals use to develop, implement, and measure their programs. Manufacturing managers of the future need to develop integrated solutions to problems that cross traditional functional boundaries. In order to effectively respond to customer demands, they must understand both the tools and concepts associated with the marketing function. The proactive marketing strategies presented in this book will help manufacturing professionals on all levels heighten their competitive advantage and continuously anticipate, meet, and exceed the expectations of their customers.
