**Grammaticalization and the Rise of Configurationality in Indo-Aryan** Uta Reinöhl, 2017-04-14 This book examines historical changes in the grammar of the Indo-Aryan languages from the period of their earliest attestations in Vedic Sanskrit (around 1000 bc) to contemporary Hindi. Uta Reinöhl focuses specifically on the rise of configurational structure as a by-product of the grammaticalization of postpositions: while Vedic Sanskrit lacks function words that constrain nominal expressions into phrasal units - one of the characteristics of a non-configurational language - New Indo-Aryan languages have postpositions which organize nominal expressions into postpositional phrases. The grammaticalization of postpositions and the concomitant syntactic changes are traced through the three millennia of Indo-Aryan attested history with a focus on Vedic Sanskrit, Middle Indic Pali and Apabhramsha, Early New Indic Old Awadhi, and finally Hindi. Among the topics discussed are the constructions in which the postpositions grammaticalize, the origins of the postpositional template, and the paradigmaticization of the various elements involved into a single functional class of postpositions. The book outlines how it is semantic and pragmatic changes that induce changes on the expression side, ultimately resulting in the establishment of phrasal, and thus low-level configurational, syntax.

**Machine Translation** Pushpak Bhattacharyya, 2015-02-04 This book compares and contrasts the principles and practices of rule-based machine translation (RBMT), statistical machine translation (SMT), and example-based machine translation (EBMT). Presenting numerous examples, the text introduces language divergence as the fundamental challenge to machine translation, emphasizes and works out word alignment, explores IBM models of machine translation, covers the mathematics of phrase-based SMT, provides complete walk-throughs of the working of interlingua-based and transfer-based RBMT, and analyzes EBMT, showing how translation parts can be extracted and recombined to automatically translate a new input.

**Aspectuality and Temporality** Zlatka Guentchéva, 2016-03-09 This volume brings together a collection of articles exploring tense and aspect phenomena in a variety of non-related languages: Indo-European (Albanian, Bulgarian, Armenian, English, Norwegian, Hindi), Hamito-Semitic (Berber, Zenaga Berber, Arabic varieties, Neo-Aramaic), African (Wolof, Langi), Asian (Badaga, Korean, Mongolian languages - Khalkha, Buriat, Kalmuck - Thai, Tibetic languages), Amerindian (Yucatec Maya, Sikuani), Greenlandic (Eskimo) and Oceanian (Nêlêmwa). Each article is grounded in solid empirical knowledge. It offers an in-depth study of aspectual and temporal devices as manifested in many diverse and complex ways from a cross-

linguistic perspective and seeks to contribute to our understanding of the domain under consideration and more broadly to linguistic typology and theoretical linguistics, especially the enunciative approach. The book gives readers access to a collection of data and is of particular interest to scholars working on aspectuality and temporality, on pragmatics, on areal linguistics and on typology.

**A Grammar of Atong** Seino van Breugel, 2014-01-30 Atong is a Tibeto-Burman language spoken in Northeast India and Bangladesh. Seino van Breugel provides a deep and thorough coverage and analysis of all major areas of the grammar, which makes this book of great interest and value to general linguists and typologists as well as area specialists. Alongside an Atong-English dictionary and five fully-glossed Atong texts recorded during extensive fieldwork, this work also provides a sizable ethnolinguistic introduction to the speakers and their culture. Of particular interest is the pragmatic approach taken for the grammatical analysis. Whereas the form of an utterance provides some clue as to its possible meaning, inference is always needed to arrive at the most relevant interpretation within the context in which the utterance occurs. This is a very important book for South Asian and Sino-Tibetan linguistic scholarship. Of the 200 languages of Northeast India, only a handful have been documented; the present work brings the number of full-scale modern grammars for these languages to six. Thus it represents a unique and extremely valuable contribution. Professor Scott DeLancey University of Oregon This is a solid academic work which makes a huge contribution to the field. There is no other detailed account of this particular language, and it is highly doubtful that anyone will write something more comprehensive in the future. Dr Willem de Reuse University of North Texas

*The Bilingual Lexicon* Robert Schreuder, Bert Weltens, 1993-08-06 In the study of bilingualism, the lexical level of language is of prime importance because, in practical terms, vocabulary acquisition is an essential prerequisite for the development of skill in language use; from a theoretical point of view, the mental lexicon, as a bridge between form and meaning, plays a crucial role in any model of language processing. A central issue in this volume is at which level of the bilingual speaker's lexicon languages share representations and how language-specific representations may be linked. The contributors favor a dynamic, developmental perspective on bilingualism, which takes account of the change of the mental lexicon over time and pays considerable attention to the acquisition phase. Several papers deal with the level of proficiency and its consequences for bilingual lexical processing, as well as the effects of practice. This discussion raises numerous questions about the notion of (lexical) proficiency and how this can be established by objective standards, an area of study that invites collaboration between researchers working from a theoretical and from a practical background.

**A Descriptive Grammar of Dakkhini** Khateeb S. Mustafa, 2000 Illustrations: 3 Map Description: The present work attempts to analyse and describe Dakkhini, a variety of Urdu spoken in Chittoor district of Andhra Pradesh in the framework of descriptive linguistic theory. It presents the phonology, morphology and syntax of the dialect. It also discusses briefly the origin and development of Dakkhini, its speakers in Chittoor district and the whole of Andhra Pradesh and the existing relationship between Dakkhini and Telugu on the one hand and Dakkhini and standard Urdu on the other. It also has a section known as texts which contains a few samples of the data. Dakkhini has assumed crucial importance in socio-linguistics. Since its major implantation in the beginning of the fourteenth century, it has undergone subtle changes in its structure partly due to linguistic acculturation, convergence and aerial contact with different languages in different areas and partly due to innovations it has been making on its own over the years. It is therefore marked by great diversity and heterogeneity. The Dakkhini situation may thus serve not only as a testing ground to validate many a concept of aerial linguistics, but also as a mirror to read the dynamics of convergence of the languages and dialects belonging to two different milieu. The current book has been intended as a fairly detailed grammatical description of a dialect of Dakkhini which is unique in many ways. Although it does not directly deal with a socio-linguistic theme, it endeavours to provide sufficient evidence for a bi-directional convergence, that is, from Dravidian language to Dakkhini and vice versa. It is hoped that the work may arouse some curiosity in linguists working in the area of language contact, language variation, language topology, etc.
