The Oxford Handbook of Arabic Linguistics Jonathan Owens, 2013-08-15 Arabic is one of the world's largest languages, spoken natively by nearly 300 million people. By strength of numbers alone Arabic is one of our most important languages, studied by scholars across many different academic fields and cultural settings. It is, however, a complex language rooted in its own tradition of scholarship, constituted of varieties each imbued with unique cultural values and characteristic linguistic properties. Understanding its linguistics holistically is therefore a challenge. The Oxford Handbook of Arabic Linguistics is a comprehensive, one-volume guide that deals with all major research domains which have been developed within Arabic linguistics. Chapters are written by leading experts in the field, who both present state-of-the-art overviews and develop their own critical perspectives. The Handbook begins with Arabic in its Semitic setting and ends with the modern dialects; it ranges across the traditional--the classical Arabic grammatical and lexicographical traditions--to the contemporary--Arabic sociolinguistics, Creole varieties and codeswitching, psycholinguistics, and Arabic as a second language - while situating Arabic within current phonetic, phonological, morphological, syntactic and lexicological theory. An essential reference work for anyone working within Arabic linguistics, the book brings together different approaches and scholarly traditions, and provides analysis of current trends and directions for future research.

Rewriting Dialectal Arabic Prehistory Alexander Borg, 2021-11-15 Deploying a bottom up instead of the conventional top down approach, and drawing extensively on both literary and dialectal Arabic lexical sources, the present glossary proposes and validates the contention of a prehistoric symbiosis transpiring between Ancient Egyptian and Arabic two and a half millennia before the advent of Islam. Its empirical rationale and methodological basis rest firmly on these venerable idioms' rich textual documentation, yielding the language historian an ample etymological database enriched—in the case of Arabic—with a virtually unlimited corpus drawing on the living speech of some 300 million speakers across the Near East and Africa. The muster provided here comprises over 800 lexemes and reveals, for the first time in longue durée research on Afroasiatic, striking unsuspected commonalities linking Old Egyptian to Yemeni Arabic.

To the Madbar and Back Again Laila Nehmé, Ahmad Al-Jallad, 2017-11-20 Michael C.A. Macdonald is one of the great names of Arabian Studies. He pioneered the field of Ancient North Arabian and made invaluable contributions to the history of Arabia and the nomads of the Near East, their languages, and their scripts. This volume gathers thirty-two innovative contributions from leading scholars in the field to honor the career of Michael C.A. Macdonald, covering the languages and scripts of ancient Arabia, their history and archaeology, the Hellenistic Near East, and the modern dialects and languages of Arabia. The book is an essential part of the library of any who study the Near East, its languages and its cultures.
